

STP 1522

## Flammability and Sensitivity of Materials in Oxygen-Enriched Environments: 12<sup>th</sup> Volume

---

### Table of Contents

#### Overview

Keynote—Materials Selection for Oxidizer Service—Successes and Challenges — *J. W. Slusser*

Promoted Ignition-Combustion Behavior of Cobalt and Nickel Alloys in Oxygen-Enriched Atmospheres  
— *J. F. Million, A. V. Samant, and R. Zawierucha*

Defining the Flammability of Cylindrical Metal Rods Through Characterization of the Thermal Effects of  
the Ignition Promoter — *D. Lynn, T. Steinberg, K. Sparks, and J. M. Stoltzfus*

A Proposed Qualitative Framework for Heterogeneous Burning of Metallic Materials: The “Melting Rate  
Triangle” — *N. R. Ward and T. A. Steinberg*

Ignition of Contaminated Aluminum by Impact in Liquid Oxygen—Influence of Oxygen Purity —  
*E. Werlen, F. Crayssac, O. Longuet, and F. Willot*

Verification of the ASTM G-124 Purge Equation — *K. E. Robbins, S. E. Davis, and S. D. Herald*

Determination of Burn Criterion for Promoted Combustion Testing — *K. M. Sparks, J. M. Stoltzfus,  
T. A. Steinberg, and D. Lynn*

Promoted Ignition Testing of Metallic Filters in High-Pressure Oxygen — *G. A. Odom,  
G. J. A. Chiffolleau, B. E. Newton, and J. R. Fielding*

Oxygen Compatibility of Brass-Filled PTFE Compared to Commonly Used Fluorinated Polymers for  
Oxygen Systems — *S. D. Herald, P. M. Frisby, and S. E. Davis*

Ignition Sensitivity of Nonmetallic Materials in Oxygen-Enriched Air (NITROX): A Never Ending Story  
in SCUBA Diving? — *C. Binder, T. Brock, O. Hesse, S. Lehné, and T. Tillack*

The Importance of Quality Assurance and Batch Testing on Nonmetallic Materials Used for Oxygen  
Service — *C. Binder, K. Arlt, T. Brock, P. Hartwig, O. Hesse, and T. Tillack*

Identification and Quantification of Combustion Products Released by Non-Metallic Materials Used for  
Medical Oxygen Equipment — *M. Carré, H. Barthélémy, J. Bruat, S. Lombard, O. Longuet, and  
J. P. Schaaff*

Determination of Time Required for Materials Exposed to Oxygen to Return to Reduced Flammability —  
*S. Harper, D. Hirsch, and S. Smith*

Effect of Oxygen Concentration on Autogenous Ignition Temperature and Pneumatic Impact Ignitability  
of Nonmetallic Materials — *S. Smith*

Liquid Oxygen Rotating Friction Ignition Testing of Aluminum and Titanium with Monel® and Inconel® for Rocket Engine Propulsion System Contamination Investigation — *S. F. Peralta, K. R. Rosales, and J. M. Stoltzfus*

Electrical Arc Ignition Testing for Common Handheld Electrical Devices in Oxygen-Enriched Atmosphere — *K. Sparks, T. Gallus, and S. Smith*

High Pressure Quick Disconnect Particle Impact Tests — *K. R. Rosales and J. M. Stoltzfus*

Advanced Crew Escape Suits (ACES) Particle Impact Test — *K. R. Rosales and J. M. Stoltzfus*

Good Practices for Avoiding Fires in Steel Mill Oxygen Systems — *E. T. Forsyth, B. E. Newton, G. J. A. Chiffolleau, and B. Brophy*

Oxygen Fire Hazards in Valve-Integrated Pressure Regulators for Medical Oxygen — *E. T. Forsyth, B. E. Newton, G. J. A. Chiffolleau, and B. Forsyth*

Sealed Aluminum Cavity Reactions when Submerged in Pure O<sub>2</sub> Reboiler Sump — *W. P. Schmidt, M. Cawthra, P. A. Houghton, R. H. McDonald, Jr., R. J. Sherwood, and S. J. Wieder*

Vacuum Superinsulated Liquid Oxygen Piping and Vessels — *A. Colson, E. Werlen, and H. Barthélémy*

Adiabatic Compression Testing—Part I: Historical Development and Evaluation of Fluid Dynamic Processes Including Shock-Wave Considerations — *B. E. Newton and T. Steinberg*

Adiabatic Compression Testing—Part II: Background and Approach to Estimating Severity of Test Methodology — *B. E. Newton, G. J. A. Chiffolleau, T. Steinberg, and C. Binder*

Tribocharging of Particle Contaminants Evaluated as an Ignition Source in Oxygen-Enriched Environments — *A. Oza, S. Ghosh, and K. Chowdhury*

An Approach to Understanding Flow Friction Ignition: A Computational Fluid Dynamics (CFD) Study on Temperature Development of High-Pressure Oxygen Flow Inside Micron-Scale Seal Cracks — *J. D. Hooser, M. Wei, B. E. Newton, and G. J. A. Chiffolleau*

The Rate-Limiting Mechanism for the Heterogeneous Burning of Cylindrical Iron Rods — *N. R. Ward and T. A. Steinberg*

Chlorine Trifluoride Exposure Testing and Oxidizer Reactivity Results — *J. VanOmmeren*
