Contents

Symposium Overview—P. W. KIRKLIN AND P. DAVID	vii
SESSION I: OVERVIEW	
Jet Fuel Thermal Stability—A Specification Writer's Viewpoint—G. L. BATCHELOR	3
Thermal Stability Testing of Aviation Turbine Fuel—A History—K. H. STRAUSS	8
Physicochemical Aspects of Aviation Fuel Thermal Stability—R. N. HAZLETT	18
Air Frame Considerations in Fuel Thermal Stability for Commercial Supersonic Flight—J. E. SCHMIDT	34
SESSION II: AVIATION ENGINE CONSIDERATIONS	
High Temperature Fuel Requirements and Payoffs—B. M. CROSWELL AND T. B. BIDDLE	57
Fuel Thermal Stability Outlook for GE Aircraft Engines in 1991—T. F. LYON	73
SESSION III: MANUFACTURING AND DISTRIBUTION CONSIDERATIONS	
The Effect of Manufacturing Processes on Aviation Turbine Fuel Thermal Stability—W. F. TAYLOR	81
The Effect of Manufacturing Processes on Aviation Turbine Fuel Thermal Stability—Handling—R. FLETCHER	90
SESSION IV, PANEL 1: ASTM D 3241, THE JFTOT TEST	
Critical Review of the JFTOT—G. DATSCHEFSKI	97
Simulation, Precision and Decision in JFTOT Testing—G. R. WILSON, III	109
