# Table of Contents

1. Introduction to Comparing World Steel Standards
   - Myth and Methodology When Comparing Steel Standards
   - Comparative and Closest Match
   - Organization
   - Definitions of Steel Terms
   - Cautionary Note
   - Questions Regarding the Rules of Comparison
   - Non-Comparable Steels
   - Criteria for Comparing Steels
   - List of Comparison Rules
   - Brief Introduction to Steel Standards and Designation Systems
   - ASTM Designation System
   - ASTM Referenced Standards and Supplementary Requirements
   - SAE Designation System and Related AISI Designation System
   - Carbon and Alloy Steels
   - UNS Designation System
   - Canadian Standards Association (CSA)
   - Introduction to European (EN) Standard Steel Designation System
   - EN 10027 Standard Designation System for Steels
   - Steel Names
   - Steel Numbers
   - Former National Standards Superseded by CEN Standards
   - Indexes in this Handbook

2. Carbon and Alloy Steels for General Use
   - 2.1 Chemical Composition of Carbon Steels for General Use
   - 2.2 Chemical Composition of High Manganese Carbon Steels for General Use
   - 2.3 Chemical Composition of Alloy Steels for General Use
     - 2.3.1 Chromium (Cr) Steels
     - 2.3.2 Chromium-Molybdenum (Cr-Mo) Steels
     - 2.3.3 Chromium-Nickel (Cr-Ni) Steels
     - 2.3.4 Nickel-Chromium-Molybdenum (Ni-Cr-Mo) Steels
     - 2.3.5 Chromium-Molybdenum-Aluminum (Cr-Mo-Al) Steels
     - 2.3.6 Boron (B) Steels
     - 2.3.7 Chromium-Vanadium (Cr-V) Steels

3. Structural Steel Plates
   - 3.1 Carbon Steels for Structural Steel Plates
   - 3.1A Mechanical Properties of Carbon Steels for Structural Steel Plates
   - 3.1B Chemical Composition of Carbon Steels for Structural Steel Plates
   - 3.2 Alloy Steels for Structural Steel Plates
     - 3.2.1A Mechanical Properties of High-Strength Low-Alloy Structural Steel Plates
     - 3.2.1B Chemical Composition of High-Strength Low-Alloy Structural Steel Plates
     - 3.2.2A Mechanical Properties of Alloy Steels for Structural Steel Plates
     - 3.2.2B Chemical Composition of Alloy Steels for Structural Steel Plates
   - 3.3 Structural Steels with Improved Atmospheric Corrosion-Resistance
     - 3.3A Mechanical Properties of Structural Steels with Improved Atmospheric Corrosion-Resistance
     - 3.3B Chemical Composition of Structural Steels with Improved Atmospheric Corrosion-Resistance

4. Pressure Vessel Steel Plates
   - 4.1 Carbon Steels for Pressure Vessel Plates
   - 4.1A Mechanical Properties of Carbon Steels for Pressure Vessel Plates
   - 4.1B Chemical Composition of Carbon Steels for Pressure Vessel Plates
   - 4.2 Carbon Steels for Pressure Vessel Plates - With Impact Testing Below -20°C
     - 4.2A Mechanical Properties of Carbon Steels for Pressure Vessel Plates - With Impact Testing Below -20°C
     - 4.2B Chemical Composition of Carbon Steels for Pressure Vessel Plates - With Impact Testing Below -20°C
   - 4.3 ½Mo Alloy Steels for Pressure Vessel Plates
     - 4.3A Chemical Composition of ½Mo Alloy Steels for Pressure Vessel Plates
     - 4.3B Mechanical Properties of ½Mo Alloy Steels for Pressure Vessel Plates
4.4 Cr-Mo Alloy Steels for Pressure Vessel Plates
4.4.1A Chemical Composition of 3Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.1B Mechanical Properties of 3Cr-1Mo Alloy Steel for Pressure Vessel Plates
4.4.2A Chemical Composition of 1Cr-Mo Alloy Steels for Pressure Vessel Plates
4.4.2B Mechanical Properties of 1Cr-Mo Alloy Steels for Pressure Vessel Plates
4.4.3A Chemical Composition of 1Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.3B Mechanical Properties of 1Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.4A Chemical Composition of 2Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.4B Mechanical Properties of 2Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.5A Chemical Composition of 3Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.5B Mechanical Properties of 3Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.6A Chemical Composition of 5Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.6B Mechanical Properties of 5Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.7A Chemical Composition of 9Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.4.7B Mechanical Properties of 9Cr-1Mo Alloy Steels for Pressure Vessel Plates
4.5 Ni Alloy Steels for Pressure Vessel Plates
4.5.1A Chemical Composition of 2Ni Alloy Steels for Pressure Vessel Plates
4.5.1B Mechanical Properties of 2Ni Alloy Steels for Pressure Vessel Plates
4.5.2A Chemical Composition of 3Ni Alloy Steels for Pressure Vessel Plates
4.5.2B Mechanical Properties of 3Ni Alloy Steels for Pressure Vessel Plates
4.5.3A Chemical Composition of 4Ni Alloy Steels for Pressure Vessel Plates
4.5.4A Mechanical Properties of 4Ni Alloy Steels for Pressure Vessel Plates
4.5.4A Chemical Composition of 3Ni Alloy Steels for Pressure Vessel Plates
4.5.4B Mechanical Properties of 3Ni Alloy Steels for Pressure Vessel Plates
4.5.5A Chemical Composition of 5Ni Alloy Steels for Pressure Vessel Plates
4.5.5B Mechanical Properties of 5Ni Alloy Steels for Pressure Vessel Plates
4.5.6A Chemical Composition of 9Ni Alloy Steels for Pressure Vessel Plates
4.5.6B Mechanical Properties of 9Ni Alloy Steels for Pressure Vessel Plates
4.6 Ni-Mo Alloy Steels for Pressure Vessel Plates
4.6.1A Chemical Composition of 2Ni-3Mo Alloy Steels for Pressure Vessel Plates
4.6.1B Mechanical Properties of 2Ni-3Mo Alloy Steels for Pressure Vessel Plates
4.6.2A Chemical Composition of 3Ni-3Mo Alloy Steels for Pressure Vessel Plates
4.6.2B Mechanical Properties of 3Ni-3Mo Alloy Steels for Pressure Vessel Plates
4.7 Ferritic and Martensitic Stainless Steels for Pressure Vessel Plates
4.7.1A Chemical Composition of Ferritic and Martensitic Stainless Steels for Pressure Vessel Plates
4.7.2B Mechanical Properties of Ferritic and Martensitic Stainless Steels for Pressure Vessel Plates
4.8 Austenitic Stainless Steels for Pressure Vessel Plates
4.8.1A Chemical Composition of Austenitic Stainless Steels for Pressure Vessel Plates
4.8.2B Mechanical Properties of Austenitic Stainless Steels for Pressure Vessel Plates
4.9 Duplex (Ferritic-Austenitic) Stainless Steels for Pressure Vessel Plates
4.9.1A Chemical Composition of Duplex (Ferritic-Austenitic) Stainless Steels for Pressure Vessel Plates
4.9.2B Mechanical Properties of Duplex (Ferritic-Austenitic) Stainless Steels for Pressure Vessel Plates

5. Steel Tubes and Pipes
5.1 Carbon Steel Tubes for General and Structural Applications
5.1.1A Mechanical Properties of Carbon Steel Tubes for General and Structural Applications
5.2 Alloy Steel Tubes for General and Structural Applications
5.2.1A Chemical Composition of Alloy Steel Tubes for General and Structural Applications
5.3 Stainless Steel Tubes for General and Structural Applications
5.3.1A Chemical Composition of Ferritic and Martensitic Stainless Steel Tubes for General and Structural Applications
5.3.1B Mechanical Properties of Ferritic and Martensitic Stainless Steel Tubes for General and Structural Applications
5.3.2A Chemical Composition of Austenitic Stainless Steel Tubes for General and Structural Applications
5.3.2B Mechanical Properties of Austenitic Stainless Steel Tubes for General and Structural Applications
5.3.3A Chemical Composition of Duplex Stainless Steel Tubes and Pipes for General and Structural Applications
5.3.3B Mechanical Properties of Duplex Stainless Steel Tubes and Pipes for General and Structural Applications
5.4 Carbon Steel Pipes and Tubes for Low-Temperature Service
5.4.1A Mechanical Properties of Carbon Steel Pipes and Tubes for Low-Temperature Service
5.5.1A Chemical Composition of Alloy Steel Pipes and Tubes for Low-Temperature Service
5.5B Mechanical Properties of Alloy Steel Tubes and Pipes for Low-Temperature Service
5.6 Carbon Steel Tubes and Pipes for Pressure Purposes
5.6A Mechanical Properties of Carbon Steel Tubes and Pipes for Pressure Purposes
5.6B Chemical Composition of Carbon Steel Tubes and Pipes for Pressure Purposes
5.7 Carbon Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.7A Mechanical Properties of Carbon Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.7B Chemical Composition of Carbon Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8 Steel Tubes and Pipes (Continued)
5.8.1A Chemical Composition of ¼Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.1B Mechanical Properties of ¼Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.2A Chemical Composition of ½Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.2B Mechanical Properties of ½Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.3A Chemical Composition of ⅜Cr-¾Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.3B Mechanical Properties of ⅜Cr-¾Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.4A Chemical Composition of ½Cr-1Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.4B Mechanical Properties of ½Cr-1Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.5A Chemical Composition of 1Cr-½Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.5B Mechanical Properties of 1Cr-½Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.6A Chemical Composition of 1¼Cr-⅜Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.6B Mechanical Properties of 1¼Cr-⅜Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.7A Chemical Composition of 2¼Cr-1Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.7B Mechanical Properties of 2¼Cr-1Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.8A Chemical Composition of 5Cr-⅜Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.8B Mechanical Properties of 5Cr-⅜Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.9A Chemical Composition of 9Cr-1Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.8.9B Mechanical Properties of 9Cr-1Mo Alloy Steel Tubes and Pipes for Pressure Purposes at High Temperatures
5.9 Stainless Steel Tubes and Pipes for Pressure Purposes and High Temperatures
5.9.1A Chemical Composition of Ferritic and Martensitic Stainless Steel Tubes and Pipes for Pressure Purposes and High Temperatures
5.9.1B Mechanical Properties of Ferritic and Martensitic Stainless Steel Tubes and Pipes for Pressure Purposes and High Temperatures
5.9.2A Chemical Composition of Austenitic Stainless Steel Tubes and Pipes for Pressure Purposes and High Temperatures
5.9.2B Mechanical Properties of Austenitic Stainless Steel Tubes and Pipes for Pressure Purposes and High Temperatures
5.10 Line Pipe Steels
5.10.1A Mechanical Properties of Line Pipe Steels Without Notch Toughness Requirements
5.10.1B Chemical Composition of Line Pipe Steels Without Notch Toughness Requirements
5.10.2A Mechanical Properties of Line Pipe Steels With Notch Toughness Requirements
5.10.2B Chemical Composition of Line Pipe Steels With Notch Toughness Requirements

6. Steel Forgings
6.1 Carbon Steel Forgings
6.1.1A Mechanical Properties of Carbon Steel Forgings for General Use
6.1.1B Chemical Composition of Carbon Steel Forgings for General Use
6.1.2A Mechanical Properties of Carbon Steel Forgings for Piping, Pressure Vessel and Components

7. Steel Castings

7.1 Cast Carbon Steels

7.1.1A Mechanical Properties of Cast Carbon Steel for General and Structural Applications

7.1.1B Chemical Composition of Cast Carbon Steel for General and Structural Applications

7.1.2A Mechanical Properties of Cast Carbon Steel for Pressure Purposes at High Temperatures

7.1.2B Chemical Composition of Cast Carbon Steel for Pressure Purposes at High Temperatures

7.1.3A Mechanical Properties of Cast Carbon Steel for Pressure Purposes at Low Temperatures

7.1.3B Chemical Composition of Cast Carbon Steel for Pressure Purposes at Low Temperatures

7.2 Cast Manganese Steels

7.2A Chemical Composition of Cast Manganese Steels

7.2B Mechanical Properties of Cast Manganese Steels

7.3 Cast Alloy Steels

7.3.1A Chemical Composition of Cast Alloy Steels for General and Structural Purposes

7.3.1B Mechanical Properties of Cast Alloy Steels for General and Structural Purposes

7.3.2A Chemical Composition of Cast Alloy Steels for Pressure Purposes at High Temperatures

7.3.2B Mechanical Properties of Cast Alloy Steels for Pressure Purposes at High Temperatures

7.3.3A Chemical Composition of Cast Alloy Steels for Pressure Purposes at Low Temperatures
7.3.3B Mechanical Properties of Cast Alloy Steels for Pressure Purposes at Low Temperatures
7.4 Cast Stainless Steels
7.4.1 Cast Stainless Steels for General and Corrosion Resistant Applications
7.4.1.1A Chemical Composition of Martensitic and Ferritic Stainless Steels for General and Corrosion Resistant Applications
7.4.1.1B Mechanical Properties of Martensitic and Ferritic Stainless Steels for General and Corrosion Resistant Applications
7.4.1.2A Chemical Composition of Austenitic Stainless Steels for General and Corrosion Resistant Applications
7.4.1.2B Mechanical Properties of Austenitic Stainless Steels for General and Corrosion Resistant Applications
7.4.2 Cast Stainless Steels for Pressure Purposes
7.4.2.1A Chemical Composition of Martensitic and Ferritic Stainless Steels for Pressure Purposes
7.4.2.1B Mechanical Properties of Martensitic and Ferritic Stainless Steels for Pressure Purposes
7.4.2.2A Chemical Composition of Austenitic Stainless Steels for Pressure Purposes
7.4.2.2B Mechanical Properties of Austenitic Stainless Steels for Pressure Purposes
7.5 Cast Heat Resistant Steels
7.5A Chemical Composition of Cast Heat Resistant Steels
7.5B Mechanical Properties of Cast Heat Resistant Steels

8. Wrought Stainless Steels
8.1 Stainless Steels: Plate, Sheet and Strip
8.1.1A Chemical Composition of Martensitic Stainless Steels
8.1.1B Mechanical Properties of Martensitic Stainless Steels
8.1.2A Chemical Composition of Ferritic Stainless Steels
8.1.2B Mechanical Properties of Ferritic Stainless Steels
8.1.3A Chemical Composition of Austenitic Stainless Steels
8.1.3B Mechanical Properties of Austenitic Stainless Steels
8.1.4A Chemical Composition of Precipitation-Hardening Stainless Steels
8.1.4B Mechanical Properties of Precipitation-Hardening Stainless Steels
8.1.5A Chemical Composition of Duplex (Ferritic-Austenitic) Stainless Steels
8.1.5B Mechanical Properties of Duplex (Ferritic-Austenitic) Stainless Steels
8.2 Stainless Steels: Bar
8.2.1A Chemical Composition of Martensitic Stainless Steels
8.2.1B Mechanical Properties of Martensitic Stainless Steels
8.2.2A Chemical Composition of Ferritic Stainless Steels
8.2.2B Mechanical Properties of Ferritic Stainless Steels
8.2.3A Chemical Composition of Austenitic Stainless Steels
8.2.3B Mechanical Properties of Austenitic Stainless Steels
8.2.4A Chemical Composition of Precipitation-Hardening Stainless Steels
8.2.4B Mechanical Properties of Precipitation-Hardening Stainless Steels
8.2.5A Chemical Composition of Duplex Stainless Steels
8.2.5B Mechanical Properties of Duplex Stainless Steels

9. Steels for Special Use
9.1 Free-Machining Steels
9.1.1 Chemical Composition of Resulfurized Carbon Steels for Free-Machining Applications
9.1.2 Chemical Composition of Rephosphorized and Resulfurized Carbon Steels for Free-Machining Applications
9.1.3 Chemical Composition of Resulfurized and Leaded Carbon Steels for Free-Machining Applications
9.1.4 Chemical Composition of Rephosphorized, Resulfurized, and Leaded Carbon Steels for Free-Machining Applications
9.1.5 Chemical Composition of Free-Machining Stainless Steels
9.2 Spring Steels
9.2.1 Chemical Composition of Cold Rolled Carbon Spring Steels
9.2.1.1 Chemical Composition of Cold Rolled Carbon Wire Spring Steels
9.2.1.2 Chemical Composition of Cold Rolled Carbon Strip Spring Steels
9.2.2 Chemical Composition of Hot Rolled Alloy Spring Steels
9.2.2.1 Chemical Composition of Hot Rolled Si Alloy Spring Steels
9.2.2.2 Chemical Composition of Hot Rolled Cr Alloy Spring Steels
9.2.2.3 Chemical Composition of Hot Rolled Cr-Si Alloy Spring Steels
9.2.2.4 Chemical Composition of Hot Rolled Cr-Mo Alloy Spring Steels
9.2.2.5 Chemical Composition of Hot Rolled Cr-V Alloy Spring Steels
9.2.2.6 Chemical Composition of Hot Rolled Cr-B Alloy Spring Steels
9.2.3 Chemical Composition of Stainless Spring Steels
9.3 Tool Steels
9.3.1 Chemical Composition of Carbon Tool Steels
9.3.2 Chemical Composition of High-Speed Tool Steels
9.3.2.1 Chemical Composition of Tungsten Type High Speed Tool Steels
9.3.2.2 Chemical Composition of Molybdenum Type High Speed Tool Steels
9.3.3 Chemical Composition of Cold Work Tool Steels
9.3.4 Chemical Composition of Hot Work Tool Steels
9.3.5 Chemical Composition of Special Purpose Tool Steels
9.4 Bearing Steels
9.4.1 Chemical Composition of Bearing Steels
