

Editorial

Dear Reader, I wanted to take the opportunity to point out that we gave the first *Journal of Composites Technology & Research* Outstanding Paper Award to Captain Brian Sanders and Professor Shankar Mall for their paper entitled "Longitudinal Fatigue Response of a Metal Matrix Composite Under Strain Controlled Mode at Elevated Temperature." The announcement of this award appeared in the January 1995 issue of the journal and was printed in the October 1994 issue.

We look forward to recognizing more outstanding papers in the

future. The papers are recommended for the award by the peer-reviewers. These suggestions will then be reviewed by members of the Editorial Board and the Journal's Editors.

The award-winning paper must be of a very high technical caliber and be well-written as submitted to the journal.
