## FOREWORD

---

This volume includes six papers and pertinent discussions on the value of the various recognized methods of non-destructive testing in the economic aspects of production and also in promoting the quality of materials. The papers and discussions were presented at the Symposium on the Role of Non-Destructive Testing in the Economics of Production held at the Fourth and Seventh Sessions of the Fifty-third Annual Meeting of the Society at Atlantic City, N. J., June 27, 1950. This Symposium was sponsored by Committee E-7 on Non-Destructive Testing through a Symposium Committee under the chairmanship of H. H. Lester, Watertown Arsenal. The information revealed is a tribute to the intensive efforts of the committee membership responsible for organizing the Symposium and to the authors. Mr. H. H. Lester and Mr. R. C. McMaster, Batelle Memorial Inst., acted as co-chairman of the Symposium sessions.

## CONTENTS

---

	PAGE
Introduction—H. H. Lester .....	1
A Basic Guide for Management's Choice of Non-Destructive Tests—Robert C. McMaster and Samuel A. Wenk .....	3
Discussion .....	81
Discontinuities in Cast and Wrought Products That Can Be Revealed by Non-Destructive Tests—Kent R. Van Horn .....	83
Discussion .....	100
The Rôle of Non-Destructive Testing in the Economics of Castings—John W. Juppenlatz .....	102
Discussion .....	109
The Economics and Practical Application of Cobalt 60 in the Radiographic Inspection of Steel Weldments—W. L. Schwinn .....	112
Discussion .....	132
The Economics of Wrought Steel Inspection—C. D. Moriarty .....	136
Discussion .....	145
Management's Responsibility for Insistence on Non-Destructive Testing in the Development of New Engineering Products and Processes—L. W. Ball....	148
Discussion .....	152
General Discussion .....	153
