FOREWORD

The papers and discussions in this Symposium on Methods of Testing Building Constructions were presented at the Thirty-second and Thirty-third Sessions of the Fifty-seventh Annual Meeting of the American Society for Testing Materials held in Chicago, Ill., June 17-18, 1954.

The Symposium was sponsored by Committee E-6 on Methods of Testing Building Constructions with Mr. W. T. Savage, Armour Research Foundation, Chicago, Ill., serving as symposium committee chairman. Mr. Savage also presided over the Thirty-second Session, and Mr. Lyman W. Wood, U. S. Forest Products Laboratories, Madison, Wis., served as chairman of the Thirty-third Session.

NOTE.—The Society is not responsible, as a body, for the statements
and opinions advanced in this publication.

THIS PUBLICATION is one of many issued by the American Society for Testing Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the A.S.T.M. technical committees, or compilations of data developed in special Society groups with many organizations co-operating. A list of A.S.T.M. publications and information on the work of the Society will be furnished on request.
