Foreword

The papers in this volume were presented at two symposia sponsored by the American Society for Testing and Materials through its Committee G-1 on Corrosion of Metals and Subcommittee G01.09 on Corrosion in Natural Waters.

The symposium on Corrosion in Geothermal Systems was cosponsored by the Metallurgical Society of the American Institute of Mining, Metallurgical, and Petroleum Engineers. This symposium was held in New Orleans, La., on 19-20 Feb. 1979.

The symposium on Geothermal Scaling and Corrosion was cosponsored by the Industrial and Engineering Chemistry Division of the American Chemical Society and was held on 4-5 April 1979 in Honolulu, Hawaii.

Both symposia were cochaired by L. A. Casper and T. R. Pinchback, both of the Idaho National Engineering Laboratory, E G & G Idaho, Inc. These men also served as editors of this publication.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Introduction	1
Chemistry and Materials in Geothermal Systems—R. L. MILLER	3
Thermodynamics of Corrosion for Geothermal Systems—D. D. MACDONALD	10
Material Selection Guidelines for Geothermal Power Systems—An Overview—MARSHALL CONOVER, PETER ELLIS, AND ANNE CURZON	24
Application of Linear Polarization Techniques to the Measurement of Corrosion Rates in Simulated Geothermal Brines—M. J. DANIELSON	41
Corrosion Protection of Solar-Collector Heat Exchangers and Geothermal Systems by Electrodeposited Organic Films—G. H. SCHNAPER, V. R. KOCH, AND S. B. BRUMMER	57
Preliminary Evaluation of Materials for Fluidized Bed Technology in Geothermal Wells at Raft River, Idaho, and East Mesa, California—W. J. DIRK, C. A. ALLEN, AND R. E. McATEE	69
Surface Corrosion of Metals in Geothermal Fluids at Broadlands, New Zealand—W. R. BRAITHWAITE AND K. A. LICHTI	81
Corrosion in Geothermal Brines of the Salton Sea Known Geothermal Resource Area—S. D. CRAMER AND J. P. CARTER	113
Corrosion of Structural Steels in High-Salinity Geothermal Brine—W. T. LEE AND D. KRAMER	142
Degradation of Elastomers in Geothermal Environments—C. ARNOLD, JR., K. W. BIEG, AND J. A. COQUAT	155
Polymeric and Composite Materials for Use in Systems Utilizing Hot, Flowing Geothermal Brine III—L. E. LORENSEN, C. M. WALKUP, AND C. O. PRUNEDA	164

Concrete Polymer Materials as Alternative Materials of Construction for Geothermal Applications—Field Test Evaluations—J. J. FONTANA AND A. N. ZELDIN	180
Organosiloxane Polymer Concrete for Geothermal Environments—A. N. ZELDIN, L. E. KUKACKA, J. J. FONTANA, AND N. R. CARCIELLO	194
Treatment Methods for Geothermal Brines—S. L. PHILLIPS, A. K. MATHUR, AND WARREN GARRISON	207
Chemical Logging of Geothermal Wells—R. E. McATEE, C. A. ALLEN, AND L. C. LEWIS	225
Round-Robin Evaluation of Methods for Analysis of Geothermal Brine—J. C. WATSON	236
Summary	259
Index	261
