Foreword

The Symposium on Fatigue of Compacted Bituminous Aggregate Mixtures was presented at the Seventy-fourth Annual Meeting of ASTM held in Atlantic City, N.J., 27 June through 2 July, 1971. Committee D-4 on Road and Paving Materials sponsored the symposium acting on the original idea proposed by L. F. Rader. B. M. Gallaway, Texas A & M University, presided as symposium chairman. Special commendation should be extended to the members of the entire committee and especially to W. G. Gunderman, V. P. Puzinauskas, W. H. Goetz, B. F. Kallas, and J. A. Epps for their assistance.
