Foreword

F. A. Lowenheim had nearly completed the final revision of *Guide to the Selection and Use of Electroplated and Related Finishes* at the time of his death in August 1980. Final review was undertaken by his colleagues, and the manuscript was prepared for the printer by the ASTM Editorial Staff. This manual is sponsored by ASTM Committee B-8 on Metallic and Inorganic Coatings.

A Note of Appreciation to Reviewers

This publication is made possible by the authors and, also, the unheralded efforts of the reviewers. This body of technical experts whose dedication, sacrifice of time and effort, and collective wisdom in reviewing the papers must be acknowledged. The quality level of ASTM publications is a direct function of their respected opinions. On behalf of ASTM we acknowledge with appreciation their contribution.

Contents

Chapter 1—Scope and Purpose	1
Chapter 2—Purposes of Electroplating	4
Chapter 3—Metallic Finishes Available for Electroplating	6
Chapter 4—Advantages and Disadvantages of Electroplated Coatings	8
Chapter 5—Methods of Application	10
Chapter 6—Design for Electroplating	15
Chapter 7—Factors to be Considered in Choosing an Electroplated Coating	17
Chapter 8—Criteria of Choice	18
Chapter 9—Nature of the Basis Metal (Substrate)	28
Chapter 10—Related Finishes	32
Chapter 11—Properties of Coating Metals	37
Chapter 12—Tests for Compliance	56
Conclusion	62
