STP 1547
Effects of Radiation on Nuclear Materials: 25th Volume

Table of Contents

Reactor Pressure Vessel Steels

Long Term Irradiation Phenomena in RPV Steels - the LONGLIFE Project—E. Altstadt, F. Bergner, H. Hein

A Wide-Range Embrittlement Trend Curve for Western RPV Steels—M. Kirk

Long Term Irradiation Effects on the Mechanical Properties of Reactor Pressure Vessel Steels—P. Efsing, J. Rouden, M. Lundgren

Synergistic Effects of Helium and Displacement Damage

Approach of He / dpa Synergistic Effects In Iron-Based Materials using JANNUS—P.M. Trocellier

Use of MeV Ion Beams to Simulate the Irradiation Effects in Advanced Materials at JANNUS Saclay—P.M. Trocellier

Austenitic steels, Ni, Zr, and Al-Mg alloys, and Polyethylene

Irradiation Testing of Zirconium Alloys and Stainless Steel in Fast Breeder Test Reactor, India—T. Jayakumar, S. Murugan, P.V. Kumar, J. Joseph, S. Venugopal, B. Raj

Material Investigations on Highly Irradiated Aluminum Magnesium Alloys for Life Time Assessment of a Neutron Beam Tube in the BER II Research Reactor—H. Hein, H. Schnabel, S. Welzel

Modeling of Radiation Effects

Atomistic Investigations of Intrinsic and Extrinsic Point Defects in bcc Uranium—B.W. Beeler, C. Deo, M.I. Bakes, M. Okuniewski

Impact of Vacancy Type Defects on Thermal Conductivity of β-SiC - Molecular Dynamics vs an Analytical Approach—G.D. Samolyuk, S.I. Golubov, Y.N. Osetsy, R. Stoller

A Phenomenological Micro-Mechanical Model of FCC Metals under Radiation Induced Crystal Defects—Y. Aoyagi, T. Tsuru, Y. Kaji

Development of Models for Irradiation-Induced Changes to Microstructure and Stress-Strain Relations of Austenitic Steels—S. Jitsukawa, Y. Abe, K. Suzuki, N. Okubo

Dislocation Bias Calculations in Metals using a Combined Finite-Element Rate-Theory Approach—D. Seif, N.M. Ghanem
