

Manual 70

## **Quality Control of Soil Compaction Using ASTM Standards**

Table of Contents

List of ASTM Standards

### **Chapter 1: Introduction**

- A. Purpose and Scope of this Manual
  - B. General History of Soil Compaction and Methods of Control
  - C. General Use of Compaction Tests, Density Tests, and Project Specifications
  - D. Updated Schedule for ASTM Standard Test Methods
- References

### **Chapter 2: Means, Methods, and Mechanics of Compaction**

- A. Description of the Types and Terms for Fill Compaction
  - B. Theoretical Background—Mechanics of Compaction
  - C. Influence of Compaction on Engineering Properties
  - D. Mechanics of Compaction for Soils in Adverse Weather Conditions
  - E. Compaction Equipment
- References

### **Chapter 3: Laboratory Compaction Tests**

- A. Purpose and Use of Laboratory Compaction Tests
  - B. Description of Standard and Modified Compaction Tests
  - C. Description of the Index Density and Unit Weight Test Methods
- References

### **Chapter 4: Standard Test Procedures for Determining Density or Unit Weight of Soil in Place**

- A. Purpose and Use of In-Place Density or Unit Weight Tests
  - B. Standard Tests for Determining In-Place Density or Unit Weight
  - C. Standard Tests for Density Testing and Quality Control of Very Coarse-Grained Soils (Rock Fill)
- References

### **Chapter 5: Standard Test Procedures for Determining the Water Content of Soils**

- A. Purpose and Use of Water Content Test
  - B. Standard Tests for Determining Water Content of Soil
- References

### **Chapter 6: Quality Control and the Coordinated Use of Laboratory and In-Place Tests for Compaction Testing**

- A. Silts and Clays or Sandy Fine Grained Soil with Little or No Gravel
  - B. Silty or Clayey Soil with Gravel (5 % or More Retained on the No. 4 Sieve and up to 30 % Retained on the 3/4-in. Sieve)
  - C. Silty or Clayey Sand or Gravel Mixtures, or Both with More than 12 % Fines and More than 30% Retained on the 3/4-in. Sieve
  - D. Relatively Clean Sand or Gravel Mixtures, or Both with Less than 12 % Fines (Material Passing the No. 200 Sieve) and up to 30 % Retained on the 3/4-in. Sieve
  - E. Quality-Control Checks
  - F. Selection of the Standard Reference Density
  - G. Summary
- References
