

STP 1454

*Flammability and Sensitivity of  
Materials in Oxygen-Enriched  
Atmospheres: Tenth Volume*

*Theodore A. Steinberg, Barry E. Newton, and  
Harold D. Beeson, editors*

ASTM Stock Number: STP1454

ASTM International  
100 Barr Harbor Drive  
PO Box C700  
West Conshohocken, PA 19428-2959

Printed in the U.S.A.

# Contents

Overview

viii

## IGNITION AND COMBUSTION OF NONMETALS

- Review of Pneumatic Impact Sensitivity Data Obtained on Selected Polymers for Aerospace Applications**—D. HIRSCH, G. PEYTON, F. Y. HSHIEH, AND H. BEESON 3
- Combustion Products Toxicity of Non-Metallic Materials Used for Medical Oxygen Equipment**—H. BARTHÉLÉMY 9
- Issues Related to the Flammability Assessment of Polymers for Hazard Analyses of Oxygen Systems**—D. HIRSCH, S. MOTTO, A. PORTER, H. BEESON, AND M. PEDLEY 21
- Toxic Combustion Products Testing of Polymers Used in Oxygen Systems: A Review of Testing at WSTF**—F. Y. HSHIEH, D. HIRSCH, AND H. BEESON 27
- Upward Flammability Testing-A Probabilistic Measurement**—C. D. ENGEL, S. E. DAVIS, AND E. RICHARDSON 46
- Determining the Time Required for Materials Exposed to Liquid Oxygen to Return to Normal Air Ignitability by Mechanical Impact**—S. SMITH AND J. M. STOLTZFUS 58

## IGNITION AND COMBUSTION OF METALS

- Filters for Use in High Pressure Oxygen Service—Qualification and Test Methods**—H. BARTHÉLÉMY, D. ROY, AND J. P. SCHAFFT 69
- Ultrasonic Measurement Technique of Burning Metals in Normal and Reduced Gravity**—G. J. A. CHIFFOLEAU, T. A. STEINBERG, AND M. VEIDT 75
- Instantaneous RRMI of Iron Rods in Reduced Gravity**—A. EDWARDS, G. J. A. CHIFFOLEAU, M. J. MAES, D. B. WILSON, AND T. A. STEINBERG 91
- Promoted Ignition and Burning Tests of Stainless Steel in Flowing and Nonflowing Oxygen**—E. FORSYTH, M. J. MAES, J. M. STOLTZFUS, AND F. BACHELIER 102

<b>Modeling the Ignition of Large Diameter Rods and Pipes in Flowing Oxygen</b> —M. J. MAES, E. FORSYTH, D. B. WILSON, AND J. M. STOLTZFUS	120
<b>Promoted Ignition-Combustion Tests with Structured Aluminum Packings in Gaseous Oxygen with Argon or Nitrogen Dilution at 0.1 and 0.6 MPa</b> —M. MEILINGER	137
<b>Microanalysis of Quenched and Self-Extinguished Aluminum Rods Burned in Oxygen</b> —B. OSBORNE, T. SUVOROV, J. DEWIT, AND T. A. STEINBERG	151
<b>Promoted Ignition-Combustion Behavior of Cast and Wrought Engineering Alloys in Oxygen-Enriched Atmospheres</b> —R. ZAWIERUCHA, A. V. SAMANT, AND J. F. MILLION	164
<b>Thickness Effects on the Promoted Ignition-Combustion Behavior of Engineering Alloys</b> —A. V. SAMANT, R. ZAWIERUCHA, AND J. F. MILLION	177
<b>Promoted Ignition-Combustion Behavior of Tubular Aluminum Samples in Liquid and Gaseous Oxygen Environments</b> —J. F. MILLION, R. ZAWIERUCHA, AND A. V. SAMANT	192
FAILURE OR HAZARD ANALYSIS AND SAFETY	
<b>Using ASTM Standard Guide G88 to Identify and Rank System-Level Hazards in Large-Scale Oxygen Systems</b> —E. FORSYTH, B. E. NEWTON, J. RANTALA, AND T. HIRSCHFELD	211
<b>Oxygen Hazards Analysis of Space Shuttle External Tank Oxygen Pressurization System</b> —M. SHOFFSTALL, AND J. STOLTZFUS	230
<b>Failure Analysis of Fires in Oxygen Production Process Valves</b> —H. BEESON, J. GINTER, D. DOBBIN, AND E. FORSYTH	245
<b>Australia's Contribution to Advancing the State of Knowledge of Oxygen Systems-The Hard Way: A Review of 30 Years' Incident Experience Down Under, 1965-1995</b> —J. B. MCMAHON AND H. NGUYEN	258
<b>Cause and Origin Analyses of Two Large Industrial Gas Oxygen Valve Fires</b> —B. E. NEWTON AND E. FORSYTH	268
<b>Oxygen Fire Cause and Origin Analysis of the CUMA V2 Underwater Breathing Apparatus</b> —E. FORSYTH, D. EATON, AND B. E. NEWTON	290
<b>A Database for Performing and Archiving Oxygen Hazards Analyses</b> —S. PERALTA AND J. M. STOLTZFUS	307

## MISCELLANEOUS

<b>A Parametric Modeling Study of Fire Safety for Contaminated or Damaged Softgoods in Oxidizing Atmospheres—D. B. WILSON, M. BARRAGAN, AND H. BEESON</b>	319
<b>Optical Techniques for Viewing Oxygen System Fires—T. GALLUS, S. R. SMITH, AND J. M. STOLTZFUS</b>	333
<b>Pipe Cleaning Using HFE Solvents and Assessment of Particle Contamination Found During Pipe Connection—L. E. FLETCHER, R. ZUGNO, AND J. DIMAS</b>	346
<b>Preliminary Results of ASTM G175 Interlaboratory Studies—S. SMITH AND J. M. STOLTZFUS</b>	359
<b>Effect of Molding and Machining on the Neoflon CTFE M400H Polychlorotrifluoroethylene Rod Stock and Valve Seat Properties—J. M. WALLER, B. E. NEWTON, AND H. BEESON</b>	367
