Foreword

The papers in the Symposium on Automated Analyzers and Quality Control for the Petroleum Industry were presented at a meeting of ASTM Committee D-2 on Petroleum Products and Lubricants held in Houston, Tex., 1 Dec. 1966. The symposium chairman was W. E. Chalfant, The Atlantic Richfield Co.

Contents

Introduction	1
Instrumentation for Quality Assurance in Refineries—W. V. CROPPER	3
Advanced Process Chromatograph and Modern Petroleum Plant Analysis and Control Requirements—T. C. WHERRY	16
Automatic Blending and Inspection of Lubricating Oils at the Refin- ery—C. A. NELSON	24
In-Line Gasoline Blending Trends, Economics, and the Use of Con- tinuous Analyzers for Quality Control—B. G. CRANE	31
Quality Assurance in Petroleum Pipeline Transfer Operations—R. C. MASON	43
Quality Assurance in Jet Fuel Transfer Operations—I. T. FRITZ	49
General Discussion	60

THIS PUBLICATION is one of many issued by the American Society for Testing and Materials in connection with its work of promoting knowledge of the properties of materials and developing standard specifications and tests for materials. Much of the data result from the voluntary contributions of many of the country's leading technical authorities from industry, scientific agencies, and government.

Over the years the Society has published many technical symposiums, reports, and special books. These may consist of a series of technical papers, reports by the ASTM technical committees, or compilations of data developed in special Society groups with many organizations cooperating. A list of ASTM publications and information on the work of the Society will be furnished on request.
