

## Why should I join ASTM?

Today, thousands of professionals are engaged in ASTM International's standards development process. They embrace the process and have effectively harnessed the power of their membership with ASTM. You can join them. Your ASTM Participating Membership is a tool that will help you successfully reach your business goals in many ways. Embrace the process.

### *Provides networking opportunities*

If you are new to the industry, you'll be exposed to the top experts in the field. You can jump start your career by making contacts with individuals that can mentor you and help you gain new insights. For industry veterans, ASTM is a great place to find new customers, meet with government regulators, and gain international recognition. You can attend meetings in person or virtually with stakeholders from around the world and across a wide spectrum of disciplines.

### *Helps you strategize*

Your involvement in the standards development process gives you first hand knowledge of new actions being proposed. You can provide your organization valuable information that can impact both long term and short term business goals.

### *Opens the door for your ideas*

ASTM provides a forum for you to expose that new product or test method or technique that you discovered to stakeholders from around the world. You can get feedback and gain support for your ideas and see them implemented and accepted globally.

### *Rewards achievement*

ASTM has a robust awards program that recognizes accomplishments of individuals that make significant contribution to standardization. In 2007 the Advantage Award was introduced as an annual paper contest which offers a top prize of \$15,000 for case studies on the benefits of using ASTM standards.

### *Gives you access to standards*

You can select any volume from the Annual Book of ASTM Standards in the format that works best for you (online, print or CD). The cost of that volume is covered by the annual administrative fee of \$75.

### *Empowers you*

You can VOTE and voice your opinion on standards proposals 24-7 using ASTM's online electronic balloting system. Or introduce a work item, and watch it evolve into the next globally accepted standard, test method or best practice for the industry.
