

Manual 46

Metallographic and Materialographic Specimen Preparation, Light Microscopy, Image Analysis and Hardness Testing

Table of Contents

PART I: THE METALLOGRAPHIC/MATERIALOGRAPHIC PREPARATION PROCESS

1. INTRODUCTION

- 1.1.1 Henry Clifton Sorby (1826–1908)
- 1.2 The True Microstructure
- 1.3 Selection of Preparation Method
 - 1.3.1 Artifacts
 - 1.3.2 Preparation Methods
- 1.4 The Materialographic Specimen
 - 1.4.1 “Specimen” or “Sample”
- 1.5 The Preparation Process
 - 1.5.1 Sectioning
 - 1.5.2 Mounting
 - 1.5.3 Preparation of the Surface
 - 1.5.4 Etching

2 SECTIONING

- 2.1 Selection
 - 2.1.1 General Studies or Routine Work
 - 2.1.2 Study of Failures
 - 2.1.3 Research Studies
 - 2.1.4 Type of Section
 - 2.1.5 Reporting of Locations
- 2.2 Sectioning
- 2.3 Wet Abrasive Cutting
 - 2.3.1 The Cut-off Grinding Process
 - 2.3.2 The Cut-off Wheel—Abrasives and Bond Materials
 - 2.3.3 Grinding Mechanics
 - 2.3.4 Mechanical Damage
 - 2.3.5 Thermal Damage
 - 2.3.6 Cut-off Wheel Wear
 - 2.3.7 Cutting Fluids
 - 2.3.8 The Metallographic/Materialographic Cutting Operation
- 2.4 Abrasive Cut-Off Wheels
 - 2.4.1 Consumable Wheels
 - 2.4.2 Slow Consumable Wheels
- 2.5 Abrasive Cut-off Machines
 - 2.5.1 Design Principles of Wheel—Work Piece Contact
 - 2.5.2 Machine Designs
- 2.6 Advice and Hints on Wet Abrasive Cutting
 - 2.6.1 Cut-off Wheel Selection
- 2.7 Other Sectioning Methods
 - 2.7.1 Fracturing
 - 2.7.2 Sectioning by Melting
 - 2.7.3 Shearing
 - 2.7.4 Sawing—Table 2.1
 - 2.7.5 Wire Cutting

3 MOUNTING

- 3.1.1 Purpose
- 3.1.2 Criteria for a Good Mount
- 3.1.3 Surface Flatness—Edge Retention

- 3.2 Mounting Methods
 - 3.2.1 Clamping
 - 3.2.2 Hot Compression Mounting
 - 3.2.3 Cold (Castable) Mounting
- 3.3 Hot Compression Mounting
 - 3.3.1 Advantages of Hot Compression Mounting
 - 3.3.2 Disadvantages of Hot Compression Mounting
 - 3.3.3 MSDS (Material Safety Data Sheets)
- 3.4 Hot Mounting Resins
 - 3.4.1 Thermoplastic Resins
 - 3.4.2 Thermosetting Resins
- 3.5 Mounting Presses
 - 3.5.1 The Heating/Cooling Unit
 - 3.5.2 The Hydraulic Press
 - 3.5.3 The Air-operated Press
- 3.6 Advice and Hints on Hot Compression Mounting
 - 3.6.1 Selection of Resins for Hot Compression Mounting
- 3.7 Cold (Castable) Mounting
 - 3.7.1 Advantages of Cold (Castable) Mounting
 - 3.7.2 Disadvantages of Cold (Castable) Mounting
 - 3.7.3 MSDS (Material Safety Data Sheets)
- 3.8 Cold Mounting Resins
 - 3.8.1 Acrylics
 - 3.8.2 Polyesters
 - 3.8.3 Epoxies
- 3.9 Accessories for Cold (Castable) Mounting
 - 3.9.1 Mounting Molds
 - 3.9.2 Clips
- 3.10 Vacuum Impregnation
 - 3.10.1 Dyes
- 3.11 Special Mounting Techniques
 - 3.11.1 Taper Sectioning
 - 3.11.2 Edge Protection
 - 3.11.3 Mounting of Very Small Parts, Foils, and Wires
 - 3.11.4 Mounting of Powders
 - 3.11.5 Mounting of PCB Coupons
 - 3.11.6 Conductive Mounts
- 3.12 Recovery of Mounted Specimen
- 3.13 Advice and Hints on Cold Mounting
 - 3.13.1 Selection of Cold Mounting Materials

4 MARKING—STORAGE—PRESERVATION

- 4.1 Marking
 - 4.1.1 Marking with Waterproof Ink
 - 4.1.2 Identification Tag
 - 4.1.3 Engraving
 - 4.1.4 Stamping
- 4.2 Storage
- 4.3 Preservation

5 CLEANING and CLEANLINESS

- 5.1.1 Cleaning Before Start of Preparation
- 5.1.2 Cleaning During and After Preparation
- 5.2 Cleanliness

6 MECHANICAL SURFACE PREPARATION—GRINDING

- 6.1 Grinding—A Basic Process
 - 6.1.1 Plane Grinding (PG)
 - 6.1.2 Fine Grinding
- 6.2 Material Removal
 - 6.2.1 Rake Angle
 - 6.2.2 Grain Shape—Contacting Points
 - 6.2.3 Grain Penetration
 - 6.2.4 Force on Specimens
 - 6.2.5 Grinding/Polishing Fluids
- 6.3 Deformation
 - 6.3.1 Metals
 - 6.3.2 Brittle Materials—Ceramics
- 6.4 Grinding Abrasives
 - 6.4.1 Aluminum Oxide
 - 6.4.2 Silicon Carbide
 - 6.4.3 Diamond—Diamond Products
 - 6.4.4 Cubic Boron Nitride (CBN)
 - 6.4.5 Boron Carbide
 - 6.4.6 Hardness of Abrasives and Materials—Table 6.1
- 6.5 Grinding/Polishing Fluids—Lubricants
 - 6.5.1 Water-Based Lubricant
 - 6.5.2 Alcohol-Based Lubricant
 - 6.5.3 Water-oil Based Lubricant
 - 6.5.4 Oil-Based Lubricant
- 6.6 Traditional Grinding
 - 6.6.1 Grinding Stones/Disks
 - 6.6.2 SiC Wet Grinding Paper—Table 6.2
 - 6.6.3 Alumina—Zirconia Alumina Wet Grinding Paper
- 6.7 Contemporary Grinding
 - 6.7.1 Magnetic Fixation
 - 6.7.2 Resin-Bonded Diamond Grinding Disks
 - 6.7.3 Resin-Bonded SiC Grinding Disks
 - 6.7.4 Metal-Bonded Diamond-Coated Disks
 - 6.7.5 Diamond Pads
 - 6.7.6 Diamond/CBN/ Al₂O₃ /SiC Film
 - 6.7.7 Rigid Composite Disks
 - 6.7.8 Fine Grinding Cloths
- 6.8 Grinding/Polishing Equipment
 - 6.8.1 Plane Grinding
 - 6.8.2 Fine Grinding

7 MECHANICAL SURFACE PREPARATION—POLISHING

- 7.1 Polishing: Producing the True Structure
 - 7.1.1 Rough Polishing
 - 7.1.2 Polishing
- 7.2 Material Removal
 - 7.2.1 Influence of Polishing Abrasive on Removal Rate
 - 7.2.2 Force on Specimens
- 7.3 Deformation
 - 7.3.1 The Beilby Layer
 - 7.3.2 Influence of Polishing Abrasive, Cloth, and Fluid on Deformation
- 7.4 Polishing Cloths
 - 7.4.1 Edge Retention—Relief
 - 7.4.2 Cloths for Fine Grinding and Rough Polishing
 - 7.4.3 Cloths for Polishing

- 7.5 Polishing Abrasives
 - 7.5.1 Diamond Suspensions
 - 7.5.2 Diamond Spray
 - 7.5.3 Diamond Paste
 - 7.5.4 Alumina
 - 7.5.5 Silica
 - 7.5.6 Other Oxides
- 7.6 Polishing Lubricants
- 7.7 The Metallographic/Materialographic Preparation Methods—Method Parameters
 - 7.7.1 R/min of Grinding/Polishing Disk
 - 7.7.2 R/min of Specimen Holder
 - 7.7.3 Direction of Specimen Holder
 - 7.7.4 Force on Specimens
 - 7.7.5 Process Time
 - 7.7.6 Stock Removal
- 7.8 Grinding/Polishing Equipment—Manual Preparation
- 7.9 Grinding/Polishing Equipment—Automatic Preparation
 - 7.9.1 Machine Design
 - 7.9.2 Polishing Dynamics
 - 7.9.3 Semiautomatic and Fully Automatic Systems
- 7.10 Special Preparation Techniques
 - 7.10.1 PCB Coupons
 - 7.10.2 Microelectronic Materials—Nonencapsulated Cross Sections
 - 7.10.3 Microelectronic Packages—Table 7.2—Target Preparation
 - 7.10.4 EBSD
- 7.11 Field Metallography/Materialography—Nondestructive Mechanical Preparation
 - 7.11.1 Portable Grinder/Polishers
 - 7.11.2 Replication
- 7.12 Chemical Mechanical Polishing
 - 7.12.1 Protection—Corrosion at CMP
- 7.13 Thin Sections
 - 7.13.1 Thin Sections of Petrographic/Ceramic Materials
 - 7.13.2 Thin Sections of Plastics/Polymers
- 7.14 Microtomy—Ultramilling

8 ELECTROLYTIC POLISHING/ETCHING

- 8.1.1 The Electrolytic Polishing/Etching Process
 - 8.1.1 The Polishing Cell
 - 8.1.2 Smoothing and Brightening
 - 8.1.3 Electrolytic Etching
 - 8.1.4 Advantages and Disadvantages
- 8.2 Electrolytes
- 8.3 Electropolishing in Practice
 - 8.3.1 Factors Influencing Electrolytic Polishing
 - 8.3.2 Example of Electrolytic Polishing/Etching
- 8.4 Electrolytic Polishing Equipment
 - 8.4.1 Electropolishers for Laboratory Use
- 8.5 Field Metallography—Nondestructive Electropolishing
- 8.6 Electrolytic Thinning for TEM
- 8.7 Chemical Polishing

9 ETCHING

- 9.1 Microetching—Contrast
- 9.2 Contrast Without Surface Modifications—Microscope Techniques
 - 9.2.1 Dark-Field Illumination
 - 9.2.2 Differential Interference Contrast (DIC)

- 9.2.3 Polarized Light
- 9.2.4 Fluorescence
- 9.3 Contrast with Surface Modification—Etching
- 9.3.1 Grain Contrast Etching
- 9.3.2 Grain Boundary Etching
- 9.3.3 Reproducibility
- 9.3.4 Safety Precautions
- 9.4 Classical Etching
- 9.4.1 Chemical Etching
- 9.4.2 Precipitation (Color) Etching
- 9.4.3 Heat Tinting
- 9.5 Electrolytic Etching
- 9.5.1 Anodic Etching
- 9.5.2 Anodizing
- 9.5.3 Potentiostatic Etching
- 9.6 Physical Etching
- 9.6.1 Relief Polishing
- 9.6.2 Ion Etching
- 9.6.3 Thermal Etching
- 9.6.4 Vapor Deposition
- 9.6.5 Sputtering
- 9.7 Macroetching

PART II: METALLOGRAPHIC/MATERIALOGRAPHIC SPECIMEN PREPARATION—A HANDS-ON MANUAL

10 INTRODUCTION

- 10.2 Purpose of Examination
- 10.3 Specimen Preparation

11 SPECIMEN MATERIAL—TABLE 11.1

- 11.2 How to Use Table 11.1
- 11.3 Table 11.1—Materials/Methods

12 PURPOSE of EXAMINATION

- 12.1 Purpose in General
- 12.2 Purpose: ASTM Standards
- 12.3 Table 12.1: Purpose/ASTM Standards
- 12.4 ASTM Standards—Metallography
- 12.4.1 Introduction
- 12.4.2 ASTM Standards in this Book
- 12.4.3 ASTM Standards—Document Summaries
- 12.5 Chemical Microetching—Table 12.2—Table 12.3
- 12.5.1 Etching Practice
- 12.5.2 Table 12.2—Numerical List of Etchants
- 12.5.3 Table 12.3—Etchant Names

13 SPECIMEN PREPARATION

- 13.1 Introduction
- 13.2 Mechanical Preparation—The “Traditional” and “Contemporary” Methods
- 13.2.1 Material/Preparation Tables
- 13.2.2 Method Tables—Generic Methods—Parameters/Consumables—Table 13.1
- 13.2.3 Material/Preparation Tables—Methods C-01/T-01 to C-67/T-67
- 13.2.4 Manual Preparation
- 13.3 Electrolytic Polishing and Etching
- 13.3.1 Electropolishers
- 13.3.2 Electrolytes—Methods for Electropolishing—Table 13.2

- 13.3.3 Table 13.2—Electrolytes for Electropolishing/Etching
- 13.3.4 Mechanical Preparation for Electropolishing
- 13.3.5 Electropolishing—Method Tables
- 13.3.6 Electropolishing—Methods EI-01 To EI-25
- 13.4 Field Metallography/Materialography—Nondestructive Preparation
- 13.4.1 Mechanical Preparation
- 13.4.2 Electrolytic Polishing
- 13.4.3 Replication
- 13.5 Trouble Shooting—How to Improve Preparation Results
- 13.5.1 Sectioning
- 13.5.2 Mounting
- 13.5.3 Mechanical Preparation
- 13.5.4 Electrolytic Polishing
- 13.5.5 General Rules—“The Metallographer’s Rule of Thumb”
- 13.6 Trouble Shooting—How to Overcome Preparation Artifacts
- 13.6.1 Preparation Artifacts—Flow Charts
- 13.6.2 Sectioning—General Problems—Flow Charts
- 13.6.3 Mounting—General Problems—Artifacts
- 13.6.4 Grinding and Mechanical Polishing—Flow Charts
- 13.6.5 Electropolishing—General Problems—Artifacts

PART III: LIGHT MICROSCOPY

14 INTRODUCTION

- 14.1 Visible Light
- 14.2 The Human Eye
- 14.3 Magnifying Lens and Microscope
- 1.4 Magnification

15 THE OPTICAL REFLECTED LIGHT MICROSCOPE

- 15.1 The Path of Light Rays
- 15.2 The Objective
- 15.2.1 Numerical Aperture—Resolution-Magnification
- 15.2.2 Aberrations in Image-Formation
- 15.2.3 Available Objectives
- 15.3 Eyepieces
- 15.4 Illumination
- 15.4.1 Koehler’s Illumination System
- 15.5 Microscope Options
- 15.6 The Reflected-Light Microscope
- 15.6.1 Upright Type of Reflected-Light Microscope
- 15.6.2 Inverted Type of Reflected-Light Microscope
- 15.7 Optical Examination Methods
- 15.7.1 Bright-Field (BF) Illumination
- 15.7.2 Dark-Field (DF) Illumination
- 15.7.3 Polarization Contrasting (POL)
- 15.7.4 Differential Interference Contrasting (DIC)
- 15.7.5 Fluorescence in Reflected Light
- 15.8 Practical Use of the Microscope
- 15.8.1 Setting up the Microscope
- 15.8.2 Working with the Microscope
- 15.8.3 Correct Adjustment of the Microscope
- 15.8.4 Focusing and Practical Use
- 15.8.5 Measurements of Length
- 15.8.6 Measurements of Height Differences
- 15.8.7 Maintenance of the Microscope
- 15.9 Documentation

- 15.10 The Confocal Laser Scan Microscope
- 15.10.1 Function of Confocal Laser Scan Microscope
- 15.10.2 Applications of Confocal Laser Scan Microscope
- 15.11 Stereo Microscopy

16 ELECTRON MICROSCOPY—SCANNING PROBE MICROSCOPY

- 16.1 The Transmission Electron Microscope (TEM)
- 16.1.1 The Scanning Transmission Electron Microscope (STEM)
- 16.2 The Scanning Electron Microscope (SEM)
- 16.2.1 Energy Dispersive Spectroscopy (EDS)
- 16.2.2 Electron Backscatter Diffraction (EBSD)
- 16.2.3 The Electron Probe Microanalyzer (EPMA)
- 16.3 Focused Ion Beam (FIB)
- 16.4 Scanning Probe Microscopes (SPM)

PART IV: QUANTITATIVE METALLOGRAPHY/MATERIALOGRAPHY—IMAGE ANALYSIS

17 INTRODUCTION

- 17.1 Quantitative Materialography
- 17.1.1 Stereology
- 17.1.2 Specimen Preparation
- 17.1.3 Calibration
- 17.1.4 Field Selection—Bias
- 17.2 Volume Fraction—Point Count
- 17.2.1 ASTM Test Method for Determining Volume Fraction by Systematic Manual Point Count (E 562)
- 17.3 Inclusion Rating
- 17.3.1 ASTM Standard Test Method For Determining the Inclusion Content of Steel (E 45)
- 17.3.2 ASTM Practice for Obtaining JK Inclusion Ratings Using Automatic Image Analysis (E 1122)
- 17.3.3 ASTM Practice for Determining the Inclusion or Second-Phase Constituent Content of Metals by Automatic Image Analysis (E 1245)
- 17.4 Grain Size
- 17.4.1 ASTM Test Methods for Determining Average Grain Size (E 112)
- 17.4.2 ASTM Test Methods for Estimating the Largest Grain Observed in a Metallographic Section (ALA Grain Size) (E 930)
- 17.4.3 ASTM Test Methods for Characterizing Duplex Grain Sizes (E 1181)
- 17.4.4 ASTM Test Methods for Determining Average Grain Size Using Semiautomatic and Automatic Image Analysis (E 1382)
- 17.5 Banding
- 17.5.1 ASTM Practice for Assessing the Degree of Banding or Orientation of Microstructures (E 1268)
- 17.6 Porosity in Thermal Spray Coatings
- 17.6.1 ASTM Test Methods for Determining Area Percentage Porosity in Thermal Sprayed Coatings (E 2109)
- 17.7 Decarburization—Case Depth—Coatings
- 17.7.1 Specimen Preparation
- 17.7.2 ASTM Test Methods for Estimating the Depth of Decarburization of Steel Specimens (E 1077)
- 17.7.3 Case Depth
- 17.7.4 ASTM Test Method for Measurement of Metal and Oxide Coating Thickness by Microscopical Examination of a Cross Section (B 487)
- 17.7.5 ASTM Test Methods for Thickness of Diffusion Coating (C 664)
- 17.8 Other ASTM Standards for Quantitative Materialography

18 AUTOMATIC IMAGE ANALYSIS

- 18.1 Introduction
- 18.2 Qualitative and Quantitative Metallography/Materialography
- 18.2.1 The Transition to Quantitative Standards
- 18.2.2 Structure, Stereology, and Statistics
- 18.3 Principles of Digital Imaging

- 18.3.1 What is Digital Image Analysis?
- 18.3.2 Image Acquisition
- 18.3.3 Image Digitization—Gray Scale
- 18.3.4 The Histogram
- 18.3.5 The Effects of Brightness and Contrast on Illumination Distribution
- 18.3.6 Image Processing and True Microstructure
- 18.3.7 Image Calibration
- 18.4 Image Measurement
 - 18.4.1 Manual Measurements (Operator Defines Points, Lines, or Areas)
 - 18.4.2 Automatic Measurements (Software is Adjusted to Define Objects)
- 18.5 Digital Imaging Applied to Quantitative Metallography
 - 18.5.1 Percent Area (Volume Fraction)
 - 18.5.2 Inclusion Rating
 - 18.5.3 Grain Size
 - 18.5.4 Degree of Banding
 - 18.5.5 Depth or Thickness Measurements
 - 18.5.6 Graphite in Iron Castings
- 18.6 Digital Imaging Technology
 - 18.6.1 Hardware
 - 18.6.2 Software
- 18.7 Digital Imaging System Implementation

19 DIGITAL IMAGE MANAGEMENT (ARCHIVING)

PART V: HARDNESS TESTING

20 INTRODUCTION

- 20.1 Indentation Hardness
- 20.2 ASTM Standards

21 STATIC HARDNESS TESTING PROCEDURES

- 21.1 Brinell Hardness Testing
 - 21.1.1 Calculations and Procedures
 - 21.1.2 Brinell Hardness Testers
- 21.2 Vickers Hardness Testing
 - 21.2.1 Calculations and Procedures
 - 21.2.2 Vickers Hardness Tester
- 21.3 Knoop Hardness Testing
 - 21.3.1 Calculations and Procedures
- 21.4 Rockwell Hardness Testing
 - 21.4.1 Calculations and Procedures
 - 21.4.2 Rockwell Hardness Tester
- 21.5 Microindentation Hardness
 - 21.5.1 Methods
 - 21.5.2 Specimen Preparation
 - 21.5.3 Taking the Measurements
 - 21.5.4 Microindentation Hardness Testers
 - 21.5.5 Examples of Indentations
- 21.6 Universal Hardness—Martens Hardness—Instrumented Indentation Testing—Nano Indentation
 - 21.6.1 Instrumented Indentation Testing—Nano Indentation
- 21.7 Precision of Hardness Values
- 21.8 Conversion of Hardness Values

22 DYNAMIC HARDNESS TESTING PROCEDURES

23 SPECIAL METHODS FOR HARDNESS TESTING

PART VI: THE METALLOGRAPHIC/MATERIALOGRAPHIC LABORATORY

24 INTRODUCTION

- 24.1 Establishing a Metallographic/Materialographic Laboratory
- 24.2 Running a Metallographic/Materialographic Laboratory
- 24.3 Occupational Safety and Health

25 HOW to BUILD a METALLOGRAPHIC/MATERIALOGRAPHIC LABORATORY

- 25.1 Purpose
 - 25.1.1 Quality Control (QC)
 - 25.1.2 Research and Education
 - 25.1.3 Testing and Inspection Laboratories—Failure Analysis
- 25.2 Rationalization and Automation
 - 25.2.1 Reproducibility—Standards—Occupational Safety
 - 25.2.2 Productivity—Cost Per Specimen
- 25.3 Planning the Metallographic/Materialographic Laboratory
 - 25.3.1 Basic Planning
 - 25.3.2 Detailed Planning
- 25.4 Equipment and Laboratory Layout
 - 25.4.1 Equipment—Table 25.1
 - 25.4.2 Layout—Furniture—Installations
- 25.5 Maintenance
 - 25.5.1 Organizing
 - 25.5.2 Cleaning
 - 25.5.3 Servicing

26 OCCUPATIONAL SAFETY AND HEALTH IN THE METALLOGRAPHIC/MATERIALOGRAPHIC LABORATORY

- 26.1 Dangers in the Metallographic/Materialographic Laboratory
 - 26.1.1 Sectioning
 - 26.1.2 Mounting
 - 26.1.3 Mechanical Preparation
 - 26.1.4 Electrolytic Polishing/Etching
 - 26.1.5 Etching—Etchants—Electrolytes
 - 26.1.6 Dust
 - 26.1.7 Cold (Castable) Mounting Resins
 - 26.1.8 Standard Guide on Metallographic Laboratory Safety (E 2014)
- 26.2 Safety Information
 - 26.2.1 Identification
 - 26.2.2 Material Safety Data Sheet (MSDS)
 - 26.2.3 Standard Operating Procedure (SOP)
 - 26.2.4 Job Safety Analysis (JSA)
- 26.3 Disposal of Chemicals
- 26.4 Occupational Safety in General
 - 26.4.1 Standards
 - 26.4.2 Training
 - 26.4.3 Maintenance and Service
- 26.5 Standards and Regulations—Organizations
 - 26.5.1 Designations and Abbreviations Used to Describe a Chemical Substance
 - 26.5.2 ASTM—ASTM Standards
 - 26.5.3 OSHA—OSHA Standards
 - 26.5.4 National Institute for Occupational Safety and Health (NIOSH)
 - 26.5.5 International Chemical Safety Cards (ICSCS)
 - 26.5.6 Environmental Protection Agency (EPA)
 - 26.5.7 National Technical Information Service (NTIS)
 - 26.5.8 American Conference of Government Industrial Hygienists (ACGIH)

- 26.5.9 National Toxicology Program (NTP)
- 26.5.10 Agency for Toxic Substance and Disease Registry (ATSDR)
- 26.5.11 National Fire Protection Association (NFPA)
- 26.5.12 National Paint and Coatings Association (NPCA)—HMIS
- 26.5.13 BSI—ISO
- 26.5.14 EU
- 26.6 Literature on Laboratory Safety
