

STP 1199

***Tribology: Wear Test Selection
for Design and Application***

A. W. Ruff and Raymond G. Bayer, Editors

ASTM Publication Code Number (PCN)
04-011990-27

ASTM
1916 Race Street
Philadelphia, PA 19103

Contents

Overview—A. W. RUFF AND R. G. BAYER	vii
Development of a Wear Test for Adiabatic Diesel Ring and Liner Materials—W. A. GLAESER AND P. A. GAYDOS	1
Friction Characteristics of Plastic Plain Bearings at Low Velocity—K. G. BUDINSKI	17
Laboratory and Robot Wear Test Selection for Computer Peripherals—R. G. BAYER	31
Realizing Bench Test Solutions to Field Tribology Problems by Utilizing Tribological Aspect Numbers—R. M. VOITIK	45
Extreme Pressure and Anti-Wear Properties of Lubricants: A Critical Study of Current Test Methods and Suggestions for the Future—M. A. PLINT AND A. F. ALLISTON-GREINER	60
Comparison of Laboratory Abrasion Tests and Field Tests of Materials Used in Tillage Equipment—P. A. SWANSON	80
The Miller Number—A Review—J. E. MILLER AND J. D. MILLER	100
Test Method and Applications for Slurry Erosion—A Review—H. McI. CLARK	113
A Retrospective Survey of the Use of Laboratory Tests to Simulate Internal Combustion Engine Materials Tribology Problems—P. J. BLAU	133
Laboratory Wear Tests for Qualifying Automotive Air-Conditioning Lubricants for Use with Refrigerant HFC-134a—S. I. TSEREGOUNIS, J. A. SPEAROT, F. G. ROUNDS, J. A. BAKER, AND B. C. SERRIANNE	149
Friction and Wear Set-Up for Simulation of Knee Joint—S. BAHADUR	173
The Use of Surface-Layer Activation to Measure Ring Wear in an Operating Heavy Duty Diesel Engine—J. J. TRUHAN AND C. B. COVINGTON	177
