

CONTENTS

Preface	vii
Chapter 1—Introduction	1
Chapter 2—Development of High (7-12%) Chromium Martensitic Steels	5
Chapter 3—Physical Metallurgy of High-Chromium Steels	28
Chapter 4—Thermal Stability	39
Chapter 5—Oxidation, Corrosion, and Compatibility	56
Chapter 6—Hydrogen Isotope Effects	63
Chapter 7—Joining	71
Chapter 8—Irradiation Damage, Irradiation Facilities, Irradiation Testing	81
Chapter 9—Dimensional Stability—Swelling	90
Chapter 10—Interfacial Segregation and Precipitation During Irradiation	103
Chapter 11—Irradiation Creep	113
Chapter 12—Irradiation Effects on Tensile Behavior	122
Chapter 13—Elevated-Temperature Helium Embrittlement	135
Chapter 14—Irradiation Effects on Impact Properties	139
Chapter 15—Fracture Toughness	167
Chapter 16—Fatigue and Fatigue Crack Growth	177
Chapter 17—Recovery (Annealing) of Radiation Damage	205
Chapter 18—Summary: Past, Present, and Future	208
Index	217
