NOTE

The Society is not responsible, as a body,
for the statements and opinions
advanced in this publication.

Peer Review Policy

Each paper published in this volume was evaluated by three peer reviewers. The authors addressed all of the reviewers' comments to the satisfaction of both the technical editor(s) and the ASTM Committee on Publications.

The quality of the papers in this publication reflects not only the obvious efforts of the authors and the technical editor(s), but also the work of these peer reviewers. The ASTM Committee on Publications acknowledges with appreciation their dedication and contribution of time and effort on behalf of ASTM.

Foreword

The symposium on Geotechnical Aspects of Ocean Waste Disposal was presented at Orlando, Florida, on 26 Jan. 1989. ASTM Committee D-18 on Soil and Rock sponsored the symposium. Kenneth R. Demars, University of Connecticut, and Ronald C. Chaney, Humboldt State University, served as co-chairmen and co-editors of the resulting publication.

Contents

Introduction	1
Geotechnical Engineering for Ocean Waste Disposal: An Introduction— HOMA J. LEE, KENNETH R. DEMARS, AND RONALD C. CHANEY	3
PART A—SHALLOW OCEAN DISPOSAL: DREDGED MATERIAL, SLUDGES, AND BULKY WASTES	
State-of-the-Art Speaker: Ocean Disposal of Particulate Wastes: Practices, Properties, and Processes— W. FRANK BOHLEN	21
The Use of REMOTS® Imaging Technology for Disposal Site Selection and Monitoring— DONALD C. RHOADS AND JOSEPH D. GERMANO	50
The Use of Fiber Optic Sensors for In-Situ Chemical Measurements in the Ocean— JOHN M. TOKAR, W. LAWRENCE PUGH, AND KISHOLOY GOSWAMI	65
Real-Time In-Situ Monitoring of Dredge Disposal Sites— KENNETH C. BALDWIN, JAMES D. IRISH, AND HENRY J. BOKUNIEWICZ	76
A Seabed Sediment Sampler for Ocean Waste Disposal— FRANS PETRUS SMITS	87
Effects of Ocean Disposal of Wastes on Properties of Marine Sediments— SIBEL PAMUKCU, AHMET TUNCAN, AND HSAI-YANG FANG	95
PART B—DEEP OCEAN DISPOSAL: RADIOACTIVE AND CONCENTRATED CHEMICAL WASTES	
State-of-the-Art Speaker: Geotechnical Properties and Processes of Deep Ocean Sediments as Related to Disposal of Toxic Wastes—An Overview— ARMAND J. SILVA	113
Geotechnical Aspects of Deep Ocean Radioactive Waste Disposal— TIM J. FREEMAN	156
Subseabed Disposal Project Experiment: Piezometer Probe Measurement Technology— RICHARD H. BENNETT, JOHN T. BURNS, HUON LI, DONALD WALTER, PHILIP J. VALENT, C. MARC PERCIVAL, AND JOEL LIPKIN	175
In-Situ Pore-Pressure Measurements for a Detailed Geotechnical Assessment of Marine Sediments: State of the Art— P. J. SCHULTHEISS	190
Subseabed Disposal Project Experiment: Pore Water Pressure Response to Piezometer and Canister Insertion— PHILIP J. VALENT, JOHN T. BURNS, DONALD J. WALTER, HUON LI, AND RICHARD H. BENNETT	206

Pore Pressure Response to Probe Insertion and Thermal Gradient: ISIMU-II— MICHAEL RIGGINS AND PHILIP J. VALENT	223
Thermal Aspects of the Subseabed Disposal of High-Level Radioactive Waste— CHARLES E. HICKOX, C. MARC PERCIVAL, AND LEROY O. OLSEN	234
A Geotechnical Investigation of a Deep Ocean Site— TIM J. FREEMAN AND RUUD T. E. SCHÜTTEHELM	255
Microfabric of Illitic Clays from the Pacific Deep-Sea Basin: Significance to High-Level Nuclear Waste Disposal— PATTI J. BURKETT, RICHARD H. BENNETT, AND WILLIAM R. BRYANT	276

SUMMARIES

Research Needs: Geotechnical Aspects of Ocean Waste Disposal— I. NOORANY	299
