# Application of Accelerated Corrosion Tests to Service Life Prediction of Materials

*Gustavo Cragolino and Narasi Sridhar, editors*

ASTM Publication Code Number (PCN)  
04-011940-27

ASTM  
1916 Race Street  
Philadelphia, PA 19103

# Contents

<b>Overview—G. CRAGNOLINO AND N. SRIDHAR</b>	vii
--	-----

## LABORATORY AND FIELD DATA ANALYSIS TECHNIQUES

<b>Relationship Among Statistical Distributions, Accelerated Testing and Future Environments—R. W. STAEHLE</b>	3
<b>Life Prediction of Ammonia Storage Tanks Based on Laboratory Stress Corrosion Crack Data—R. NYBORG AND L. LUNDE</b>	27
<b>Corrosion Prediction from Accelerated Tests in the Chemical Process Industries—D. C. SILVERMAN</b>	42
<b>Composite Modeling of Atmospheric Corrosion Penetration Data—R. H. MCCUEN AND P. ALBRECHT</b>	65
<b>Application of Service Examinations to Transuranic Waste Container Integrity at the Hanford Site—D. R. DUNCAN, D. A. BURBANK, JR., B. C. ANDERSON, AND J. A. DEMETER</b>	103

## LIFE PREDICTION TECHNIQUES IN VARIOUS APPLICATIONS

<b>High Level Nuclear Waste Management in the U.S.A.—E. D. VERINK, JR.</b>	115
<b>The Development of an Experimental Data Base for the Lifetime Predictions of Titanium Nuclear Waste Containers—B. M. IKEDA, M. G. BAILEY, M. J. QUINN, AND D. W. SHOESMITH</b>	126
<b>Deterministic Predictions of Corrosion Damage to High Level Nuclear Waste Canisters—D. D. MACDONALD, M. URQUIDI-MACDONALD, AND J. LOLCAMA</b>	143
<b>Approaches to Life Prediction for High-Level Nuclear Waste Containers in the Tuff Repository—J. A. BEAVERS, N. G. THOMPSON, AND C. L. DURR</b>	165
<b>Crack Growth Behavior of Candidate Waste Container Materials in Simulated Underground Water—J. Y. PARK, W. J. SHACK, AND D. R. DIERCKS</b>	188
<b>Prediction of Localized Corrosion Using Modeling and Experimental Techniques—N. SRIDHAR, G. A. CRAGNOLINO, J. C. WALTON, AND D. DUNN</b>	204
<b>Corrosion Aspects of Copper in a Crystalline Bedrock Environment with Regard to Life Prediction of a Container in a Nuclear Waste Repository—R. SJÖBLOM</b>	224

<b>Correlation of Autoclave Testing of Zircaloy-4 to In-Reactor Corrosion Performance—R. A. PERKINS AND S-H. SHANN</b>	239
<b>The Importance of Subtle Materials and Chemical Considerations in the Development of Accelerated Tests for Service Performance Predictions—G. PALUMBO, A. M. BRENNENSTUHL, AND F. S. GONZALEZ</b>	252
<b>Corrosion Life Prediction of Oil and Gas Production Processing Equipment—J. KOLTS AND E. BUCK</b>	268
<b>Values of Corrosion Rate of Steel in Concrete to Predict Service Life of Concrete Structures—C. ANDRADE AND M. C. ALONSO</b>	282

#### EXPERIMENTAL TECHNIQUES

<b>A New Index for the Crevice Corrosion Resistance of Materials—Y. XU AND H. W. PICKERING</b>	299
<b>Acceleration of Stress-Corrosion Cracking Test for High-Temperature, High-Purity Water Environments by Means of Artificial Crevice Application—M. AKASHI</b>	313
<b>Application of a Multipotential Test Method for Rapid Screening of Austenitic Stainless Steels in Process Environments—P. A. AALTONEN, P. K. POHJANNE, S. J. TÄHTINEN, AND H. E. HÄNNINEN</b>	325
<b>Spot-Welded Specimen Maintained Above the Crevice-Repassivation Potential to Evaluate Stress Corrosion Cracking Susceptibility of Stainless Steels in NaCl Solutions—S. TSUJIKAWA, T. SHINOHARA, AND W. LICHANG</b>	340
<b>Constant Extension Rate Testing and Predictions of In-Service Behavior: The Effect of Specimen Dimensions—M. R. LOUTHAN, JR., AND W. C. PORR, JR.</b>	355
<b>Applications of Electrochemical Potentiokinetic Reactivation Test To On-Site Measurements on Stainless Steels—M. VERNEAU, J. CHARLES, AND F. DUPOIRON</b>	367
<b>New Electrochemical Method to Evaluate Atmospheric Corrosion Resistance of Stainless Steels—I. MUTO, E. SATO, AND S. ITO</b>	382
<b>Author Index</b>	395
<b>Subject Index</b>	397
