Fatigue and Fracture Mechanics: 33rd Volume

Walter G. Reuter and Robert S. Piascik, Editors

ASTM Stock Number: STP1417
Contents

Overview

TWELFTH ANNUAL JERRY L. SWEDLOW MEMORIAL LECTURE

PRACTICAL APPLICATIONS

Fatigue and Fracture Behavior of Moment Frame Connections Under Seismic Loading (Northridge Earthquake)—J. M. BARSOM

A Structural Integrity Procedure Arising from the SINTAP Project—S. E. WEBSTER AND A. BANNISTER

Failure Beneath Cannon Thermal Barrier Coatings by Hydrogen Cracking; Mechanisms and Modeling—J. H. UNDERWOOD, G. N. VIGILANTE, AND E. TROIANO

Experiences and Modeling of Hydrogen Cracking in Thick-Walled Pressure Vessel—E. TROIANO, G. N. VIGILANTE, AND J. H. UNDERWOOD

High Cycle Fatigue Threshold in the Presence of Naturally Initiated Small Surface Cracks—M. A. MOSHIER, THOMAS RICHARDS, AND BEN HILLBERRY

Effects of Thermomechanical Fatigue Loading on Damage Evolution and Lifetime of a Coated Super Alloy—M. BARTSCH, K. MULL, AND C. SICK

A Hybrid Approach for Subsurface Crack Analysis in Railway Wheels Under Rolling Contact Loads—M. GUAGLIONI, M. SANGIARDI, AND L. VERGANI

Cell Model Predictions of Ductile Fracture in Damaged Pipelines—C. RUOGIERI AND E. HEPPEL

Multiaxial Fatigue Analysis of Interference Fit Aluminum A1 2024-T3 Specimens—G. SHATIL AND A. G. PAGE

Applications of Scaling Models and the Weibull Stress to the Determination of Structural Performance-Based Material Screening Criteria—S. M. GRAHAM AND J. MERCIER

CONSTRAINT AND/OR WELDS

Plane Stress Mixed Mode Crack-Tip Stress Fields Characterized by a Triaxial Stress Parameter and a Plastic Deformation Extent Based Characteristic Length—M. A. SUTTON, F. MA, X. DENG

Constraint Effect on 3D Crack-Front Stress Fields in Elastic-Plastic Thin Plates—X. K. ZHU, Y. KIM, Y. J. CHAO, AND P. S. LAM

Application of a T-Stress Based Constraint Correction to A533B Steel Fracture Toughness Data—R. L. TREGONING AND J. A. JOYCE

The Effect of Localized Plasticity and Crack Tip Constraint in Undermatched Welds—G. MERCER

Modeling of Cleavage Fracture in Connections of Welded Steel Moment Resistant Frames—R. H. DODDS, JR. AND C. G. MATOS

The Importance of Material Fabrication History on Weld Fracture and Durability—P. W. BRUST

Creep Crack Growth in the Base Metal and a Weld Joint of X20CrMoV 12 1 Steel Under Two-Step Loading—K. S. KIM, N. W. LEE, AND Y. K. CHUNG

Analytical & Experimental Study of Fracture in Bend Specimens Subjected to Local Compression—WADE A. MEITH, M. R. HILL, AND T. L. PANONTIN

FATIGUE

Application of Uncertainty Methodologies to Measured Fatigue Crack Growth Rates and Stress Intensity Factor Ranges—R. S. BLANDFORD, S. R. DANIEWICZ, AND W. G. STEELE

Load Interaction Effects on Small Crack Growth Behavior in PH 13-8 Mo Stainless Steel—W. S. JOHNSON AND O. JIN

Mean Stress Effects on the High Cycle Fatigue Limit Stress in Ti-6A1-4V—T. NICHOLAS AND D. C. MAXWELL

Experiments and Analysis of Mean Stress Effects on Fatigue for SAE1045 Steels—C. CHU, R. A. CHERNENKOFF, AND J. J. BONNEN

Fatigue Crack Growth Mechanisms in Alumina at High Temperature—A. S. KOBAYASHI, M. T. KOKALY, AND K. W. WHITE

Effect of Transient Loads on Fatigue Crack Growth in Mill Annealed Ti-62222 at -54, 25, and 175°C—R. I. STEPHENS, R. R. STEPHENS, AND D. A. SCHOENEFIELD

Corrosion Fatigue Behavior of 17-4 PH Stainless Steel in Different Tempers—C.-K. LIN AND C.-P. LIN

ASSORTED TITLES

Plasticity and Roughness Closure Interactions Near the Fatigue Crack Growth Threshold—J. A. NEWMAN AND R. S. PIASCICK

An Extension of Uniaxial Crack-Closure Analysis to Multiaxial Fatigue—C. CHU AND J. J. BONNEN

Dynamic Fracture Toughness Measurements in the Ductile-to-Brittle Region Using Small Specimens—R. E. LINK

A Model for Predicting Fracture Toughness of Steels in the Transition Region from Hardness—M. E. NATISHAN AND M. WAGENHOFER

Results from the MPC Cooperative Test Program on the Use of Precracked Charpy Specimens for $T_0$ Determination—W. A. VAN DER SLUYS, J. G. MERKLE, AND B. YOUNG

A Physics-Based Model for the Crack Arrest Toughness of Ferritic Steels—M. T. KIRK, M. E. NATISHAN, AND M. WAGENHOFER

An Analytical Method for Studying Cracks with Multiple Kinks—S. TERMAATH AND S. L. PHOENIX
