

STP 1518

Contaminated Sediments: Sustainable Management and Remediation

Table of Contents

Site Characterization and Contaminant Transport

Development and Application of an Analytical Method for the Determination of Partition Coefficients of Tributyltin in the Forth and Clyde Canal, Glasgow, Scotland—*S. Bangkedphol, H.E. Keenan, S. Davidson, A. Sakultantimetha, M. Dyer, A. Songsasen*

Determination of Spatial and Seasonal Distribution of Surface Sediment Contamination in an Irish River and Estuarine System—*C.J. Buggy, J. Tobin*

Chemical Speciation and Heavy Metal Mobility in Contaminated Marine Sediments—*J. Damikouka, A. Katsiri*

Polychlorinated Biphenyl Transport from Consolidation of Contaminated Sediments During In Situ Capping—*J. Lenhart, J. Lee, Y. Hwang, P. Fox*

Effect of Contaminated Suspended Solids on Water and Sediment Qualities and Their Treatment—*T. Inoue, C. Mulligan, E. Zadeh, M. Fukue*

Distribution and correlation of Tributyltin and organic matter in sediments of Hakata Bay, Japan—*M. Ohtsubo, T. Higashi, M. Kanayama, S. Inoue, Y. Oshima*

Speciation and Mobility Assessment of Heavy Metals in Coastal MSW Incinerator Ash Landfill—*T. Inui, Y. Oya, H. Plata, T. Katsumi, M. Kamon*

Dioxin Assessment in a River Floodplain: Soil and Sediment Contamination—*J. Vanhouten*

Risk Management, Ecotoxicology and Quality Assessment Models

A New Approach to Sustainable Canal Sediment Management in Scotland—*O. Lassiere, N. Smith, J. Johnstone, A. Hamilton*

Verification of Site Cleanup Using a Dual-Equilibrium Desorption Model—*C. Manhart, R. Chaney, C. Watt, S. Slonim*

Sediment Trend Analysis in Support of Unexploded Explosive Ordinance Risk Assessment—*P. McLaren, M. Braid*

Treatment of Salted Road Runoffs using *Typha Latifolia*, *Spergularia Canadensis*, and *Atriplex Patula*: a Comparison of their Salt Removal Potential—*B. Morteau, G. Triffault-Bouchet, R. Galvez, L. Martel, S. Leroueil*

Evaluating Management Options for the Disposal of Dredged Sediments—*M. Pantazidou, A. Katsiri, K. Reddy*

Ecotoxicological Assessment of an In-Lake Remediation Method—*G. Soumis-Dugas, G. Triffaut-Bouchet, R. Galvez, L. Martel*

Innovative Remediation Technologies and Processes

Contaminated Sediment Management by Capping and Deep Water Confined Aquatic Disposal in the Harbour of Oslo—*G. Breedveld, A. Pettersen, A. Oen, E. Eek, G. Cornelissen, A. Kibsgaard, A. Hauge, T. Jorgensen, K. Jensen*

Experimental Studies on Coupled Treatment of Chromite Ore Processing Residue—*M. Chrysochoou, D. Dermatas, C. Christodoulatos*

Factors Affecting Electrokinetic Remediation of Mercury—from Contaminated Tailing Dam Sediments—*A. Darban., B. Ayati, R. Yong, A. Khodadadi, A. Kiayee*

Natural Attenuation of Endocrine Disrupting Chemicals in On-Site Domestic Wastewater Treatment Systems—*L. Gill, B. Misstear, P. Johnston, N. O’Luanaigh*

Effects of Amendment Materials on Cement-Solidified Contaminated Marine Sediments—Mechanical Stability and Leaching of Heavy Metals—*M. Kvennaas, M. Sparrevik, R. Grini*

Remediation of Harbour Sediments Contaminated by PAH and Metals—*V. Pastore, N. Nosari, G. Geddo*

Isolation of Tributyltin-Degrading Bacteria *Citrobacter Braakii* and *Enterobacter Cloacae* from Butyltin-Polluted Sediment—*A. Sakultantimetha, H. Keenan, M. Dyer, T. Beattie, S. Bangkedphol, A. Songsasen*

Long-Term Properties of Airfoam-Treated Lightweight Soil Made from Dredged Clay—*Y. Watabe, M. Tanaka, H. Saegusa, H. Shinsha, T. Tsuchida*

An Innovative Solution For Managing Waterworks Sludge: Developing an Alum Sludge-Based Multi-Stage Constructed Wetland System for Wastewater Treatment—*Y. Zhao, A. Babatunde, X. Zhao*
