

Subject Index

- A**
- Aqueous film-forming foam, 15
 - ASTM F 716, 31, 33
 - ASTM F 726, 31
 - ASTM F 739, 35
 - ASTM F 1127, 1
 - ASTM F 1129, 1
- B**
- Bases
 - quantities required for neutralization, 25
 - solubility in water, 26
 - Bulk containers, transfer in, 17–19
- C**
- Classes, 1
 - Cloud dispersal procedures, 32
 - Containers, transferring from, 21–24
 - Cylinders, descriptions, 22
- D**
- Decontamination, personnel, equipment, and site, 37
 - Drum transfer, 18–21
- E**
- Emergency response decision trees, 8–14
 - Employees, decontamination, 37
 - Equipment
 - decontamination, 37
 - ice tower scrubbing, 26, 28
 - personal protective, 35–36
 - transfer, 17–18, 22–23
 - water scrubbing, 25–27
 - Explosions
 - SEHSC-001, 2
 - SEHSC-002, 3
 - SEHSC-003, 4
 - SEHSC-004, 4
- F**
- Fires, 1
 - foam applications, 15–16
 - impingement on other vessels, 34
 - SEHSC-001, 2
 - SEHSC-002, 3
 - SEHSC-003, 4
 - SEHSC-004, 4
 - small, handling, 33
 - First aid
 - SEHSC-001, 3
 - SEHSC-002, 3
 - SEHSC-003, 4
- G**
- Gravity transfer, 19–20
- H**
- Hydrogen chloride vapor, 15
 - cloud dispersal procedures, 32
 - Hydrogen release, 1
 - minimizing with foam applications, 15
 - Hydrolysis, 29–31
 - neutralization in place procedure, 31
 - pipeline reactor, 29–31
 - Hydrolysis-in-place procedure, 31
- I**
- Ice tower scrubbing equipment setup, 26, 28
- L**
- Leak
 - emergency response decision trees, 8–14
 - SEHSC-001, 2
 - SEHSC-002, 3
 - SEHSC-003, 4
 - SEHSC-004, 5
 - Liquid nitrogen purging procedure, 24–25
- N**
- Neutralization, quantities of bases for, 25
 - Neutralization in place procedure, 31
 - Non-flammable situations, personal protective equipment requirements, 35
- P**
- Personal protective equipment, 35–36
 - Personnel, decontamination, 37
 - Pipeline reactor, 29–31
 - Pump closed-loop transfer, 19–21
 - Pump vent transfer, 20–22
 - Purge, scrub, and vent procedure, 25–28
- R**
- Radiant heat, impingement on other vessels, 34
 - SEHSC-004, 5
 - Flammable situation, potentially, personal protective equipment, 35–36
 - Foam applications, 15–16
 - Foam systems, 16
- S**
- Receiving container, 22
 - Reference guide, 6
 - Scrubbing
 - ice tower equipment setup, 26, 28
 - water, equipment setup, 25–27
 - SEHSC-001
 - alcohol-compatible medium expansion AFFF, 15–16
 - hydrogen release, 15
 - initial emergency response guides, 2–3
 - SEHSC-002
 - foam applications, 16
 - initial emergency response guides, 3
 - SEHSC-003
 - foam applications, 16
 - initial emergency response guides, 4
 - SEHSC-004, initial emergency response guides, 4–5
 - Site decontamination, 37
 - Spill
 - emergency response decision trees, 8–14
 - foam applications, 15
 - SEHSC-001, 2
 - SEHSC-002, 3
 - SEHSC-003, 4
 - SEHSC-004, 5
 - small, handling, 33
 - Transfer, 17–28
 - bulk containers, 17–19
 - closed-loop, 17–18, 23
 - from containers, 21–24
 - drum, 18–21
 - equipment, 17–18, 22–23
 - gravity, 19–20
 - liquid nitrogen purging procedure, 24–25
 - pump closed-loop, 19–21
 - pump vent, 20–22
 - purge, scrub, and vent procedure, 25–28
 - vented, 17, 19, 23–24
 - Venting procedures, 27–28
 - Water
 - application to fire, 15
 - use on spills and fires, 33
 - Water scrubbing/neutralizing equipment setup, 25–27
