Surface Characteristics of Roadways: International Research and Technologies

W. E. Meyer and J. Reichert, editors

Symposium cosponsored by:

ASTM
1916 Race Street
Philadelphia, PA 19103

PIARC/AIPCR
17, Rue Guénégau
75006 Paris, France
Contents

Introduction

SKID RESISTANCE AND TEXTURE

Skid Resistance and Road-Surface Texture—H. AUGUSTIN 5

The Influence of Polishing Resistance of Sand on Skid Resistance of Asphalt Concrete—J. DAMES 14

The Introduction of a Skidding-Resistance Policy in Great Britain—T. GARGETT 30

The Use of Fuzzy-Sets Mathematics for Analysis of Pavement Skid Resistance—X. HUIHUA AND J. J. HENRY 39

Effect of Water-Film Thickness on Tire-Pavement Friction—B. T. KULAKOWSKI AND D. W. HARWOOD 50

A New Laser, Noncontact Method for Measuring Vehicle-to-Pavement Distance—J. M. CAUSSIGNAC, G. MOREL, AND J. CHARRIER 77

Measurement of Skidding Resistance and Surface Texture and the Use of Results in the United Kingdom—C. K. KENNEDY, A. E. YOUNG, AND I. C. BUTLER 87

A Closed-Loop Calibration Procedure for a British Pendulum Tester—B. T. KULAKOWSKI, J. J. HENRY, AND C. LIN 103

Evaluating the Polishing Properties of Aggregates and Bituminous Pavement Surfaces by Means of the Penn State Reciprocating Polishing Machine—N. NITTA, K. SAITO, AND S. ISOZAKI 113

A Numerical Analysis of the Friction Mechanism of Grooved Road Surfaces—N. PURUSHOTHAMAN, B. S. HEATON, AND I. D. MOORE 127

Aircraft/Ground-Vehicle Friction Measurement Study—T. J. YAGER 154

PAVEMENT ROUGHNESS

The Development of a Simple Instrument for Measuring Pavement Roughness and Predicting Pavement Rideability—M. S. JANOFF AND G. F. HAYHOE 171
Equipment and Methods for Assessing Surface Characteristics of a Road Network—P. G. JORDAN 184

Dynamic Behavior of a Vehicle on a Rutted Road—T. NAKATSUI, T. KAKU, T. FUJWARA, T. HAGIWARA, AND Y. ONODERA 198

Analysis of Transverse Unevenness with Respect to Traffic Safety—J. KAMPLADE 211

Surface-Smoothness Evaluation and Specifications for Flexible Pavements—W. UDDIN, W. R. HUDSON, AND G. ELKINS 224

The Noss Roughness Meter: A Norwegian Road-Roughness Measurement System—P. M. NOSS 237

Loss of Control of Trucks Caused by Pavement Edge and Shoulder Conditions—D. L. IVEY, H. E. ROSS, JR., D. L. SICKING, AND C. C. MACADAM 245

The Prediction of Pavement Ride Quality from Profile Measurements of Pavement Roughness—M. S. JANOFF 259

Some Surface Roughness, Loss, and Slipperiness Characteristics of Unpaved Roads—P. PAIGE-GREEN 268

Use of the Inertial Profilometer to Calibrate the Commonwealth of Kentucky Department of Highways' Mays Ride Meter System—E. B. SPANGLER, R. L. RIZENBERGS, J. L. BURCHETT, AND D. C. ROBINSON 292

PAVEMENT DISTRESS AND MANAGEMENT

High-Performance Measurements for Programming and Controlling Maintenance of Surface Characteristics: Operational Systems in Use on Italian Motorways—G. CAMOMILLA, M. MALGARINI, AND G. PERONI 305

Surface-Deterioration Resistance of Concrete Pavement Materials—T. F. FWA AND P. PARAMASIVAM 327

Errors in Automated Pavement Surface Distress Data Collection—F. HUMPLICK AND S. MCNEIL 343

Measurements and Criteria: Essential Elements for Pavement Management—R. JORDENS AND B. DEWIT 355

Theoretical Principles, Methods, and Equipment for Pavement-Condition Measurements Specific for Road Management Systems—M. PROCHÁZKA, O. KROPÁČ, J. SPRINC, AND F. LEHOVEC 366

ROLLING RESISTANCE, FUEL ECONOMY, NOISE, AND OTHER RELATED SUBJECTS

Road-Surface Influence on Tire Rolling Resistance—G. DESCORNET

Influence of Road-Surface Roughness on Vehicle Operating Costs: Reviewing the Evidence from Developing Countries—R. HARRISON

Influence of Road Surface Roughness on Tire Noise Generation in the Federal Republic of Germany—S. HUSCHEK

Road Conditions and Accidents in Winter—T. HAGIWARA, Y. ONODERA, T. FUJIWARA, T. NAKATSUJI, AND T. EAKU

The Influence of Pavement Evenness and Macrotexture on Fuel Consumption—R. LAGANIER AND J. LUCAS

Road Macro- and Megatexture Influence on Fuel Consumption—U. S. I. SANDBERG

Fuel Consumption of Vehicles as Affected by Road-Surface Characteristics—H. W. DU PLESSIS, A. T. VISSE, AND P. C. CURTAYNE

Measurement of Rolling Resistance Using an Eccentrically Weighted Oscillating Wheel—R. J. HILL

Optimization of Road-Surface Characteristics: A Concept for a Research Program in the Federal Republic of Germany—E.-U. HIRSCH

Splash and Spray—G. B. PILKINGTON II
