

TRANSPORT FUELS TECHNOLOGY

FROM WELL TO WHEELS, WINGS AND WATER

Eric M GOODGER

BSc(Eng)Hons, MSc(Eng), PhD
CEng, CPEng, MIMechE, FInstE, FInstPet, MRAeS, MIEAust
Consultant in Fuel Technology Training

Sometime

Senior Lecturer at Cranfield University, UK

and

Professor of Mechanical Engineering, University of Newcastle, NSW
Australia

With a final chapter contributed by

PROFESSOR John E ALLEN

BSc(Eng), CEng, DNEC(Hons), FRAeS, FIMechE, AFAIAA, FRSA, FBIS, MWS

Consultant

Sometime

Chief Future Projects Engineer, British Aerospace

LANDFALL PRESS

Norwich

Supported by

THE INSTITUTE
OF PETROLEUM

Page			
XIII	Introduction		
XIV	Executive Summary		
XVII	Units		
1	Chapter a . Hydrocarbon Chemistry		
Page			
2	A1 Fundamentals		
4	A2 Polarity		
4	A3 The Hydrocarbon Molecules		
7	A3.1 The Alkanes (Paraffins) C_aH_{2a+2}		
9	A3.2 The Alkenes (Olefins) C_aH_{2a}		
9	A3.3 The Alkynes (Acetylenes) C_aH_{2a-2}		
10	A3.4 The Cycloalkanes or Cyclanes (Naphthenes or Cycloparaffins) $(CH_2)_a$		
10	A3.5 The Aromatics		
12	A4 General Properties of Hydrocarbons		
13	A5 Thermochemistry		
15	A5.1 Enthalpy of Formation		
17	A5.2 Enthalpy of Reaction		
18	A6 Bibliography (Chronological)		
18	A7 Chapter A Index		
21	Chapter b . Engineering Thermodynamics		
Page			
22	B1 Introduction		
22	B2 Thermodynamic Systems		
22	B3 Thermodynamic Properties		
23	B4 Energy Transfers		
24	B5 Thermodynamic Processes		
26	B6 Process Applications		
26	B6.1 Positive Displacement Compression and Expansion (Reciprocating and Rotary)		
27	B6.2 Ducted Flow Compression and Expansion (Fixed and Rotary)		
27	B6.3 Heat Exchange		
27	B6.4 Heat Release		
28	B7 Thermodynamic Cycles		
29	B8 Cyclic Applications		
31	B8.1 Piston Engine Performance		
34	B8.2 Gas Turbine Engine Performance		
34	B8.3 Ramjet and Rocket Engine Performance		
35	B9 Steam, and Engine Performance		
37	B9.1 The Piston-Type Steam Engine		
39	B9.2 The Steam Turbine		
39	B10 Bibliography (Alphabetical)		
39	B11 Chapter B Index		
43	Chapter c . Combustion Principles		
Page			
44	C1 Stoichiometry		
46	C1.1 Dissociation		
47	C2 Flammability		
47	C2.1 Flammable Range		
48	C2.1.1 Atmospheric Dilution and Oxygenation		
49	C2.2 Flame Velocity		
50	C3 Ignitability		
51	C3.1 Point Source Ignition		
51	C3.2 Surface Ignition		
53	C3.3 Spontaneous Ignition		
54	C4 Calorific Values		
55	C5 Maximum Reaction Temperature		
58	C6 Bibliography (Alphabetical)		
58	C7 Chapter C Index		
59	Chapter d . Conventional Fuels		
Page			
60	D1 Fossil Fuels		
60	D1.1 Conventional Gaseous Fuels		
61	D1.2 Conventional Liquid Fuels		
64	D1.3 Conventional Solid Fuels		
66	D2 Manufacture of Transport Fuels		
67	D3 Storage and Distribution of Transport Fuels		
67	D3.1 Bulk Storage		
69	D3.2 The Distribution Chain		
70	D3.3 In-Vehicle Storage		
71	D4 General Properties of Transport Fuels		
72	D5 Handling Properties of Transport Fuels		
72	D5.1 Composition		
73	D5.1.1 Components		
74	D5.1.2 Contaminants		
76	D5.1.3 Fuel-Handling Additives		
76	D5.1.4 Colour		
76	D5.2 Density		
77	D5.3 Volatility		
78	D5.4 Fluidity		
78	D5.4.1 Viscosity		
79	D5.4.2 Fuel Solidification		
80	D5.5 Lubricity		
81	D5.6 Stability		
83	D5.7 Electrical Conductivity		
84	D5.8 Water Contamination		
85	D6 Combustion Properties of Conventional Fuels		
85	D6.1 Ignitability		
86	D6.2 Calorific Values		
87	D6.3 Smoke		
88	D7 Quality Control		
88	D7.1 Physical Control		
90	D7.2 Administrative Control		
91	D8 Bibliography (Fuel density order, then alphabetical)		
91	D9 Chapter D Index		
95	Chapter e . Combustion Performance		
Page			
95	E1 Normal Combustion in Piston Engines		
96	E2 Abnormal Combustion in Piston Engines		
96	E2.1 Spark Knock		
98	E2.2 Preignition and Run-On		
99	E2.3 Diesel Knock		
99	E3 Continuous-Flow Combustion		
99	E3.1 Combustion in Gas Turbine Engines		
105	E3.1.1 Problems in Aero Gas Turbine Combustion		
106	E3.1.2 Problems in Industrial Gas Turbine Combustion		

Chapter e . Combustion Performance

Page	
107	E3.2 Combustion in Ramjet Engines,
109	E3.3 Combustion in Rocket Engines
113	E3.4 Combustion in Steam-Raising Boilers
115	E4 Fuel-Combustion Additives
115	E5 Emissions
116	E5.1 Vehicle Evaporative Emissions
116	E5.2 Piston Engine Emissions
121	E5.3 Jet Engine Emissions
125	E6 Bibliography (Alphabetical)
126	E7 Chapter E Index

Chapter f . Alternative Fuels

Page	
130	F1 Short-term Developments in Conventional Fuels
132	F2 Medium-Term Supplemental Fuels
133	F3 Long-Term Substitute Fuels
134	F4 Manufacture of Alternative Fuels
134	F4.1 Supplemental Fuels
136	F4.2 Substitute Fuels
137	F4.2.1 Oxygenates
137	F4.2.2 Nitrogen Compounds
138	F4.2.3 Hydrogen
139	F4.2.4 Biofuels
140	F5 Comparative Properties of Alternative and Conventional Fuels
141	F5.1 Density
141	F5.2 Volatility
142	F5.3 Fluidity
142	F5.4 Stoichiometry
144	F5.5 Flammability
144	F5.6 Ignitability
144	F5.7 Calorific Values
145	F5.8 Maximum Reaction Temperatures
146	F6 Performance of Alternative Fuels
146	F6.1 LNG, LPG and CNG
147	F6.2 Oxygenates
149	F6.3 Nitrogen Compounds
150	F6.4 Hydrogen
152	F6.5 Biofuels
152	F7 Bibliography (Alphabetical)
152	F8 Chapter F Index

Chapter g . Overview & Forecasts

Page	
155	G1 Conventional Fuels for Light Road Transport
158	G2 Conventional Racing Fuels
160	G3 Conventional Fuels for Aerospace
167	G4 Conventional Fuels for Fleet Operators and Rail Transport
168	G5 Conventional Marine Fuels
171	G6 Alternative Fuel Prospects
175	G7 Hybrid Piston Engines
177	G8 Other Propulsive Innovations
177	G8.1 Further Heat Engine Development
180	G8.2 Direct Conversion to Electricity
181	G8.2.1 Fuel Cell Theory
182	G8.2.2 Fuel Cell Practice

186	G8.3 Electrical Propulsion
187	G8.3.1 Continuous External Supply
190	G8.3.2 In-Vehicle Storage
193	G8.3.3 Hybrid Vehicles
194	G8.4 Aerodynamic Forces
196	G8.5 Antimatter and Negative Matter
198	G9 Bibliography (Alphabetical)
198	G10 Chapter G Index

Chapter h . Global Issues Affecting Transport

Page	
204	H1 Period 2000 - 2020
205	H2 Period 2020 - 2060
206	H3 Period 2060 - 2100
207	H4 Finite World Effects
209	H5 Breakthroughs
211	H6 Non-Vehicular Traffic and Other Issues
215	H7 Conclusion
215	H8 Bibliography
216	H9 Chapter H Index

Appendices a . Hydrocarbon Chemistry

Page	
219	AA1 Isotopes
220	AA2 Polarity
222	AA3 Derivation of the Bond Angle of Methane
222	AA4 Bonding Orbitals and Resonance
224	AA5 Spatial Dispositions of Bonds
225	AA6 Isomerism
225	AA6.1 HC Compounds
225	AA6.1.1 Chain Isomerism
229	AA6.1.2 Positional Isomerism
229	AA6.1.3 Geometrical Isomerism
229	AA6.1.4 Conformational Isomerism
229	AA6.2 HCX Compounds
229	AA6.2.1 Functional Group Isomerism
229	AA6.2.2 Tautomerism
229	AA6.2.3 Metamerism
229	AA6.2.4 Optical Isomerism
231	AA7 Polyenes
231	AA8 The Structure of the Benzene Ring and Carbon Allotropes
234	AA9 Laboratory Determination of Organic Molecular Structure
234	AA9.1 Qualitative Analysis
234	AA9.2 Quantitative Analysis
235	AA9.3 Empirical Formula Assessment
235	AA9.4 Molecular Formula Assessment
236	AA9.5 Structural Formula Assessment
236	AA9.5.1 Mass Spectroscopy
236	AA9.5.2 Gas-Liquid Chromatography
237	AA9.5.3 Infrared Spectroscopy
237	AA9.5.4 Nuclear Magnetic Resonance Spectroscopy

237 **AA10** The Ternary System Diagram
 238 **AA11** Hydrocarbon Reactions with Inorganic Elements
 239 **AA12** Nuclear Reactions

241 *Appendices* **b** **Engineering Thermodynamics**

Page	
241	AB1 Energy Forms
243	AB2 Empirical and Thermodynamic Temperatures
245	AB3 Equation of State for Ideal Gas
247	AB4 Temperature Relationships in Ideal Gas
249	AB5 Work Transfer
250	AB6 Heat Transfer
251	AB7 Entropy
252	AB8 Thermodynamic Laws, and Energy Equations
256	AB9 Exergy
258	AB10 Energy Distribution and Entropy Changes in Reversible Processes
258	AB10.1 Energy Distribution
260	AB10.2 Entropy Changes
261	AB11 Work Processes by Positive Displacement
265	AB12 Energy Interchange Processes in Fixed Ducts
266	AB13 Work Processes in Rotary Ducts
268	AB13.1 Rotary Duct Compression
270	AB13.2 Rotary Duct Expansion
272	AB14 Heat Exchange Processes
273	AB15 Performance of the Carnot Cycle
276	AB16 Performance of Aero Engines
279	AB17 Performance of the Rankine Cycle

283 *Appendices* **C** **Combustion Principles**

Page	
283	AC1 Composition of Atmospheric Air
284	AC2 Dissociation
287	AC3 Activation Energy
288	AC4 Calculation of Maximum Reaction Temperature

291 *Appendices* **d** **Conventional Fuels**

Page	
291	AD1 The Spelling of KEROSENE
292	AD2 Fuel Source Components and Contaminants
294	AD3 Manufacture of Transport Fuels
294	AD3.1 Liquefaction of Natural Gas
294	AD3.2 Petroleum Products
295	AD3.2.1 The Hydroskimming Refinery
298	AD3.2.2 The Conversion Refinery
301	AD3.2.3 Finishing Treatment
302	AD3.3 Solid Fuel Preparation
303	AD4 Test Methods for Transport Fuels
304	AD4.1 Composition Measurement
304	AD4.1.1 Components
305	AD4.1.2 Contaminants
307	AD4.1.3 Additives
308	AD4.1.4 Colour
308	AD4.2 Density Measurement

311	AD4.3 Volatility Measurement
311	AD4.3.1 Distillation
312	AD4.3.2 Vapour Pressure and <i>V/L</i> Ratio
314	AD4.3.3 Flash Point
315	AD4.4 Fluidity Assessment
315	AD4.4.1 Viscosity
316	AD4.4.2 Fuel Solidification
317	AD4.5 Lubricity Measurement
318	AD4.6 Fuel Stability Assessment
318	AD4.6.1 Oxidation Stability
319	AD4.6.2 Thermal Stability
320	AD4.7 Electrical Conductivity Measurement
321	AD4.8 Water Characteristics Assessment
321	AD4.8.1 Water Determination in Samples
321	AD4.8.2 Water Reaction
322	AD4.8.3 Water Separation
322	AD4.8.4 Water Detection in Tanks
322	AD4.9 Ignitability Measurement
323	AD4.10 Calorific Value Measurement
325	AD4.11 Smoke Assessment
326	AD4.12 Solid Fuel Tests
326	AD5 Additives for Liquid Fuel Handling
326	AD5.1 Additives Applicable to Fuel Distribution Systems
327	AD5.1.1 Demulsifiers and Dehazers
328	AD5.1.2 Dyes and Markers
328	AD5.1.3 Pipeline Drag Reducers
328	AD5.1.4 Stabilisers
329	AD5.1.5 Static Dissipators
330	AD5.2 Additives Applicable to Vehicle Fuel Systems
330	AD5.2.1 Anti-Foaming Additives
330	AD5.2.2 Anti-Icing Additives
331	AD5.2.3 Fuel Metering Detergents
331	AD5.2.4 Flow Improvers
332	AD5.2.5 Fuel Distribution Improvers
332	AD5.2.6 Odour Masks
332	AD5.2.7 Lubricity Improvers
333	AD5.3 Additives Applicable to Both Distribution and Vehicle Fuel Systems
333	AD5.3.1 Anti-Oxidants
334	AD5.3.2 Biocides
335	AD5.3.3 Corrosion Inhibitors
336	AD5.3.4 Metal Deactivating Agents
336	AD6 The Filter/Separator
338	AD7 Inter-Grade Contamination
339	AD8 Fuel Quality Control Documentation in Aviation

343 *Appendices* **e** **Combustion Performance**

Page	
343	AE1 Rating of Piston Engine Combustion Phenomena
343	AE1.1 Spark Knock

Appendices e Combustion Performance

Page

348	AE1.2 Preignition
348	AE1.3 Diesel Knock
350	AE2 Gas Turbine Combustion Efficiency
351	AE3 Boron as a Fuel Element
352	AE4 Derivation of Specific Impulse
355	AE5 Rocket Reactants Performance Testing
357	AE6 Fuel-Combustion Additives
357	AE6.1 Anti-Knock Additives
359	AE6.2 Anti-ORI Additives
359	AE6.3 Anti-Preignition Additives
360	AE6.4 Anti-Valve-Seat Recession Additives
361	AE6.5 Cetane Improvers
361	AE6.6 Combustion Improvers
361	AE6.7 Gasoline Injector/Valve Detergents
362	AE6.8 Diesel Injector Detergents
362	AE6.9 Spark-Aider Additives
362	AE6.10 Water
365	Appendices f Alternative Fuels
Page	
365	AF1 Suggested Classification of Alternative Fuels
365	AF1.1 Alternative Forms of Conventional Fuels
366	AF1.2 Alternative Applications of Conventional fuels
367	AF1.3 Simulated Fuels
367	AF1.4 Hybrid Fuels
367	AF1.5 Cofeedstock Fuels
367	AF1.6 Supplemental Fuels
368	AF1.7 Elemental Synthesis Fuels
368	AF1.8 Substitute Fuels
369	AF2 Manufacture of Supplemental Fuels
369	AF2.1 Supplemental Natural Gas (SNG)
369	AF2.1.1 Catalytic Steam Reforming of Light Hydrocarbons
370	AF2.1.2 Hydrogasification of Middle Distillates and Light Residues
370	AF2.1.3 Partial Oxidation of Residual Oils and Coal
370	AF2.2 Supplemental Liquid Fuels
371	AF2.2.1 Hydrocarbonisation of Coal
372	AF2.2.2 Indirect Hydrogenation of Coal
372	AF2.2.3 Direct Hydrogenation of Coal
373	AF3 Manufacture of Substitute Fuels
375	AF4 General Properties of Substitute Fuels
377	AF5 Health Factors in Handling Transport Fuels

Appendices g . Overview & Forecasts

Page

379	AG1 Aviation Fuels at Altitude
380	AG1.1 Low Pressure Problems
381	AG1.2 Low Temperature Problems
381	AG1.3 High Temperature Problems
382	AG1.4 Flammability
386	AG2 Propulsion in Deep Space
386	AG2.1 Nuclear Propulsion in Space
388	AG2.2 Electric Propulsion in Space
389	AG3 Fuel Cell History
390	AG4 Further Discussion of Fuel Cell Theory
394	AG5 Reactions at Fuel Cell Electrodes

Appendices h . Global Issues Affecting Transport

Page

397	AH1 Volterra-Lotka Analysis
396	AH1.1 The Logistic Function and Substitution Dynamics
397	AH1.2 Simplified Analytical Treatment
399	Tailpiece
400	Glossary
