

STP 1484

Performance and Durability of the Window–Wall Interface

Stock #: STP1484

Table of Contents

Materials

Water Resistance and Durability of Weather-Resistive Barriers—*T.A. Weston, X. Pascual, K. Boone*

Water Resistance and Vapor Permeance of Weather Resistive Barriers—*T. Butt*

Adhesive Characterization Durability of Self-Adhered—*J.D. Katsaros*

Installation

Designing and Specifying Self-Adhering Flashings for the Window-Wall Interface—*R. Bateman*

Effect of Installation Details on the Condensation Performance of Window Frames—*R.J. Kudder, S.K. Babich, D.K. Johnson*

Comparison of Window Flashing Interface Materials and Installation Practices in the Northwest, Compared to ASTM E2112, Current Acceptance Criteria and Evaluation Reports—*D.S. Ackerman*

The Importance of Integrating Flashing and the Weather Resistive Barrier in the Exterior Wall Systems of Residential Buildings—*L. Dorin*

Evaluation and Testing

Durability Testing of Polyurethane Foam Sealant in the Window-Wall Interface—*R. Braun, J. Garcia*

Performance Testing of Flashing Installation Methods for Brick Mold and Non-Flanged Windows—*B.J. Crowder-Moore, T.A. Weston, J.D. Katsaros*

A Review of Climate Loads Relevant to Assessing the Watertightness Performance of Walls, Windows, and Wall-Window—*M.A. Lacasse, S.M. Cornick*
