Overview ix

INVITED PAPER

Zirconium-Alloy Corrosion: A Review Based on an International Atomic EnergyAgency (IAEA) Meeting—D. G. FRANKLIN AND P. M. LANG 3
Discussion 30

FABRICATION

Discussion 46

Discussion 60

Discussion 74

Discussion 95

MECHANICAL PROPERTIES

Discussion 118

Effect of Tensile Deformation on Crystallographic Texture in Zircaloy Sheet—S. T. MAHMOOD AND K. L. MURTY 119
Discussion 138

Correlation of Microstructure and Mechanical Properties of Zr-Sn Alloys—S. L. WADEKAR, S. BANERJEE, V. V. RAMAN, AND M. K. ASUNDI 140
Discussion 155
Microstructure of Zr-2.5Nb Alloy Pressure Tubing—D. O. NORTHWOOD, X. MENG-BURANY, AND B. D. WARR 156
Discussion 172

Growth in Zircaloy-4 Fuel Clad Arising from Oxidation at Temperatures in the Range 623 to 723 K—A. T. DONALDSON 177
Discussion 196

Effects of Recrystallization and Neutron Irradiation on Creep Anisotropy of Zircaloy Cladding—K. L. MURTY AND S. T. MAHMOOD 198
Discussion 216

The Contribution of Irradiation Growth to Pressure Tube Deformation—R. A. HOLT AND R. G. FLECK 218
Discussion 228

Discussion 243

Fracture Toughness of Irradiated Zr-2.5Nb Pressure Tubes from CANDU Reactors—C. K. CHOW, C. E. COLEMAN, R. R. HOSBONS, P. H. DAVIES, M. GRIFFITHS, AND R. CHOUBEY 246
Discussion 273

CORROSION: EFFECTS OF PROCESSING AND ALLOYING

Controlled Composition Zircaloy-2 Uniform Corrosion Resistance—R. A. GRAHAM AND C. M. EUCKEN 279
Discussion 301

Discussion 316

Investigation of Nodular Corrosion Mechanism for Zircaloy Products—C. T. WANG, C. M. EUCKEN, AND R. A. GRAHAM 319
Discussion 345

Development of Highly Corrosion Resistant Zirconium-Base Alloys—T. ISOBE AND Y. MATSUO 346
Discussion 367

Effect of Alloying Elements on Uniform Corrosion Resistance of Zirconium-Based Alloy in 360°C Water and 400°C Steam—M. HARADA, M. KIMPARA, AND K. ABE 368
Discussion 390
CORROSION: MECHANISMS

Oxide Growth Mechanism on Zirconium Alloys—F. GARZAROLLI, H. SEIDEL, R. TRICOT, AND J. P. GROS

Effect of Alloying Elements in Zircaloy on Photo-Electrochemical Characteristics of Zirconium Oxide Films—M. INAGAKI, M. Kanno, AND H. MAKI

Microanalysis of the Matrix and the Oxide-Metal Interface of Uniformly Corroded Zircaloy—B. WADMAN AND H.-O. ANDRÉN

Precipitate Behavior in Zircaloy-2 Oxide Films and Its Relevance to Corrosion Resistance—T. KUBO AND M. UNO

CORROSION: MODELING AND LITHIUM EFFECTS

Comparison of Zircaloy Corrosion Models from the Evaluation of In-Reactor and Out-of-Pile Loop Performance—PH. BILLOT AND A. GIORDANO

Enhancement of Aqueous Corrosion of Zircaloy-4 Due to Hydride Precipitation at the Metal-Oxide Interface—A. M. GARDE

Corrosion of Zircaloy in the Presence of LiOH—R. A. PERKINS AND R. A. BUSCH

Lithium Uptake and the Corrosion of Zirconium Alloys in Aqueous Lithium Hydroxide Solutions—N. RAMASUBRAMANIAN

Corrosion of Zircaloy-4 PWR Fuel Cladding in Lithiated and Borated Water Environments—I. L. BRAMWELL, P. D. PARSONS, AND D. R. TICE

Discussion

Discussion
Effects of LiOH on Pretransition Zirconium Oxide Films—B. COX AND Y.-M. WONG 643
Discussion 662

CORROSION: IN-REACTOR

Investigation of Variables That Influence Corrosion of Zirconium Alloys During Irradiation—V. F. URBANIC, R. CHOUBEY, AND C. K. CHOW 665
Discussion 680

Characteristics of Autoclave and In-Reactor Nodular Corrosion of Zircaloy—Y. H. JEONG, K. S. RHEEM, AND H. M. CHUNG 683
Discussion 715

Amorphization of Precipitates in Zircaloy under Neutron and Charged-Particle Irradiation—A. T. MOTTA, F. LEFEBVRE, AND C. LEMAIGNAN 718
Discussion 737

Oxide Characteristics and Their Relationship to Hydrogen Uptake in Zirconium Alloys—B. D. WARR, M. B. ELMOSELHI, S. B. NEWCOMB, N. S. MCINTYRE, A. M. BRENNENSTUHL, AND P. C. LICHTENBERGER 740
Discussion 756

Discussion 780

POSTER SESSION

Appendix: List of Poster Session Presentations 785
