STP 1537

Pesticide Formulations and Delivery Systems:
Innovative Green Chemistries for the 21st Century

Table of Contents

Overview

Advances in Green Formulation Technology
Approaches towards Design of Green Matrices to Formulate Agriculturaland Bio-active Materials and
Provide Improved Efficacy—K.S. Narayanan, J. Patel, D. Jon, X. Qu, T. Zhang

Emulsification Performance Used for NPE Replacement in Solvent-Based Formulations
E.H. Lowe, R. Milbradt

A New Environmentally Friendly Solvent of Low Toxicity for Crop Protection Formulations—
T. Vidal, V. Bramati, K. Murthy, B. Abribat

Development of Botanical Pesticides for Public Health—G. Paluch, R. Bradbury, S. Bessette

Novel Formulations of an Organic Acid Herbicide—D. Penner, R. Coleman, J. Michael

WG and WP Formulations of Captan with Polymeric Surfactants—Q. Hu

Adjuvants and Test Methods
Novel Alkyl Polyglucoside Surfactant Derivatives for Improving the Infiltration of Irrigation Water into
Repellent Soil—P.T. Bialy

C.M. Elsik

A Fluorescent Tracer Method for Evaluating Spray Transport and Fate of Field and Laboratory Spray
Applications—B.K. Fritz, W.C. Hoffmann, P. Jank

A Test Method for Evaluating Water Conditioning Adjuvants—R.K. Zollinger, M.L. Bernards,
D.E. Peterson, B.G. Young, G.K. Dahl, J.V. Gednalski

Drift Reduction—Formulation and Application Technology
Evaluation of a Modified Guar OD Formulation for Spray Drift Mitigation—A. Halecky,
J. Roberts, K. Penfield, T. Baker

Effects of Air Speed and Liquid Temperature on Droplet Size—W.C. Hoffmann, B.K. Fritz,
W.E. Bagley, Y. Lan

Field Scale Evaluation of Spray Drift Reduction Technologies from Ground and Aerial Application
