

STP 1471

Titanium, Niobium, Zirconium, and Tantalum for Medical and Surgical Applications

## TABLE OF CONTENTS

### ALLOY PROCESSING

Mechanical and Physical Properties of Titanium-12Molybdenum-6Zirconium-2Iron Beta Titanium Alloy

N. G. D. Murray and V. R. Jablokov, and H. L. Freese

Creation of Oxidized Zirconium Orthopaedic Implants

G. Hunter, J. Dickinson, B. Herb, and R. Graham

Metallurgical Attachment of a Porous Tantalum Foam to a Titanium Substrate for Orthopaedic Applications

D. J. Medlin, J. Scrafton, and R. Shetty

Influence of Oxygen Content on the Mechanical Properties of Titanium-35 Niobium-7Zirconium-5Tantalum Beta Titanium Alloy

V. R. Jablokov, N. G. D. Murray, H. J. Rack, and H. L. Freese

Effect of Aging Treatments on the Tensile Properties of Ti-35Nb-7Zr-5Ta-(0.06-0.7) O Alloys

J. I. Qazi, V. Tsakiris, B. Marquardt, and H. J. Rack

Beta Titanium Alloy Processed for High Strength Orthopaedic Applications

B. Marquardt and R. Shetty

The Application of Ti-15Mo Beta Titanium Alloy in High-Strength Structural Orthopaedic Applications

V. R. Jablokov, M. J. Nutt, M. E. Richelsoph, and H. L. Freese

### ALLOY PROPERTIES

Mechanical Properties of Cast Ti-Fe-O-N Alloys

M. Koike, Q. Guo, M. Brezner, H. Fujii, and T. Okabe

Effect of Surface Reaction Layer on Three-Point Flexure Bond Strength of Resin Composite to Cast Ti and Ti-6Al-7Nb

I. Watanabe, J. Liu, A. Saimoto, J. Griggs, and T. Okabe

Corrosion Resistance, Mechanical Properties, Fatigue Properties, and Tissue Response of Ti-15Zr-4Nb-4Ta Alloy

Y. Okazaki, and E. Gotoh

Super Elastic Functional  $\beta$  Titanium Alloy with Low Young's Modulus for Biomedical Applications

M. Niinomi, T. Akahori, Y. Hattori, K. Morikaw, T. Kasuga, H. Fukui,  
A. Suzuki, K. Kyo, and S. Niwa

Comparative Evaluations of Surface Characteristics of cp Titanium, Ti-6Al-4V and Ti-15Mo-2.8Nb-0.2Si (Timetal® 21SRx)

D. W. Petersen, J. E. Lemons, and Linda C. Lucas

Comparison of Stress Corrosion Cracking Characteristics of Cp Ti, Ti-6Al-7Nb Ti-6Al-4V and Ti-15Mo

R. S. Williamson, M. D. Roach, and L. D. Zardiackas

Comparison of the Corrosion Fatigue Characteristics of CP Ti-Grade 4, Ti-6Al-4V, Ti-6Al-7Nb, and Ti-15Mo

M. D. Roach, R. S. Williamson, and L. D. Zardiackas

Comparison of Stress Corrosion Cracking and Corrosion Fatigue (Anodized and Non-Anodized Grade 4 CP Ti)

L. D. Zardiackas, M.D. Roach, and R. S. Williamson

## **BIOLOGICAL AND CLINICAL EVALUATION**

Corrosion of Modular Titanium Alloy Stems in Cementless Hip Replacement

R. M. Urban, J. L. Gilbert, and J. J. Jacobs

Influence of Exposure Conditions on Bacterial Adhesion to Zirconium Alloys

E. A. Yamokoski, B. W. Buczynski, N. Stojilovic, J. W. Seabolt, L. Bloe, R. Foster, N. Zito, M. M. Kory, R. P. Steiner, R. D. Ramsier

A Methodology to Fabricate Titanium and Stainless Steel Wear Debris for Experimental Use: a Comparison of Size, Shape, and Chemistry

C. M. Sprecher, J. Kunze, B. Burian, N. Villinger, J. J. Jacobs, E. Schneider, and M. A. Wimmer,

Zirconium and Niobium Affect Human Osteoblasts, Fibroblasts and Lymphocytes in a Similar Manner to More Traditional Implant Alloy Metals

N. J. Hallab, S. Anderson, M. Caicedo, and J. J. Jacobs

Indexes
