TABLE OF CONTENTS

In the serial designations prefixed to the following titles, the number following the dash indicates the year of original issue or, in the case of revision, the year of last revision. Thus, standards adopted or revised during the year 1999 have as their final number 99. A letter following this number indicates more than one revision during that year, that is 99a indicates the second revision in 1999, 99b the third revision, etc. Standards that have been reapproved without change are indicated by the year of last reapproval in parentheses as part of the designation number, for example, (1999). A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval—1 for the first change, 2 for the second change, etc.
