

STP 1159

***Standardization of Fretting  
Fatigue Test Methods and  
Equipment***

*M. Helmi Attia and R. B. Waterhouse, editors*

ASTM Publication Code Number (PCN)  
04-011590-30

ASTM  
1916 Race Street  
Philadelphia, PA 19103

# Contents

<b>Overview—M. H. ATTIA AND R. B. WATERHOUSE</b>	1
<b>A Historical Introduction to Fretting Fatigue—R. B. WATERHOUSE</b>	8
OPENING PAPER	
<b>The Problems of Fretting Fatigue Testing—R. B. WATERHOUSE</b>	13
FUNDAMENTAL ASPECTS OF FRETTING FATIGUE TESTING—CONCEPTUAL FRAMEWORK	
<b>Mechanisms of Fretting Fatigue and Their Impact on Test Methods Development—D. W. HOEPPNER</b>	23
<b>Testing Methods in Fretting Fatigue: A Critical Appraisal—L. VINCENT, Y. BERTHIER, AND M. GODET</b>	33
<b>Fretting and Contact Fatigue Studied with the Aid of Fretting Maps— O. B. VINGSBO</b>	49
<b>Variables of Fretting Process: Are There 50 of Them?—J. DOBROMIRSKI</b>	60
FUNDAMENTAL ASPECTS OF FRETTING FATIGUE TESTING—MECHANICS OF CONTACT	
<b>The Development of a Fretting Fatigue Experiment with Well-Defined Characteristics—D. A. HILLS AND D. NOWELL</b>	69
<b>Determination and Control of Contact Pressure Distribution in Fretting Fatigue— K. SATO</b>	85
<b>Fretting Fatigue Analysis of Strength Improvement Models with Grooving or Knurling on a Contact Surface—T. HATTORI, M. NAKAMURA, AND T. ISHIZUKA</b>	101
<b>Effect of Contact Pressure on Fretting Fatigue of High Strength Steel and Titanium Alloy—K. NAKAZAWA, M. SUMITA, AND N. MARUYAMA</b>	115

FRETTING FATIGUE TESTING—METHODS AND EQUIPMENT

- A Critical Review of Fretting Fatigue Investigations at the Royal Aerospace Establishment—D. B. RAYAPROLU AND R. COOK** 129
- Fretting Fatigue in the Power Generation Industry: Experiments, Analysis, and Integrity Assessment—T. C. LINDLEY AND K. J. NIX** 153
- Techniques for the Characterization of Fretting Fatigue Damage—C. RUIZ, Z. P. WANG, AND P. H. WEBB** 170
- The Influence of Fretting Corrosion on Fatigue Strength of Nodular Cast Iron and Steel under Constant Amplitude and Load Spectrum Tests—G. FISCHER, V. GRUBISIC, AND O. BUXBAUM** 178
- Adaptation of a Servohydraulic Testing Machine to Investigate the Life of Machine Components Operating under Fretting Conditions—J. LABEDZ** 190

ENVIRONMENTAL AND SURFACE CONDITIONS

- Improving Fretting Fatigue Strength at Elevated Temperatures by Shot Peening in Steam Turbine Steel—Y. MUTOH, T. SATOH, AND E. TSUNODA** 199
- The Fretting Fatigue Properties of a Blade Steel in Air and Vapor Environments—D. YUNSHU, Z. BAOYU, AND L. WEILI** 210
- The Application of Electrochemical Techniques to Evaluate the Role of Corrosion in Fretting Fatigue of a High Strength Low Alloy Steel—S. PRICE AND D. E. TAYLOR** 217

NONCONVENTIONAL MATERIALS AND TEST METHODS

- ACSR Electrical Conductor Fretting Fatigue at Spacer Clamps—A. CARDON, L. CLOUTIER, M. ST-LOUIS, AND A. LEBLOND** 231
- Fretting Fatigue of Carbon Fiber-Reinforced Epoxy Laminates—O. JACOBS, K. SCHULTE, AND K. FRIEDRICH** 243

CLOSING PAPER

- Fretting Fatigue Testing: Current Practice and Future Prospects for Standardization—M. H. ATTIA** 263
- Author Index** 277
- Subject Index** 279
