

## **STP 1479**

# **Flammability and Sensitivity of Materials in Oxygen-Enriched Environments, 11<sup>th</sup> Volume**

## ***Table of Contents***

### **KEYNOTE PAPER**

A Metallurgist's Views on the Selection of Engineering Alloys for Applications Involving Oxygen-Enriched Atmospheres: Keynote Address—*R. Zawierucha*

### **IGNITION AND COMBUSTION OF NONMETALS**

Ignition of Combustion Modified Polyurethane Foam—*O. Putzeys, C.F. Pello, D. Urban*

Frictional Ignition Testing of Composite Materials—*S. Peralta, K. Rosales, J. Stoltzfus*

Pneumatic-Impact Ignition of Sebum Oil Film in High-Pressure Oxygen—*S. Tapia, S. Smith, F.Y. Hshieh, J. Stoltzfus*

The Oxygen Index of Surgical Drape Materials—*G. Serrao, M. Micou, G. Sidebotham, G. Wolf*

### **IGNITION AND COMBUSTION OF METALS**

Promoted Metals Combustion at Ambient and Elevated Temperatures—*C. Engel, S. Herald, S. Davis*

High Temperature Ignition of Metals in Oxygen—*M. Slockers, R. Robles-Culbreth*

Promoted Combustion Testing of Metals in High Pressure Oxygen by the Federal Institute for Materials Research and Testing (BAM)—*C. Binder, T. Kasch, T. Brock, U. Beck, M. Weise, M. Sahre*

Surface Ignition of Aluminum in Oxygen - *G. Chiffolleau, B. Newton, N. Holroyd, S. Havercroft*

Effect of Sample Geometry on Flammability for Carbon Steel Burned in Oxygen—*T. Suvorovs, N. Ward, T. Steinberg, R. Wilson*

### **OXYGEN COMPATIBILITY OF COMPONENTS AND SYSTEMS**

Combustion Tests under High Pressure Oxygen: Metals- vs. Component-Related Test Specifications—*C. Binder, T. Kasch, S. Lehne, U. Beck, M. Weise, M. Sahre*

Oxygen Compatibility Assessment on Components and Systems—*K. Rosales, M. Shoffstall, J. Stoltzfus*

Mechanical Impact of Aluminum Cylinders Pressurized with Oxygen—*G. Chiffolleau, B. Newton, N. Holroyd, S. Havercroft*

The Adiabatic Compression Test for Type-Approval of Components—History and Final Test Protocol—*H. Barthelemy*

## **ANALYSIS OF IGNITION AND COMBUSTION**

Flow Friction History and Research—*T. Gallus, J. Stoltzfus*

## **FAILURE ANALYSIS AND SAFETY**

Oxygen Fires in Aluminum Alloy Cylinders—*H. Barthelemy*

Ignition of a Composite Cylinder with Plastic Liner—*H. Barthelemy*

Fires in P-3 Aircraft Oxygen Systems—*J. Stoltzfus*

Review, Analysis and Hazard Mitigation of the Life-Support Oxygen System on Royal Australian Air Force P-3 Orion Spacecraft—*P. Hay, D. Burns, T. Steinberg*

Investigation of Oxygen-Acetylene Flashback Reactions in Welding Hoses—*B. Newton, G. Chiffolleau, D. Pryor, H. Beeson*

Analysis Tools Used to Evaluate Oxygen Hazards and the Oxygen Compatibility of Metals—*E. Forsyth, B. Newton, G. Chiffolleau*

## **AEROSPACE APPLICATIONS**

Electrical Arc Ignition Testing of Spacesuit Materials—*S. Smith, S. Tapia, E. Ball, H. Beeson*

Proficiency Testing for Evaluating Aerospace Materials Test Anomalies—*D. Hirsch, S. Motto, G. Peyton, H. Beeson*

Comparison of Carbon Dioxide and Helium as Fire Extinguishing Agents for Spacecraft—*Y. Son, G. Zouein, P. Ronney, S. Gokoglu*

An Investigation of Regression Rate of the Melting Interface for Iron Burning in Normal-Gravity and Reduced-Gravity—*N. Ward, T. Suvorovs, T. Steinberg*

Proactive Mitigation of PCTFE-Related Ignition Hazards in Oxygen Systems: I. Development of Voluntary Consensus Standard Specification to Control Property Variation in Finished PCTFE Parts—*J. Waller, H. Julien, H. Beeson, B. Newton*

Proactive Mitigation of PCTFE-Related Ignition Hazards in Oxygen Systems: II. Testing of Inventoried “At-Risk” PCTFE Parts and Hazards Analyses of Corresponding Ground Service Equipment at the Kennedy Space Center—*J. Waller, S. Smith, T. Gallus, F.-Y. Hshieh, H. Beeson, K. Murray, A. Staveland, P. Faughnan, D. Tyre*

## **MISCELLANEOUS**

Filtration of Gaseous or Liquid Oxygen in Industrial Applications—*A. Colson, E. Fano*

ASTM G175 Interlaboratory Study on Forced Ignition Testing—*S. Smith, J. Stoltzfus*

Mechanical Impact Testing – A Statistical Measurement—*C. Engel, S. Herald, S. Davis*

Materials Compatibility with Nitrogen Trifluoride (NF<sub>3</sub>)—*B. Newton, G. Chiffolleau*

Promoted Ignition of a Cylinder Valve in NF<sub>3</sub>—*G. Chiffolleau, B. Newton, T. Chou, B. Wilson*
