

STP 1502

Small Specimen Test Techniques: 5th Volume

Table of Contents

Specimen Size Limitations in J-R Curve Testing – Standards vs. Reality—*K. Wallin*

Miniature Compact Tension Specimens for Upper Shelf Fracture Toughness Measurements on RPV Steels—*E. Lucon, M. Scibetta*

Using Subsize Impact Bend Specimens for Estimation of Irradiation and Re-Irradiation Embrittlement of VVER RPV Steels—*Y. Nikolaev*

Towards Crack Arrest Testing Using Miniature Specimen—*M. Scibetta, E. Lucon, E. van Walle, R. Link*

Application of Subsize Specimens for Re-Irradiation Embrittlement Monitoring of the First Generation of VVER-440 RPV Steels—*Y.I. Shtrombakh, Y.A. Nikolaev*

Application of Digital Marker Extensometry to Determine the True Stress-Strain Behavior of Irradiated Metals and Alloys—*F. Garner, O.P. Maksimkin, M.N. Gusev, I.S. Osipov*

Crack Arrest Testing Using Subsize Specimens—*J. Joyce, R. Link, C. Roe*

Fracture Toughness Evaluation of Eurofer 97 by Testing Small Specimens—*M. Serrano, P. Fernández, J. Lapeña*

Effect of Ta Rich Inclusions and Microstructure Change During Pre-Cracking on Bimodal Fracture of Reduced-Activation Ferritic/Martensitic Steels Observed in Transition Range—*H. Tanigawa, K. Shiba, M. Sokolov, R. Klueh, A. Sawahata, M. Enomoto*

Application of Subsize Specimens for Irradiation Embrittlement Monitoring of VVER-440/213 RPV Steels—*Y.A. Nikolaev, Y.I. Strombakh*

Specimen Size Effects on Creep-Fatigue Properties of Reduced Activation Ferritic/Martensitic (F82H) Steel—*S.-W. Kim, D.-H. Kim, A. Koyama, Tanigawa*

Use of KLST-type Miniature Charpy Specimens for Measuring Dynamic Fracture Toughness under Impact Loading Rates—*E. Lucon, M. Scibetta*

An Engineering Method to Estimate Transferable Fracture Toughness from Charpy-Type Tests—*H.-J. Schindler, D. Kalkhof, P. Tipping,*

Small Punch Surveillance of Zircaloy-4 Welds Fracture Behaviour—*D.G. Carr, T. Wei, H. Li, R.P. Harrison*

Application of the Small-Punch-Test to Irradiated Reactor Vessel Steels in the Brittle-Ductile Transition Region—*T. Linse, M. Kuna, J. Schuhknecht, H.W. Viehrig*

Fatigue Properties Evaluation Using Cyclic Ball Indentation Testing—*R. Prakash, P. Bhokardole, C.S. Shin*
