

Journal of Composites Technology & Research

Author Index

Volume 18, 1996

Number	Issue	Pages
1	January	1-66
2	April	67-166
3	July	167-240
4	October	241-321

A-B

Adams, DF: *see* Welsh, JS and Adams, DF
 Anglin, C: *see* Norman, TL, Anglin, C, and Gaskin, D

Bakuckas, JG and Johnson, WS: Thermal residual stresses in the analysis of fiber-bridged matrix crack growth in titanium matrix composites, April, 67

C

Carassiti, F: *see* Valente, T and Carassiti, F

Carroll, DR: *see* Goethe, JE, Dharani, LR, and Carroll, DR

Cernyar, J, Yang, F, and Saxena, A: Fracture and fatigue crack growth behavior of SiC_w/2124A1 composite, Jan., 30

Chan, WS: *see* Subramanian, S and Chan, WS

Chelikani, S and Kalpakjian, S: Hydrodynamic machining of fiber-reinforced composites, April, 118

Chiu, AS: *see* Kujawski, D, Chiu, AS, and Ellyin, F

D-E

Dharani, LR: *see* Goethe, JE, Dharani, LR, and Carroll, DR

Ellyin, F: *see* Kujawski, D, Chiu, AS, and Ellyin, F

G

Gaskin, D: *see* Norman, TL, Anglin, C, and Gaskin, D

Goethe, JE, Dharani, LR, and Carroll, DR: Experimental investigation of the failure modes in hybrid ceramic matrix composites, July, 194

Gowayed, Y, Schreibman, DV, and Roberts, M: Surface inspection of textile composite materials using image analysis techniques, Jan., 3

Graesser, DL

and Tuttle, ME: Damage tolerance predictions for stiffened composite panels: Part I—Strain field predictions, Jan., 47

and Tuttle, ME: Damage tolerance predictions for stiffened composite panels—Part II: Application of a failure criteria, April, 102

Gupta, K: *see* Singh, SP and Gupta, K

H-J

Highsmith, AL, Ledbetter, FE, Nettles, A, and Russell, SS: Low velocity impact damage in filament-wound composite pressure bottles, April, 109

Johnson, WS:

Review of *Concise Encyclopedia of Composite Materials Revised Edition* (Kelly), July, 228

see Bakuckas, JG and Johnson, WS

Jones, CC: *see* O'Connor, MJ, Wawner, FE, and Jones, CC

K

Kalpakjian, S: *see* Chelikani, S and Kalpakjian, S

Kamel, I: *see* Shaker, M, Kamel, I, Ko, F, and Song, JW

Kassapoglou, C: Compression strength of composite sandwich structures after barely visible impact damage, Oct., 274

Ko, F: *see* Shaker, M, Kamel, I, Ko, F, and Song, JW

Kriz, RD: *see* Vure, NRS and Kriz, RD

Kujawski, D, Chiu, AS, and Ellyin, F: Effective stress parameter for long-term fatigue strength of fiber-reinforced plastic pipes, July, 215

L

Lai, Y and Wu, Y: Exact method for dynamic analysis of rectangular laminated orthotropic plates under heating load, April, 135

Ledbetter, FE: *see* Highsmith, AL, Ledbetter, FE, Nettles, A, and Russell, SS

Li, J and O'Brien, TK: Simplified data reduction methods for the ECT test for Mode III interlaminar fracture toughness, April, 96

M-N

Mall, S:

see Robertson, DD and Mall, S

see Sanders, BP and Mall, S

see Solti, JP, Mall, S, and Robertson, DD

Nettles, A: *see* Highsmith, AL, Ledbetter, FE, Nettles, A, and Russell, SS

Norman, TL, Anglin, C, and Gaskin, D: Strength and damage mechanisms of notched two-dimensional triaxial braided textile composites and tape equivalents under tension, Jan., 38

O

O'Brien, TK: *see* Li, J and O'Brien, TK

O'Connor, MJ, Wawner, FE, and Jones, CC: Stress-free temperature of the macro-

interface in selectively reinforced aluminum castings, July, 209

R

Roberts, M: *see* Gowayed, Y, Schreibman, DV, and Roberts, M

Robertson, DD

and Mall, S: Incorporating fiber damage in a micromechanical analysis of metal matrix composite laminates, Oct., 265
see Solti, JP, Mall, S, and Robertson, DD

Roy, AK: Tensile fatigue behavior of a coated two-dimensional carbon-carbon composite laminate, July, 202

Russell, SS: *see* Highsmith, AL, Ledbetter, FE, Nettles, A, and Russell, SS

S

Sanders, BP

and Mall, S: Transverse fatigue response of a metal matrix composite under strain-controlled mode at elevated temperature: Part 1—Experiments, Jan., 15

and Mall, S: Transverse fatigue response of a metal matrix composite under strain-

controlled mode at elevated temperature: Part 2—Analysis, Jan., 22

Saxena, A: *see* Cernyar, J, Yang, F, and Saxena, A

Schreibman, DV: *see* Gowayed, Y, Schreibman, DV, and Roberts, M

Shaker, M, Kamel, I, Ko, F, and Song, JW: Improvement of the interfacial adhesion between Kevlar fiber and resin by using R-F plasma, Oct., 249

Singh, SP and Gupta, K: Rotordynamic experiments on composite shafts, Oct., 256

Solti, JP, Mall, S, and Robertson, DD: Simplified approach for modeling fatigue of unidirectional ceramic matrix composites, July, 167

Song, JW: *see* Shaker, M, Kamel, I, Ko, F, and Song, JW

Subramanian, S and Chan, WS: Effect of loading frequency and interleaf on the delamination characteristics of laminated composites, July, 179

T-U

Tai, H: Equivalent thermal conductivity of two- and three- dimensional orthogonally fiber-reinforced composites in one-dimensional heat flow, July, 221

Tuttle, ME: *see* Graesser, DL and Tuttle, ME

Urbanik, TJ: Machine direction strength theory of corrugated fiberboard, April, 80

V

Valente, T and Carassiti, F: Hot pressing of plasma-sprayed SiC fiber-reinforced Ti-6Al-4V alloy, April, 89

Vure, NRS and Kriz, RD: Effect of cooling rate and stacking sequence on the fatigue behavior of notched quasi-isotropic AS4/PEEK laminates, April, 127

W-Y

Wawner, FE: *see* O'Connor, MJ, Wawner, FE, and Jones, CC

Welsh, JS and Adams, DF: Unidirectional composite compression strengths obtained by testing cross-ply laminates, Oct., 241

Wu, Y: *see* Lai, Y and Wu, Y

Yang, F: *see* Cernyar, J, Yang, F, and Saxena, A
