DIMENSION STONE USE in BUILDING CONSTRUCTION

Table of Contents

OVERVIEW

STRENGTH TESTING
Full-Scale Flexural Strength Testing for Stone Cladding Design—S. Naggatz, E. Gerns

Testing of Composite Stone Faced Aluminum Honeycomb Panels—M. Scheffler, D. Kneezel

DESIGN
Paving Design: Is Rigid-Fix External Stone Paving the Way to Go?—H. Hensel

Material Strength Considerations in Dimension Stone Anchorage Design—B. Lammert, K. Hoigard

Stiffness Considerations in Dimension Stone Anchorage Design—K. Conroy, K. Hoigard

Status on Development of Code Requirements for Exterior Cladding—M. Lewis

EVALUATION and INVESTIGATION
Investigation of Masonry Failure of a Granite and Limestone Clad Historic Church in Eastern Pennsylvania—F. Erdly, E. Valentino

Characteristics That Affect the Integrity of Existing Thin Stone Cladding—M. Lewis

Travertine: Successful and Unsuccessful Performance, Preconceived Notions, and Mischaracterizations—I. Chin

DURABILITY
Durability of Marble Cladding—A Comprehensive Literature Review—B. Grelk, C. Christiansen, B. Schouenborg, K. Malaga

Testing and Assessment of Marble and Limestone (TEAM) – Important Results From a Large European Research Project on Cladding Panels—B. Schouenborg, B. Grelk, K. Malaga

Comparison of Field Testing With Laboratory Testing of the Durability of Stone—S. Bortz, L. Powers, B. Wonneberger
