

STP 1475

Effects of Radiation on Materials: 22nd Symposium

Stock #: STP1475

Table of Contents

Austenitic Steels

Behavior of Irradiated Type 316 Stainless Steels under Low-Strain-Rate Tensile Conditions—*T. Yoshitake, I. Yamagata, N. Akasaka, Y. Nakamura, H. Tsai, J. Cole, T. Allen*

Radiation-Induced Stress Relaxation on Welded Type 304 Stainless Steel Measured by Neutron Diffraction—*M. Obata, J.H. Root, Y. Ishiyama, K. Nakata, H. Sakamoto, H. Anzai, K. Asano*

Low-Strain Rate Microstructural Deformation Behavior in 316 Stainless Steel Irradiated in EBR-II—*J.I. Cole, T.R. Allen, H. Tsai, T. Yoshitake, I. Yamagata, N. Akasaka, Y. Nakamura*

Neutron flux effect on the irradiation hardening of type 304 steel—*T. Torimaru, M. Kodama, S. Tanaka, T. Nakamura, K. Asano, K. Kumagai*

Modeling the Effects of Oversize Solute Additions on Radiation-Induced Segregation in Austenitic Stainless Steels—*M.J. Hackett, G.S. Was, E.P. Simonen*

Ferritic-Martensitic Steels

Post-Irradiation Tensile Behavior and Residual Activation of Several Ferritic/Martensitic and Austenitic Steels Irradiated in Osiris Reactor at 325°C up to 9 dpa—*Y. de Carlan, X. Averty, J.-C. Brachet, J.-L. Bertin, F. Rozenblum, O. Rabouille, A. Bougault*

The Role of Grain Boundary Engineering on the High Temperature Creep of Ferritic-Martensitic Alloy T91—*G. Gupta, G.S. Was*

Extrapolation of Fracture Toughness Data for HT9 Irradiated at Temperatures 360-390°C—*D.S. Gelles, R.J. Kurtz*

Development of Fuel Clad Materials for High Burn-up Operation of LWR—*H.-S. Cho, A. Kimura, S. Ukai, M. Fujiwara*

Small Angle Neutron Scattering Study of Irradiated Martensitic Steels: Relation Between Microstructural Evolution and Hardening—*M.-H. Mathon, Y. de Carlan, X. Averty, A. Alamo, C.-H. de Novion*

Radiation Resistance of Advanced Ferritic-Martensitic Steel T122—*T.R. Allen, L. Tan, J.D. Tucker, J. Gan, G. Gupta, G.S. Was, S. Shutthanandan, S. Thevuthasan*

Pressure Vessel Steels

Mechanical and Microstructural Characterization of the Radiation Effects in Model Reactor Pressure Vessel Steels—*A. Ulbricht, J. Bohmert, H.-W. Viehrig*

Effects of Neutron Irradiation on Precipitation in Reactor Pressure Vessel Steels—*Z. Lu, R.G. Faulkner, D. Ellis, T.J. Williams*

Radiation- and Thermally- induced Phosphorus Inter-granular Segregation in Pressure Vessel (RPV) Steels—*Z. Lu, R.G. Faulkner, R.B. Jones, P.E.J. Flewitt*

Fracture Toughness, Thermo-Electric Power, and Atom Probe Investigations of JRQ Steel in I, IA, IAR, and IARA Conditions—*R.K. Nanstad, M. Niffenegger, R.D. Kalkhof, M.K. Miller, M.A. Sokolov, P. Tipping*

Assessment of Neutron Irradiation-Induced Grain Boundary Embrittlement by Phosphorous Segregation in RPVs—*A. Kimura, M. Shibata, R. Kasada, K. Fujii, K. Fukuya, H. Nakata*

Investigation of Neutron Dose and Dose Rate Effects on the Radiation Embrittlement of a Low-Copper Reactor Pressure Vessel Steel—*R. Kasada, T. Kudo, A. Kimura, H. Matsui, M. Narui*

Mechanical Property Changes in Reactor Vessel Materials Thermally Aged for 190,000 Hours at 540°F—*J.B. Hall, H.P. Gunawardane, S.T. Rosinski*

Recent Surveillance Data and a Revised Embrittlement Correlation—*W.L. Server, R.G. Lott, S.T. Rosinski, C.A. English*

Use of Broken Charpy V-notch from Surveillance Program for Fracture Toughness Determination—*M. Scibetta, E. Lucon, R. Chaouadi, E. van Walle, R. Gerard*

Dynamic Finite Element Modeling of Fracture in Charpy V-Notch Specimens of Weld Material 72W—*A.S. Kumar, J.H. McCoy*

Effects of Proton Irradiation on Reactor Pressure Vessel Steel and Its Model Alloys—*A. Kimura, H. Shibamoto, M. Hasegawa, H. Matsui, S. Yamaguchi*

Radiation Damage Fundamentals

Correlated Formation and Stability of SIA Loops and Stacking Fault Tetrahedra in High Energy Displacement Cascades in Copper—*R.E. Voskoboinikov, Y.N. Osetsky, D.J. Bacon*

Atomic-scale simulation of Defect Cluster Formation in High-Energy Cascades in Zirconium—*R.E. Voskoboinikov, Y. N. Osetsky, D.J. Bacon*

Necking and Flow Localization in Reactor Structural Materials—*J.F. Stubbins, X. Wu, X. Pan, M. Li*

Deformation Mechanism Maps of Unirradiated and Irradiated V-4Cr-4Ti—*M. Li, S.J. Zinkle*

Ceramics and Other Nuclear Energy System Materials

Plutonium-238 Alpha-Decay Damage Study of a Glass-Bonded Sodalite Ceramic Waste Form—*S.M. Frank, T. DiSanto, K.M. Goff, S.G. Johnson, J.-F. Jue, T.L. Barber, M. Noy, T.P. O'Holleran, J.J. Giglio*

Microstructure Evolution in ZrC Irradiated with Kr Ions—*J. Gan, M.K. Meyer, R.C. Birtcher, T.R. Allen*

Mechanical Properties of Cubic Silicon Carbide after Neutron Irradiation at Elevated Temperature—*Y. Katoh, L.L. Snead*

Creep-Fatigue Behavior in High Strength Copper Alloys—*J.F. Stubbins, M. Li*

Tensile, Flexural and Shear Properties of Neutron Irradiated SiC/SiC Composites—*T. Nozawa, K. Ozawa, S. Kondo, T. Hinoki, Y. Katoh, L.L. Snead, A. Kohyama*
