

Journal of Composites Technology & Research

Subject Index

Volume 20, 1998

A-B

Accelerated testing

Accelerated test methods to determine the long-term behavior of composite highway structures subject to environmental loading (Gentry, TR, Bank, LC, Barkatt, A, and Prian, L), Jan., 38

Acidic environment

Effect of biofouling on graphite/epoxy composites (Puh, JS, Wagner, PA, Little, BJ, and Bradley, WL), Jan., 59

Adhesive bonding

Finite element and experimental evaluation of boron-epoxy doublers bonded to an aluminum substrate (Valentin, RV, Butkus, LM, and Johnson, WS), April, 108

Adhesive joints

Fracture load predictions for adhesive joints under mixed mode I-II-III loading (Vintilescu, I and Spelt, JK), July, 187
Mixed mode I, II, and III fracture characterization of adhesive joints (Vintilescu, I and Spelt, J), April, 129

Aging

Accelerated test methods to determine the long-term behavior of composite highway structures subject to environmental loading (Gentry, TR, Bank, LC, Barkatt, A, and Prian, L), Jan., 38

Boron-epoxy doubler

Finite element and experimental evaluation of boron-epoxy doublers bonded to an aluminum substrate (Valentin, RV, Butkus, LM, and Johnson, WS), April, 108

Braided composites

Sensitivity of mechanical properties to braid misalignment in triaxial braid composite panels (Chen, J, McBride, TM, and Sanchez, SB), Jan., 13

C-D

Committee D-30

Introduction to symposium on non-aerospace applications for composite materials (Martin, R), Jan., 27

Composite materials

Dependence of intralaminar fracture toughness on direction of crack propagation in unidirectional composites (Hansen, U and Gillespie, JW, Jr.), April, 89

Delamination

Nonlinear analyses of homogeneous, symmetrically delaminated single leg bending specimens (Pieracci, A, Davidson, BD, and Sundararaman, V), July, 170

F

Fiber fractures

Effect of fiber fracture and matrix yielding on load sharing in continuous fiber metal matrix composites (Voleti, SR, Ananth, CR, and Chandra, N), Oct., 203

Finite-element analysis

Nonlinear analyses of homogeneous, symmetrically delaminated single leg bending specimens (Pieracci, A, Davidson, BD, and Sundararaman, V), July, 170

Fracture

Fracture load predictions for adhesive joints under mixed mode I-II-III loading (Vintilescu, I and Spelt, JK), July, 187
Mixed mode I, II, and III fracture characterization of adhesive joints (Vintilescu, I and Spelt, J), April, 129

Fracture toughness

Dependence of intralaminar fracture toughness on direction of crack propagation in unidirectional composites (Hansen, U and Gillespie, JW, Jr.), April, 89

Friction

Effect of interfacial properties on the fiber fragmentation process in polymer matrix composites (Voleti, SR, Ananth, CR, and Chandra, N), Jan., 18

FRP reinforcement

Effect of cyclic loading on bond behavior of GFRP rods embedded in concrete beams (Bakis, CE, Al-Dulaijan, SU, Nanni, A, Boothby, TE, and Al-Zahrani, MM), Jan., 29

G-I

Glass epoxy

Tension-torsion behavior of glass epoxy flexbeam laminates (O'Brien, TK and Sen, JK), Oct., 221

Hybrid composite laminate

Investigation into the fatigue of a hybrid titanium composite laminate (Li, E and Johnson, WS), Jan., 3

Interlaminar shear strength

Inclined double notch shear test for improved interlaminar shear strength measurements (Neumeister, JM and Palsson, AC), April, 100

L-M

Laminates

Tension-torsion behavior of glass epoxy flexbeam laminates (O'Brien, TK and Sen, JK), Oct., 221

Machining

Net-shape machining and the process-dependent failure of fiber-reinforced plastics under static loads (Arola, DD and Ramulu, M), Oct., 210

Matrix yielding

Effect of fiber fracture and matrix yielding on load sharing in continuous fiber metal matrix composites (Voleti, SR, Ananth, CR, and Chandra, N), Oct., 203

Metal matrix composites (MMCs)

Micromechanics analysis and life prediction of titanium matrix composites (Nicholas, T and Kroupa, JL), April, 79
Strength reduction and damage characterization of SCS6/Ti-6Al-4V composite exposed to fatigue at elevated temperature (Robertson, DD, Mall, S, and Lee, S-M), April, 120

Micromechanics

Micromechanics analysis and life prediction of titanium matrix composites (Nicholas, T and Kroupa, JL), April, 79

P**Plastic deformation**

Residual thermal stresses in metallic and intermetallic matrix composites after cooling from processing temperature (Abadian, A, Szyszkowski, W, and Yannacopoulos, S), July, 161

Polyester

Viscoelastic creep characteristics of neat thermosets and thermosets reinforced with E-glass (Bradley, SW, Puckett, PM, Bradley, WL, and Sue, HJ), Jan., 51

Polymer matrix composites

Effect of interfacial properties on the fiber

fragmentation process in polymer matrix composites (Voleti, SR, Ananth, CR, and Chandra, N), Jan., 18

Polymeric composites

Effect of biofouling on graphite/epoxy composites (Puh, JS, Wagner, PA, Little, BJ, and Bradley, WL), Jan., 59
Viscoelastic creep characteristics of neat thermosets and thermosets reinforced with E-glass (Bradley, SW, Puckett, PM, Bradley, WL, and Sue, HJ), Jan., 51

R-S**Reinforced concrete**

Effect of cyclic loading on bond behavior of GFRP rods embedded in concrete beams (Bakis, CE, Al-Dulaijan, SU, Nanni, A, Boothby, TE, and Al-Zahrani, MM), Jan., 29

Spectrum loading

Fatigue life prediction of titanium matrix composites under mission spectrum loading (Nicholas, T and Rosenberger, AH), July, 179

Surface

Net-shape machining and the process-dependent failure of fiber-reinforced plastics under static loads (Arola, DD and Ramulu, M), Oct., 210

Symposium

Introduction to symposium on non-aerospace applications for composite materials (Martin, R), Jan., 27

T**Test method**

Inclined double notch shear test for improved interlaminar shear strength measurements (Neumeister, JM and Palsson, AC), April, 100

Textile composites

Sensitivity of mechanical properties to braid misalignment in triaxial braid composite panels (Chen, J, McBride, TM, and Sanchez, SB), Jan., 13

Thermal residual stresses

Residual thermal stresses in metallic and intermetallic matrix composites after cooling from processing temperature (Abadian, A, Szyszkowski, W, and Yannacopoulos, S), July, 161

Titanium

Investigation into the fatigue of a hybrid titanium composite laminate (Li, E and Johnson, WS), Jan., 3

Titanium matrix composites

Fatigue life prediction of titanium matrix composites under mission spectrum loading (Nicholas, T and Rosenberger, AH), July, 179

Strength reduction and damage characterization of SCS6/Ti-6Al-4V composite exposed to fatigue at elevated temperature (Robertson, DD, Mall, S, and Lee, S-M), April, 120
