Table of Contents

Overview

Flow Rate Measurement in Multi-Component Geosynthetic Clay Liners—N. Touze-Foltz, C. Barral, D. Croissant, K.P. von Maubeuge

Water-Vapor Diffusion Through Polymeric Barriers Used in Multi-Component GCLs—S. Allen

Interface Transmissivity Measurement in Multicomponent Geosynthetic Clay Liners—H. Bannour, N. Touze-Foltz, A. Courte, K.P. von Maubeuge

Large-Scale Flow Testing through Seamed and Unseamed Samples of a Multi-Component Geosynthetic Clay Liner—C. Athanassopoulos, Z. Yuan, R.J. Trauger, M. Goldenberg

Peel Testing and Moisture Effects for Coated/Laminated Geosynthetic Clay Liners—G.T. Torosian

Peel and Shear Test Comparison and Geosynthetic Clay Liner Shear Strength Correlation—K.P. von Maubeuge, H. Ehrenberg

Direct Shear Testing Performed on Multi-Component GCLs With Laminated/Coated Side—J. Youngblood, J.P. Kline

Boundary Effects of Gripping System on Internal Shear Strength Tests of Multi-Component Geosynthetic Clay Liners—X. Tang, Z. Yuan

Cyclic Shear Testing of a Multi-Component Geosynthetic Clay Liner—C. Athanassopoulos, P.J. Fox, J.D. Ross, M. Goldenberg

Abrasion Testing on Multi-Component Geosynthetic Clay Liners—B. Herlin, B. Kennedy

Factors Influencing Dimensional Stability of Multi-Component Geosynthetic Clay Liners—J.L. Hanson, N. Yesiller, G.R. Olsen

Calcium Carbonate Content of Various Bentonites Used in GCLs—G.R. Koerner

The Geosynthetic Concrete Composite Mat (GCCM)—J. Paulson, R. Kohlman
