

STP 1514

Durability of Building and Construction Sealants and Adhesives: 3rd Symposium

Table of Content

Overview

Laboratory Testing and Specialized Outdoor Exposure Testing

An Attempt at Finding a Correlation Between Environmental and Accelerated RILEM TC 139-DBS Weathering for One-Component Polyurethane Sealants Applied on Mortar—*E. Pozzi, V. Carcano, A. Ausilio*

Joint Sealing Systems for Pavements—A New Approach Towards a Performance Related Evaluation of Capability and Durability—*C. Recknagel, S. Pirskawetz*

Long Term Outdoor Weathering Study of Construction Sealants—*E.D. Bull, G.M. Lucas*

Selective Review of Weathering Tests for Sealants and Thoughts on the Development of Novel Test Concept Based on Simultaneous Weathering and Movement—*P.D. Gorman, J.M. Klosowski*

New Weathering Test Method for Sealants and Preliminary Experimental Results—*P.D. Gorman, J.M. Klosowski*

Effects of Water Immersion on Building and Civil Engineering Joints and the Use of the Arrhenius Method in Predicting Adhesion Lifetime of Water-Immersed Joints—*A.T. Wolf*

Experimental Evaluation of Ultraviolet and Visible Light Curing Acrylates for Use in Glass Structures—*B. Weller, S. Tasche*

Relative Resistance of Silicone and Si-Hybrid Based Sealants to Alternating Periods of Accelerated Weathering and Thermo-Mechanical Movements—*D. Longo, P. Vandereecken*

Evaluation of the Durability Potential of Silyl Terminated Polyacrylate Based Construction Sealant—*Y. Nakagawa, S. Yukimoto*

Factors Influencing the Durability of Sealed Joints and Adhesive Fixations

Substrate Durability Guidelines Used in Silicone Structural Attachment—*L.D. Carbery*

Adhesion Development of Organic and Silicone Sealants on Wet and Dry Concrete—*F. Gubbels, C. Calvet*

Cleaning Silicone Residue from Glass—*J.M. Klosowski, E.S. Breeze, D.H. Nicastro*

Resistance of Adhesive Bonding of Ultra-High Performance Concrete to Hygrothermal, Corrosive, and Freeze-Thaw Cycling Environments—*R. Krelaus, G. Wisner, S. Freisinger, M. Schmidt, S. Böhm, K. Dilger*

Durability by Design: New Results on Load-Carrying Silicone Bonding—*A. Hagl*

Development of New Test Methods and Performance-Based Specifications

Evaluation of Silicone Sealants at High Movement Rates Relevant to Bomb Mitigating Window and Curtainwall Design—*K. Yarosh, A.T. Wolf, S. Sitte*

Quantification of Effect of Enforced Cyclic Movement and Regional Exposure Factors on Weatherability of Construction Sealants—*N. Enomoto, A. Ito, K. Tanaka*

Using Rheology Test Methods to Assess Durability of Cured Elastomers Undergoing Cyclic Deformation—*G.V. Gordon, L.D. Lower, L.D. Carbary*

Effect of Strain on the Modulus of Sealants Exposed to the Outdoors—*C.C. White, D. Hunston, K.T. Tan*

Development of Accelerated Aging Test Methodology and Specimen for Bonded CFRP Systems—*J. Deng, J.E. Tanner, C.W. Dolan, D. Mukai*

Water Penetration of Cladding Components—Results from Laboratory Tests on Simulated Sealed Vertical and Horizontal Joints of Wall Cladding—*M.A. Lacasse, H. Miyauchi, J. Hiemstra*

Field Experience with Sealed Joints and Adhesive Fixation

Field Performance and Accelerated Weathering of High Performance Acrylic and Polyurethane Sealants for Tilt-Up Applications—*V. Demarest, A. Liss, R. Queenan, P.D. Gorman*
