

# ENGINE COOLANT TESTING: STATE OF THE ART

A symposium  
sponsored by ASTM  
Committee D-15 on  
Engine Coolants  
AMERICAN SOCIETY FOR  
TESTING AND MATERIALS  
Atlanta, Ga., 9-11 April 1979

ASTM SPECIAL TECHNICAL PUBLICATION 705  
W. H. Ailor  
Reynolds Metals Company  
editor

List price \$32.50  
04-705000-12

AMERICAN SOCIETY FOR TESTING AND MATERIALS  
1916 Race Street, Philadelphia, Pa. 19103

# Contents

<b>Introduction</b>	1
<b>Automotive Engine Coolants: A Review of Their Requirements and Methods of Evaluation—L. C. ROWE</b>	3
<b>Experience of the British Standards Institution in the Field of Engine Coolants—A. D. MERCER</b>	24
Discussion	38
<b>Automotive Coolants in Europe: Technical Requirements and Testing—PETER BERCHTOLD</b>	42
Discussion	51
<b>Laboratory Research in the Development and Testing of Inhibited Coolants in Boiling Heat-Transfer Conditions—A. D. MERCER</b>	53
Discussion	78
<b>Simulated Service Tests for Evaluation of Engine Coolants—ROBERT SCHULMEISTER AND HELMUT SPECKHARDT</b>	81
Discussion	100
<b>Research and Development Efforts in Military Antifreeze Formulations—J. H. CONLEY AND R. G. JAMISON</b>	102
Discussion	108
<b>Corrosion Testing of Furnace and Vacuum Brazed Aluminum Radiators—KAZUHIDE NARUKI AND YOSHIHARU HASEGAWA</b>	109
Discussion	131
<b>Use of Electrochemical Techniques for Corrosion Testing of Antifreezes—E. F. O'BRIEN, S. T. HIROZAWA, AND J. C. WILSON</b>	133
Discussion	145
<b>Chemical Properties as a Tool for Maintaining High-Quality Engine Antifreeze Coolants in the Marketplace—T. P. YATES AND MARYLOU SIANO</b>	146
Discussion	154
<b>How Good is the ASTM Simulated Service Corrosion Testing of Engine Coolants?—J. V. CHOINSKI AND J. F. MAXWELL</b>	156
Discussion	165

<b>Detecting Coolant Corrosivity with Electrochemical Sensors—</b>	
ROBERT BABOIAN AND G. S. HAYNES	169
Discussion	187
<b>Static Vehicle Corrosion Test Method and Its Significance in Engine Coolant Evaluations for Aluminum Heat Exchangers—</b>	
K. H. PARK	190
Discussion	206
<b>Evaluating the Corrosion Resistance of Aluminum Heat Exchanger Materials—R. C. DORWARD</b>	208
Discussion	219
<b>Statistical Treatment of Laboratory Data for ASTM D 1384-70 Using Soft Solder—W. A. MITCHELL</b>	220
Discussion	231
<b>Refinement of the Vibratory Cavitation Erosion Test for the Screening of Diesel Cooling System Corrosion Inhibitors—</b>	
R. D. HUDGENS, D. P. CARVER, R. D. HERCAMP, AND J. LAUTERBACK	233
Discussion	266
<b>Electrochemical Corrosion of an Aluminum Alloy in Cavitating Ethylene Glycol Solutions—R. L. CHANCE</b>	270
Discussion	281
<b>Cavitation Corrosion—B. D. OAKES</b>	284
Discussion	292
<b>Evaluation of a Novel Engine Coolant Based on Ethanediol Developed to Replace AL-3 (NATO S735) as the Automotive Antifreeze Used by the British Army—E. W. BEALE, BRIAN BEDFORD, AND M. J. SIMS</b>	295
Discussion	307
<b>Cooling System Corrosion in Relation to Design and Materials—</b>	
E. BEYNON, N. R. COOPER, AND H. J. HANNIGAN	310
Discussion	325
<b>Testing of Solder for Corrosion by Engine Coolants—R. E. BEAL</b>	327
Discussion	354
<b>Summary</b>	356
<b>Index</b>	361
