

# Journal of Composites Technology & Research

## Author Index

### Volume 19, 1997

Number	Issue	Pages
1	January	1-54
2	April	55-122
3	July	123-194
4	October	195-267

#### A-B

**Adams, DF and Welsh, JS:** Wyoming combined loading compression (CLC) test method, July, 123

Allen, DH: *see* Harris, CE, Coats, TW, Allen, DH, and Lo, DC

**Ananth, CR, Mukherjee, S, and Chandra, N:** Effect of time-dependent matrix behavior on the evolution of processing-induced residual stresses in metal matrix composites, July, 134

Aouadi, K: *see* Chin, JW, Aouadi, K, and Nguyen, T

Boyum, EA: *see* Mall, S and Boyum, EA

Bradley, WL: *see* Chiou, P-L and Bradley, WL

#### C-E

Chamis, CC: *see* Minnetyan, L and Chamis, CC

Chandra, N: *see* Ananth, CR, Mukherjee, S, and Chandra, N

**Chin, JW, Aouadi, K, and Nguyen, T:** Effects of environmental exposure on fiber-reinforced plastic (FRP) materials used in construction, Oct., 205

**Chiou, P-L and Bradley, WL:** Seawater effects on strength and durability of glass/epoxy filament-wound tubes as revealed by acoustic emission analysis, Oct., 214

**Chuck, L and Graves, GA:** Hoop tensile strength and fracture behavior of continuous fiber ceramic composite (CFCC) tubes from ambient to elevated temperatures, July, 184

Coats, TW: *see* Harris, CE, Coats, TW, Allen, DH, and Lo, DC

© 1997 by the American Society for Testing and Materials

Connor, MJ: *see* Koko, TS, Connor, MJ, and Corbett, GV

Corbett, GV: *see* Koko, TS, Connor, MJ, and Corbett, GV

Eduljee, RF: *see* Huang, X, Gillespie, JW, and Eduljee, RF

#### G

**Ganesh, VK and Naik, NK:** (+45) Degree off-axis tension test for shear characterization of plain weave fabric composites, April, 77

Gillespie, JW: *see* Huang, X, Gillespie, JW, and Eduljee, RF

**Gowayed, YA:** Effect of voids on the elastic properties of textile reinforced composites, July, 168

Graves, GA: *see* Chuck, L and Graves, GA

#### H

**Harris, CE, Coats, TW, Allen, DH, and Lo, DC:** Progressive damage model and analysis methodology for predicting the residual strength of composite laminates, Jan., 3

**Highsmith, AL and Keshav, S:** Quantitative assessment of fiber fracture in damaged laminates using X-ray radiography, Jan., 10  
**and Keshav, S:** Using measured damage parameters to predict the residual strength of impacted composites: a neural network approach, Oct., 195

**Hu, S:** Recent development of an ultrasonic nondestructive evaluation technique for metal matrix composites, Jan., 41

**Huang, X, Gillespie, JW, and Eduljee, RF:** Matrix cracking of high-performance composite laminates with variation of laminate stacking sequence and testing temperature, July, 142

#### I-K

Ifju, PG: *see* Masters, JE and Ifju, PG

**Johnson, WS:** Review of *Damage Tolerance in Advanced Composites* by Sierakowski and Newaz, April, 93

**Karri, V:** Machining of filled polymers using single-edge tools, April, 72

Keshav, S: *see* Highsmith, A and Keshav, S

**Koko, TS, Connor, MJ, and Corbett, GV:** Composite repair of a stainless steel-GRP sonar dome, Oct., 228

#### L

Lee, SM: *see* Li, J, Lee, SM, Lee, EW, and O'Brien, TK

**Li, J, Lee, SM, Lee, EW, and O'Brien, TK:** Evaluation of the edge crack torsion (ECT) test for Mode III interlaminar fracture toughness of laminated composites, July, 174

Lo, DC: *see* Harris, CE, Coats, TW, Allen, DH, and Lo, DC

#### M

**Mall, S and Boyum, EA:** Fatigue behavior of a cross-ply titanium matrix composite with tensile and zero mean load at elevated temperature, April, 55  
*see* Solti, JP, Mall, S, and Robertson, DD

**Martin, R:** Introduction to symposium on non-aerospace applications for composite materials, Oct., 203

**Martin, RH:** Delamination characterization of woven glass/polyester composites, Jan., 20

**Masters, JE and Ifju, PG:** Strain gage selection criteria for textile composite materials, July, 152

**Minnetyan, L and Chamis, CC:** Progressive fracture of composite cylindrical shells subjected to external pressure, April, 65

Mukherjee, S: *see* Ananth, CR, Mukherjee, S, and Chandra, N

**N-R**

Naik, NK: *see* Ganesh, VK and Naik, NK

Nguyen, T: *see* Chin, JW, Aouadi, K, and Nguyen, T

O'Brien, TK: *see* Li, J, Lee, SM, Lee, EW, and O'Brien, TK

Robertson, DD: *see* Solti, JP, Mall, S, and Robertson, DD

**S-W**

Schulte, K: *see* Stumpf, H and Schulte, K

**Solti, JP, Mall, S, and Robertson, DD:** Modeling of matrix failure in ceramic matrix composites, Jan., 29

**Stumpf, H and Schulte, K:** QUIK-TEMP—a new short-cycle time manufacturing method for thermoplastic composites made from low-cost textile preforms, Oct., 222

**Taheri, F:** Improvement of strength and ductility of adhesively bonded joints by inclusion of SiC whiskers, April, 86

Welsh, JS: *see* Adams, DF and Welsh, JS
