

HOW TO USE THIS MANUAL

Table 1—lists the test methods with their equivalent IP, ISO, DIN, JIS, and AFNOR designations. The top of each page listing the test summary also refers to these equivalent standards. If you are considering using any standard that has equivalent standards you should refer to them to determine the full scope of each standard and any differences between. Although these standards are listed as equivalent they will not be exactly the same in many cases.

Table II—lists the ASTM test methods alphanumerically by ASTM designation. If you know the ASTM designation, this is the easiest way to find what you need. The top of each page listing the test summary also refers to these equivalent standards.
