STP 1573 Fire-Resistant Fluids

Table of Contents

Use of Thickened High Water Hydraulic Fluid in Flat Rolled Steel Production — John Sherman

Fire-Resistant Fuel for Military Compression Ignition Engines — Steven Westbook

Ion Exchange and Mechanical Purification of Fire-Resistant Phosphate Ester Fluids used in Steam Turbine Control Systems — George Staniewski

Phosphate Ester-Based Fluid Specific Resistance: Effects of Outside Contamination and Improvement Using Novel Media — Matthew Hobbs

37 Years of Fleet Operating and Maintenance Experience Using Phosphate Ester Fluids for Bearing Lubrication in Gas Turbine/Turbo Compressor Applications — Peter Dufresne

Property and Performance Evaluation of Water Glycol Hydraulic Fluids — Patrice Cusatis

Anhydrous Fire Resistant Hydraulic Fluids using Polyalkylene Glycols — Martin Greaves

Polyether Polyol Hydraulic Fluids: Twenty Years of Fire-Resistance — Kevin Kovanda

Performance Comparison of Non-Aqueous Fire-Resistant Hydraulic Fluids — Salvatore Rea

Assessing and Classifying the Fire-Resistance of Industrial Hydraulic Fluids — David Phillips
