STP 1565
Silica and Associated Respirable Mineral Particles

Table of Contents

Overview

Analysis of the Silica Percent in Airborne Respirable Mine Dust Samples from U.S. Operations—E. Cauda, G. Joy, A. Miller, S. Mischler

Quartz in Respirable Airborne Dust in Workplaces in Selected Coal and Metal Mines in India—A.K. Bandopadhyay, S. Kumari

Respirable Crystalline Silica Exposures among Stone Workers in Ireland—C.B. Healy, M.A. Coggins, M. Van Tongeren, L. MacCalman, P. McGowan

X-Ray Absorption Effect in Aerosol Samples Collected on Filter Media—M. Meccia, C. Pretorius, P. Stacey, M. Mattenklott, E. Incocciati

Determination of Crystalline Silica in Dust at Low Concentrations by Low-Temperature Infrared Spectrometry—W.P. Chisholm, T. Lee, M. Chirila

Evaluation of Quartz Residue on Cassette Interiors of AIHA Proficiency Samples—L. Dobson, L. Reichmann, D. Popp

Infrared Analysis of Respirable Coal Mine Dust for Quartz: Thirty-Five Years—S.M. Ainsworth

Development of SRMs 295x and 296x, Respirable Crystalline Silica on Filter—L.L. Yu, J. D. Fasset, B.S. MacDonald, T.A. Butler, D.M. Ramsey, R.J. Key-Schwartz, T. C. Rains
