Foreword

The Symposium on Test Methods for Compression Members was presented in four sessions during the 69th Annual Meeting of the Society, in Atlantic City, N. J., 26 June–1 July, 1966. The symposium was sponsored by Committee E-1 on Methods of Testing in cooperation with the Column Research Council. The symposium chairman was L. K. Irwin, National Bureau of Standards. Presiding at the four sessions were Mr. Irwin; B. G. Johnston, University of Michigan; J. W. Clark, Alcoa Research Laboratories; and J. M. Holt, U. S. Steel Corp.

Contents

The Structural Metal Column: A Chronology—B. G. JOHNSTON	1
Experimental Investigation of the Buckling of Plates with Residual Stresses—FUMIO NISHINO, YUKIO UEDA, AND LAMBERT TALL	12
Photoelastic Circular Cylinders in Axial Compression—R. C. TENNYSON	31
Determination of Plastic Buckling Load for Axially Compressed Plates from Experimental Data—MASAO YOSHIKI AND YUZURU FUJITA	47
Discussion	59
Reversed-Axial-Load Testing of High-Strength Steels—T. L. BOBLENZ, J. M. FISHER, S. T. ROLFE, AND J. H. GROSS	60
Discussion	79
Testing of Pinned-End Steel Columns—F. R. ESTUAR AND LAMBERT TALL	80
Influence of Specimen Design and Test Procedure on Results of Buckling Tests of Shell Structures—J. P. PETERSON	97
Effect of End Conditions on Buckling of Cylindrical Shells Under Axial Compression Impact—A. P. COPPA	115
Discussion	135
Test Method for Buckling of Large Transversely Loaded Beams—R. A. HECHTMAN	137
Testing Techniques to Study the Inelastic Behavior of Steel Members —P. F. ADAMS AND T. V. GALAMBOS	149
Discussion	182
Influence of Test Machine Rigidity on the Buckling Load of Shells— W. H. HORTON AND S. C. BAILEY	183
Discussion	213

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
