# Global Testing of Extended Service Engine Coolants and Related Fluids

## Table of Contents

### Overview

**Technical Reviews**
- Development of Extended Life Coolant Technologies—Past, Present, and Future — B. Yang, A. Gerush, P. Woyciejsjes
- Non-Aqueous Coolant Perspectives — J. T. Light

### New Engine Coolant Technology
- Carboxylate Based Coolant with Superior Oxidation Stability — J. De Kimpe
- Improved Aluminum Passivation for Heavy-Duty Coolants — S. Claeys, S. Lievens, J. De Kimpe, P. Van de Ven
- Development of Glycerin (1,2,3-propanetriol)-based Antifreeze With Advanced Nitrite-Free Carboxylate Inhibitors for Light-, Medium-, and Heavy-Duty Engine Cooling Systems — S. McGlothlin

### New Engine Coolant Testing
- Extending the Corrosion of Heat-Rejecting Aluminum Surfaces Test for Developing and Evaluating Extended Service Interval Engine Coolant Formulations — E. R. Eaton, Jr., E. Duvinjak
- Extending the Corrosion in Glassware Test for Developing and Evaluating Extended Service Interval Engine Coolant Formulations — E. R. Eaton and E. Duvinjak
- Extending the Simulated Service Test for Developing and Evaluating Extended Service Interval Engine Coolants — E. Trevino Jr. and E. R. Eaton V

### Interactions in Engine Cooling Systems
- The Effects of Residual Controlled Atmospheric Brazing Flux on Engine Coolants — F. C. Alverseron, M. Ranger, H. J. DeBaun
- The Effect of Long-Term Intermittent Service on Elastomers in Aqueous Engine Coolants — D. L. Hertz, Jr., D. L. Hertz III, H. Cook
- Investigation of the Effects of Mixtures of Dissimilar Engine Coolant Inhibitor Chemistries on Automotive Water Pump Durability — L. A. Weisenberger, Y. Hodjat
