Overview	ix
Introduction	xxv

FATIGUE IN FASTENERS

Effects of Nonuniformities in Fasteners on Localized Vibration and Fatigue— DARYOUSH ALLAEI	3
Introduction	3
Role of Fasteners in Localized Vibration	5
What Is Localized Vibration	6
Mathematical Model	9
General Receptance Formulation of the Interfaces	11
Special Features of the Proposed Approach	15
Tasks in Progress	16
Conclusions and Recommendations	17
Establishment of Fatigue Test Method for Turbine Blade Fastener—TADAYOSHI ENDO, YOSHIYUKI KONDO, AND YOSHIKI KADOYA	20
Introduction	20
Testing Apparatus	23
Test Procedure	25
Test Results	26
Conclusion	27
Review of Factors That Affect Fatigue Strength of Low-Alloy Steel Fasteners—GEORGE W. SKOCHKO AND THOMAS P. HERRMANN	32
Nomenclature	32
Introduction	32
Summary	33
The Database	33
Evaluation of Variables that Affect Fatigue Strength	35
Mean Stress Effects in Derivation of Fatigue Failure Curves	41

Conclusions	43
Appendix	44

FAILURE EVALUATION AND CRITERIA

The Regulatory Approach to Fastener Integrity in the Nuclear Industry— RICHARD E. JOHNSON AND JAMES A. DAVIS	51
Introduction	51
Regulatory Aspects of Fasteners	53
ASME Requirements for Fasteners	54
Nondestructive Examination Prior to Use	55
In-Service Inspection of Fasteners	57
Failure Criteria and Limiting States of Stress for Cracked Bolts/Studs—VAL KAGAN	60
Introduction	60
Applications	60
Prediction of Cyclic Strength and Life (Service Time)	62
Fracture Mechanics of Threaded Joints	65
Nonlinear Effects in Threaded Joints	72
Conclusion	80
The Effect of Grain Boundary Carbon on the Hydrogen-Assisted Intergranular Failure of Nickel-Copper Alloy K-500 Fastener Material— MARJORIE ANN E. NATISHAN AND WILLIAM C. PORR, JR.	81
Introduction	81
Procedure	83
Results and Discussion	86
Conclusions	91

FRACTURE MECHANICS IN FASTENERS

Stress Intensity Factors for Surface and Corner-Cracked Fastener Holes by the Weight Function Method—WEI ZHAO AND SATYA N. ATLURI	95
Introduction	95
Three-Dimensional Weight Function Method	96
Results and Discussion	99
Concluding Remarks	106
Stress Intensity Factor Approximations for Cracks Located at the Thread Root Region of Fasteners—RUSSELL C. CIPOLLA	108
Nomenclature	108
Introduction	109
Fracture Mechanics Applications for Fasteners	110
Model Representation of Thread Root	111
Stress Analysis Applicable to Thread Region	113

Weight Function for Edge-Crack in a Cylindrical Bar	115
Calculation of Stress Intensity Factors	119
Summary and Conclusions	124
Behavior of Fatigue Cracks in a Tension Bolt—ALAN F. LIU	126
Nomenclature	126
Introduction	126
Crack Geometry Consideration	127
Selection of Independent Variables	130
Analytically Determined Stress Intensity Factors	131
Empirically Determined Stress Intensity Factors	134
Conclusion	138
STRUCTURAL INTEGRITY CRITERIA FOR FASTENERS	
Early Stages of Fatigue Damage of Fastener Holes Monitored by Laser Speckle—FU-PEN CHIANG, MING-LIUNG DU, AND SHEN LI	143
Introduction	143
Specimen and Experiment	144
Evaluation of Spectrum Half Width and Cross Correlation	144
Results and Discussion	146
Conclusions	151
Development of Fracture Control Methodology for Threaded Fasteners in the Space Program—JULIE A. HENKENER, ATTIBELE R. SHAMALA, PAUL L. CARPER, ROYCE G. FORMAN, AND CHARLES L. SALKOWSKI	155
Introduction	155
Fracture Control Methodology	156
Nonfracture Critical Fasteners	156
Fracture Critical Fasteners	159
Nondestructive Evaluation of Threaded Fasteners	160
Summary	163
The Effect of a Tensile Load on the Ultimate Shear Capacity of a Fastener Shank—SEAN M. OLSON	166
Introduction	166
Experimental Procedure	167
Preliminary Experiments	170
Procedure	170
Results	171
Conclusions	173
Pitch Diameter Measurement of Threaded Gages Using a Coordinate Measuring Machine—RALPH VEALE, EDGAR ERBER, AND BRUCE BORCHARDT	175
Nomenclature	175
Introduction	176

Three-Wire Pitch Diameter Method	176
Coordinate Measuring Machines (CMMs)	178
External Thread Measurement Results	180
Internal Thread Measurement Results	183
Conclusion	185

Summary	187
