

*Professor S. S. Wang
chosen as new Coeditor.*

Editorial

The Standing Committee on Publications has appointed Professor Su Su Wang as a new Coeditor of the *ASTM Journal of Composites Technology and Research*. Dr. Wang is Professor of Theoretical and Applied Mechanics and of Aeronautical and Astronautical Engineering in those respective departments at the University of Illinois at Urbana-Champaign, Urbana, IL. He is a graduate of M.I.T. (Sc.D., 1974) and the National Taiwan University (S.M., 1970; S.B., 1968).

Dr. Wang has published over 80 technical articles in referred journals and books and some 35 reports concerned with theoretical, computational, and experimental mechanics, and the mechanical behavior of fiber composite materials, structures, and structural joints. Dr. Wang has received a number of citations and awards for the excellence of his work and his presentations. However, perhaps

his greatest distinction is his reputation for keen insight, clear perception, and uncompromising rigor in his approach to the science and technology of composite materials. He is rightly regarded as one of this country's brightest young men in the field today. We are indeed pleased to welcome Dr. Wang to his new position.

At the same time we are sorry to announce the retirement of Dr. William Feng as Coeditor, but proud and pleased to note his record of achievement during his two years of service. Bill set an example of dedication, direction, and accomplishment that will be difficult for the rest of us to follow. He will continue to help us on the Editorial Board. We extend a public thanks to Bill for his contributions to the continuing success of the *Journal of Composites Technology and Research*.
