Materials Performance & Characterization

Contents:
Special Issue on Metallography, Part 2

Guest Editor: George F. Vander Voort

Overview

HISTORICAL STUDIES

195 The History of Metallography at Lehigh University—M. R. Notis

209 A Multianalytical Approach for the Study on Manufacturing Process in Ancient Bronze Coffin From Luristan, Western Iran—Omid Oudbashi, Morteza Hessari, Ata Hasanpour, and Arman Shishegar

STUDIES USING ASTM E04 TEST METHODS

224 Quantitative Description of Microstructural Banding in Steels—Alexander Kazakov, Daniil Kiselev, Elena Kazakova, George F. Vander Voort, and Lev Chigintsev

MICROSCOPY CHARACTERIZATION STUDIES

237 Identification of Intermetallic Phases in an Automotive Grade Aluminum A319 Alloy—H. F. Lopez

256 Structural Investigation and Control of Multi-Pass Gas-Shielded Flux-Cored Arc Weldments—Alexander Kazakov, Elena Kazakova, Michael Karasev, and Dar’ya Lubochko

MICROSCOPY CHARACTERIZATION STUDIES

346   Anisotropic Nature of Raw, Radially Strained, and Radially Strained and Aged Steel Tubes—J. N. Strickland, B. Ohl, G. Chitwood, K. Krishnan, G. Kohn, and M. L. Young

MICROSCOPY USED TO STUDY METAL PROCESSES

376   Heat-Affected Zone Formation in Electrospark-Deposition Additive Manufacturing on Ultrahigh-Strength Steel—W. E. Wood, B. Adam, J. Kadali, R. Talla, and T. Langston

CHARACTERIZATION STUDIES OF DUPLEX STAINLESS STEELS

437   Strain-Induced Martensite Detection Methods in Cold-Rolled Duplex Stainless Steels—M. Breda, E. Ramous, E. Almanza, and I. Calliari
