## A

- AASHTO M145-82, 66
- Additives, 30, 33, 34-38, 47, 86, 87, 152
  - Antistripping (*see* Antistripping agents)
  - Asphalt combination, 48-53
- Adhesiveness, 10, 47
- Aggregates, 88, 89, 96, 97, 105, 114, 118
  - Asphalt-aggregate, 24, 25
  - Bound, 6
  - Characteristics, 14, 132
  - Gradation, 136, 156
- Al-Ausi, Riadh M. J., 118-130
- Ali, Galal, A., 131-149
- Al-Jarallah, Mohammed I., 131-149
- Amidoamine products, 47, 53
- Antistripping agents, 24, 25, 50, 53
  - In asphalt cement, 46-54
- Aromatics, 123
- Asphalt, 6
  - AC-10, 35, 37, 103, 104, 114, 115
  - Adhesiveness, 10
  - Aggregates, 24, 25
  - Antistripping agent in, 46-54
  - Cement, 24, 46-54
  - Concrete, 13, 16, 66, 82, 107, 111, 116, 129, 131, 136, 150
  - Content, 14, 136, 140, 143-145, 147, 156, 162
  - Fluidity, 14
  - Mix, 21, 111, 112
  - Moisture susceptibility, 47, 53
  - Pavement, 4
    - Recycled, 25, 29-32, 151, 152
    - Rejuvenation, 154
  - Paving grade, 13, 29, 30
  - Polymerized, 25, 33-47
  - Properties, 33, 39, 162
    - Softening, 156, 157
    - Viscoelastic, 10
  - Roofing, 11
  - Sulfur-extended, 85, 88
  - Supply, 102, 103
  - Temperature susceptibility, 11
  - Viscosities, 3
- Asphalt Institute
  - Heavy traffic recommendations, 145-146
  - Heavy traffic specifications, 129, 130
- Asphaltenes, 49, 54, 123
- Association of Asphalt Paving Technologists, 131-132
- ASTM Tests D 5-73, 8, 154
  - D 36-76, 10-11
  - D 113-79, 10
  - D 698-78, 66
  - D 1074-76, 14
  - D 1188-56, 136
  - D 1559-65, 136
  - D 1559-76, 110, 121, 154
  - D 1754-76, 162
  - D 1856-75, 152, 154
  - D 2041, 110
  - D 2049-64T, 132, 134, 139, 145, 147
  - D 2171-66, 154

## B

- Backflush mode, 49, 53, 54
- Baladi, Gilbert Y., 55-64, 164-170
- Bandyopadhyay, Sudipta S., 150-163

- Binders, 87, 120, 121  
 Aggregate, 46  
 Asphalt, 8, 126  
 Bitumen, 118  
 Consistency, 7  
 Content, 12, 28, 29, 124, 125, 127, 129, 130  
 Replacement, 6, 8, 10, 11  
 Rheological properties, 125, 129  
 Stiffness, 10  
 Sulphlex, 102-117  
 Viscoelastic, 6  
 Viscosity, 29
- Bitumen, 4, 32  
 Aged, 29  
 Cracking temperature, 9  
 Deformations, 3  
 Mixes, 118-130, 131-149  
 Rejuvenation, 153, 154  
 Stiffness, 11
- Brittleness, 13, 26, 27, 124
- Bureau of Mines, 87  
 Plasticized sulfur, 97-99
- C**
- Cement (*see* Asphalt, cement; Concrete, portland cement)
- Chemical stability (*see* Temperature, stability)
- Chromatography, high-performance liquid, 46-54
- Cinder-base material, 66-69, 74, 77-79, 81, 82
- Clay (*see* Soils, clay)
- Cohesion, 35, 40
- Compactibility, 122, 124-125, 130
- Compaction, 58, 62, 63  
 Force, 145, 146, 147  
 Vibration, 131-149
- Compression, unconfined, 14
- Concrete  
 Asphalt, 13, 16, 66, 82, 107, 111, 116, 129, 131, 136, 150  
 Portland cement, 16, 85, 87, 89, 90, 103
- Prestressed, 170  
 Sulfur, 85, 89, 90, 97, 99  
 Processed, 87-88
- Corrosion resistance, 87
- Cracking, 151  
 Fatigue, 11, 17-18, 119  
 Freeze-thaw, 24  
 Nonload associated, 113, 115, 116  
 Pattern, 152  
 Reflective, 152  
 Shrinkage, 11, 16, 161  
 Survey, 114  
 Thermal, 11, 37
- Creep behavior, 3, 16
- D**
- Dalter, Raymond S., 46-54
- Damping, 144-145, 147
- Deflection (*see* Pavement, deflection)
- Deformation, 15, 17, 55, 56, 69, 70, 72  
 Bitumen, 3  
 Failure, 10  
 Permanent (*see also* Rutting), 16, 18-21  
 Plastic, 14  
 Rate, 106, 107  
 Time-dependent, 16
- Degradation, 82
- Density, 14, 58, 60, 62, 63, 122, 125, 126, 130, 134, 136, 138-140, 145-148  
 Dry, 66-69, 82  
 Moisture, 79
- Desert sand (*see* Sand)
- Distress modes, 11, 16-21
- Ductility, 7, 10
- Durability, 6
- Dynalect measurements, 151, 152, 159, 163
- E**
- Elastic layer theory, 55, 56
- Elastic properties, 3, 15, 16

Embrittlement, sulfur, 86  
 Emery, John J., editor, 1-2, 172-173  
 Epps, Jon A., 5-45

## F

Failure, material, 3, 10 (*see also*  
 Cracking; Deformation; Degradation; Rutting)  
 Fatigue  
 Behavior, 17  
 Life, 30, 31, 36, 37, 41, 66  
 Resistance, 6  
 Federal Highway Administration  
 (FHWA), 102, 103, 170  
 VESYS IIM, 15, 16, 18  
 Federal Railroad Administration, 60  
 Flexibility, 164-170  
 Flow characteristics, 128, 129, 136,  
 138, 139, 140, 154  
 Technology, 4  
 Forcing function, 168, 169  
 Freeze-thaw cycles, 24  
 Frictional resistance, 142, 145

## G

Gannon, Charles R., 84-100  
 Georgia Department of Transportation  
 (GHD-56), 53  
 Gilmore, Dennis W., 46-54  
 Goitom, Tesfai, 55-64  
 Grain size distribution  
 Sand, 119, 120  
 Soils, 56, 67  
 Gravel, 25, 151

## H

Hardening, 123, 124  
 Heptane insolubles, 49  
 Hettinger, William P., Jr., 84-100  
 Hick, R. Gary, 65-83  
 Hoffman, Garry L., 102-117  
 Hsu, Shih-Ying, 65-83  
 Hubbard-Field procedure, 12, 14

Hveem method, 13-14, 21, 26, 28,  
 30, 33, 35, 40  
 Hydrocarbon materials, 103  
 Hydrogen sulfide, 106, 116, 123

## K

Kandhal, Prithvi S., 102-117  
 Kennedy, Thomas W., 5-45  
 Kugele, Thomas G., 46-54

## L

Loads, 11, 29  
 Axle, 55-57, 164  
 Carrying capacity, 151  
 Repetition, 60-63

## M

Marshall  
 Method, 12-13, 14, 26, 28, 30, 35,  
 40, 104, 105  
 Properties, 34, 113-114, 119, 123,  
 127-130, 136-142, 147  
 Stability, 106, 116, 132, 134, 144,  
 145, 146  
 Material tests (*see* Tests)  
 Mellott, Dale B., 102-117  
 Mixes, 4, 10  
 Asphalt, 6, 13, 21, 111, 112  
 Bituminous, 14, 131-149  
 Brittle, 30, 33-38  
 Nonbrittle, 31, 33-38  
 Sand-sulfur-bitumen, 118-130  
 Moisture  
 Damage, 107, 111, 114  
 Resistance, 6, 107  
 Sensitivity, 11, 21-25  
 Susceptibility, 47, 53, 111, 114

## O

Overlay, 159, 160, 163

## P

## Pavement

- Asphalt (*see also* Asphalt, pavement)
- Cold recycled
  - Construction, 156-159
  - Design, 150-156
  - Structural conditions, 151, 159-163
- Condition, 165
- Damage index, 165
- Deflection, 151, 152, 159, 163, 166-170
- Design, 5-45, 55
  - Procedures, 65
- Flexibility, 164-170
