

Cement, Concrete, and Aggregates

Subject Index

Volume 18, 1996

A-B

Absorption

Monitoring the influence of water and ionic ingress on cover-zone concrete subjected to repeated absorption (McCarter, WJ), June, 55

Aggregate evaluation

Alkali limits for prevention of alkali-silica reaction: a brief review of their development (Hill, ED), June, 3

Air entrainment

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part II—Experimental results (Pleau, R, Pigeon, M, Laurencot, JL, and Gagne, R), June, 30

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method (Pleau, R and Pigeon, M), June, 19

Air voids

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method (Pleau, R and Pigeon, M), June, 19

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part II—Experimental results (Pleau, R, Pigeon, M, Laurencot, JL, and Gagne, R), June, 30

Alkali limits

Alkali limits for prevention of alkali-silica reaction: a brief review of their development (Hill, ED), June, 3

Alkali silica reaction

Alkali limits for prevention of alkali-silica reaction: a brief review of their development (Hill, ED), June, 3

Blast furnace slag cements

Selectivity of alkaline activators for the activation of slags (Shi, C and Day, RL), June, 8

Break-off test

Break-off test for high-strength concrete, (Di Maio, A, Giaccio, G, and Zerbino, R), June, 15

C-D

Cement paste

Tensile and compressive strength of silica fume-cement pastes and mortars (Tou-tanji, HA and El-Korchi, T), Dec., 78

Cementitious composites

Tensile and compressive strength of silica fume-cement pastes and mortars (Tou-tanji, HA and El-Korchi, T), Dec., 78

Compressive strength

Mechanical properties of normal to high-strength steel fiber-reinforced concrete (Khaloo, AR and Kim, N), Dec., 92

Performance and correlation of the properties of fly ash cement concrete, (Al-Amoudi, OSB, Maslehuddin, M, and Asi, IM), Dec., 71 Break-off test for high-strength concrete, (Di Maio, A, Giaccio, G, and Zerbino, R), June, 15

Corrosion

Durability of reinforced lightweight mortars with corrosion inhibitors, (Batis, G, Kouloumbi, N, and Katsiamboulas, A), Dec., 117

Cover region

Monitoring the influence of water and ionic ingress on cover-zone concrete subjected to repeated absorption (McCarter, WJ), June, 55

Curing temperature

Improving initial strength of a concrete made with Type 20M cement (Kessal, M, Nkinamubanzi, P-C, Tagnit-Hamou, A, and Aitcin, P-C), June, 49

Deicing

Precision of tests for assessment of the deicer salt scaling resistance of concrete, (Marchand, J, Pleau, R, and Pigeon, M), Dec., 85

Durability

Monitoring the influence of water and ionic ingress on cover-zone concrete subjected to repeated absorption (McCarter, WJ), June, 55

E-F

Electrical conductivity

Monitoring the influence of water and ionic ingress on cover-zone concrete sub-

jected to repeated absorption (McCarter, WJ), June, 55

Factorial design

Improving initial strength of a concrete made with Type 20M cement (Kessal, M, Nkinamubanzi, P-C, Tagnit-Hamou, A, and Aitcin, P-C), June, 49

Fiber-reinforced

Mechanical properties of normal to high-strength steel fiber-reinforced concrete (Khaloo, AR and Kim, N), Dec., 92

Flow

Factors influencing flow and strength of standard mortars and reappraisal of ASTM test methods for fly ash (Helmut, R), Dec., 98

Flow length

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method (Pleau, R and Pigeon, M), June, 19

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part II—Experimental results (Pleau, R, Pigeon, M, Laurencot, JL, and Gagne, R), June, 30

Fly ash

Performance and correlation of the properties of fly ash cement concrete, (Al-Amoudi, OSB, Maslehuddin, M, and Asi, IM), Dec., 71

Factors influencing flow and strength of standard mortars and reappraisal of ASTM test methods for fly ash (Helmut, R), Dec., 98

Freeze-thaw tests

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part I—Description of the test method (Pleau, R and Pigeon, M), June, 19

Use of the flow length concept to assess the efficiency of air entrainment with regards to frost durability: Part II—Experimental results (Pleau, R, Pigeon, M, Laurencot, JL, and Gagne, R), June, 30

H**High-strength concrete**

Break-off test for high-strength concrete, (Di Maio, A, Giaccio, G, and Zerbino, R), June, 15

High-performance concrete

Improving initial strength of a concrete made with Type 20M cement (Kessal, M, Nkinamubanzi, P-C, Tagnit-Hamou, A, and Aitcin, P-C), June, 49

High-strength concrete

Strength and microstructure of high-strength paste containing silica fume, (Li, Y, Langan, BW, and Ward, MA), Dec., 112

Hydraulic activity test

Selectivity of alkaline activators for the activation of slags (Shi, C and Day, RL), June, 8

Hydraulic cement

Alkali limits for prevention of alkali-silica reaction: a brief review of their development (Hill, ED), June, 3

Hydration chemistry

Selectivity of alkaline activators for the activation of slags (Shi, C and Day, RL), June, 8

L-M**Lightweight aggregates**

Durability of reinforced lightweight mortars with corrosion inhibitors, (Batis, G, Kouloumbi, N, and Katsiamboulas, A), Dec., 117

Microstructure

Strength and microstructure of high-strength paste containing silica fume,

(Li, Y, Langan, BW, and Ward, MA), Dec., 112

Modulus of rupture

Mechanical properties of normal to high-strength steel fiber-reinforced concrete (Khaloo, AR and Kim, N), Dec., 92

Mortars

Factors influencing flow and strength of standard mortars and reappraisal of ASTM test methods for fly ash (Helmuth, R), Dec., 98 Tensile and compressive strength of silica fume-cement pastes and mortars (Toutanji, HA and El-Korchi, T), Dec., 78

P**Permeability**

Performance and correlation of the properties of fly ash cement concrete, (Al-Amoudi, OSB, Maslehuddin, M, and Asi, IM), Dec., 71

Porosity

Performance and correlation of the properties of fly ash cement concrete, (Al-Amoudi, OSB, Maslehuddin, M, and Asi, IM), Dec., 71

Portland cement

Factors influencing flow and strength of standard mortars and reappraisal of ASTM test methods for fly ash (Helmuth, R), Dec., 98

Pulse velocity

Comparison of five standards on ultrasonic pulse velocity testing of concrete (Komlos, K, Popovics, S, Nurnbergerova, T, Babal, B, and Popovics, JS), June, 42

S-U**Scaling**

Precision of tests for assessment of the deicer salt scaling resistance of concrete, (Marchand, J, Pleau, R, and Pigeon, M), Dec., 85

Silica fume

Strength and microstructure of high-strength paste containing silica fume, (Li, Y, Langan, BW, and Ward, MA), Dec., 112

Standardization

Comparison of five standards on ultrasonic pulse velocity testing of concrete (Komlos, K, Popovics, S, Nurnbergerova, T, Babal, B, and Popovics, JS), June, 42

Statistical variability

Precision of tests for assessment of the deicer salt scaling resistance of concrete, (Marchand, J, Pleau, R, and Pigeon, M), Dec., 85

Steel reinforcement

Durability of reinforced lightweight mortars with corrosion inhibitors, (Batis, G, Kouloumbi, N, and Katsiamboulas, A), Dec., 117

Strength

Comparison of five standards on ultrasonic pulse velocity testing of concrete (Komlos, K, Popovics, S, Nurnbergerova, T, Babal, B, and Popovics, JS), June, 42

Factors influencing flow and strength of standard mortars and reappraisal of ASTM test methods for fly ash (Helmuth, R), Dec., 98

Ultrasonic pulse

Comparison of five standards on ultrasonic pulse velocity testing of concrete (Komlos, K, Popovics, S, Nurnbergerova, T, Babal, B, and Popovics, JS), June, 42
